## **Introduction**

This bulletin contains the final Gross Domestic Product (GDP) estimates from 2009 to 2015 and revised GDP estimates for the first to third quarters of 2016. The fourth quarter 2016 GDP estimates are provisional.

Gross Domestic Product (GDP) is Ghana's official measure of economic growth.

There are three different approaches for calculating GDP. These are the production, expenditure and the income approaches. The quarterly GDP figures in this publication are estimated through the production approach.

The bulletin contains 24 Tables: Tables 1 to 4, Quarterly GDP at Current Prices by Economic Activity and respective Sectoral Distribution; Tables 5 to 14, Quarterly GDP at Constant 2006 prices by Economic Activity and Sectoral Growth rates; and Tables 15 to 24 Seasonally Adjusted Quarterly GDP at Constant 2006 Prices by Economic Activity and Sectoral growth rates.

Additional information on Ghana's GDP and national accounts are published on the Ghana Statistical Service website ([www.statsghana.gov.gh](http://www.statsghana.gov.gh)).

## NOTES

### Forthcoming issues

Issue	Expected Date of Publication
Fourth Quarter of 2016	April 26, 2017
First Quarter of 2017	June 28, 2017
Second Quarter of 2017	September 27, 2017
Third Quarter of 2017	December 27, 2017

### Explanatory notes

#### Introduction

This publication contains revised quarterly GDP estimates for the first to third quarters of 2016 and provisional GDP for the fourth quarter of 2016. GDP estimates for the period 2006 to 2015 are finalized.

Gross Domestic Product (GDP) is Ghana's official measure of economic growth.

There are three different approaches for calculating GDP. These are the production approach, the expenditure approach and the income approach. The production approach is used to calculate Ghana's GDP on a quarterly basis. For more information about GDP and the national accounts, go to Ghana Statistical Service website ([www.statsghana.gov.gh](http://www.statsghana.gov.gh)).

#### Sources and Methods

This Statistical Release contains independently compiled quarterly estimates of the Gross Domestic Product (GDP) from the first quarter of 2006 onwards. The estimates are based on the 1993 System of National Accounts (SNA), International Standard Industrial Classification Revision 4 published by the United Nations and Quarterly National Accounts Manual: Concepts, Data Sources and Compilation by International Monetary Fund (IMF). This means that the methodology, concepts and classifications are in accordance with the guidelines and recommendations of an internationally agreed system of national accounts. The estimates of real GDP use 2006 as the base year.

#### Methodology

Short-term indicators are used to estimate the quarterly GDP (See IMF's Quarterly National Accounts Manual: Concepts, Data sources, and Compilation) from which annual GDP estimates are calculated independently from the quarterly estimates. Alternatively, annual GDP estimates are derived as the sum of the GDP for the four quarters of the year.

#### Seasonal adjustment

The quarterly value added and GDP estimates have been seasonally adjusted. Seasonal adjustment is the process of estimating and removing seasonal effects from time series to reveal non-seasonal features. This process is to provide a clearer view of short term movements and trends and to allow early identification of turning points.

#### Revision policy

Revisions to the previously published series may be made each quarter. The frequency and cause of these revisions are as follows:

**Quarterly:** additional data becoming available for the latest quarters, which are used to update existing estimates; revisions to quarterly data (e.g. revisions to the Balance of Payments, Fiscal data, VAT data), which are incorporated as soon as they are available to maintain consistency among different series of published macro-economic statistics.

**Annual:** introduction of annual data following the release of the latest annual national accounts each year.

**Irregular: Irregular revisions occur** for example, as a result of methodological changes. Note that, as far as possible, revisions of this nature are incorporated to coincide with the annual cycle of revisions outlined above.
