Producer Price Inflation Increases to 23.14 in January 2011.

The Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the price indices with reference to September 2006, the base period. This release shows the producer price growth since September 2006, as well as the annual (point-to-point) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities). The current monthly data are provisional subject to revision in the following month. All other data are final.

January 2011 Producer Inflation

In January 2011, the Price Index with reference to the base period (September 2006) was 234.92, after recording 221.83 in December 2010. This translates to a monthly change rate (i.e., the percentage change in the PPI between December 2010 and January 2011) of **5.90** percent, after recording 2.22 percent in December 2010 (Table 1).

Table 1: PPI December 2010 and January 2011

Month	Index Sept'06 =100	Change rate (%)	
		Monthly	Yearly
December 2010	221.83	2.22	17.79
January 2011	p234.92	p 5.90	p23.14

p: provisional

The respective yearly change (i.e., the percentage change in the PPI between January 2010 and January 2011) was **23.14** percent, indicating a 5.35 percentage points higher than that for December 2010 (Table 1).

Table 2: PPI and Inflation by Sector, January 2011 (September 2006=100)

Sector	Index	Change rate (%)	
		Monthly	Yearly
Mining & Quarrying	407.22	-0.41	25.99
Manufacturing	195.67	8.30	11.41
Utilities	273.97	0.01	71.81
INDUSTRY	234.92	5.90	23.14

The data in this table is provisional

Manufacturing, the largest industrial sub-sector (with 69.75 percent share of all industry), recorded an inflation rate of 11.41 percent.

Mining and Quarrying (with 13.97 percent share of all industry) recorded inflation rate of 25.99 percent.

Utilities, (which includes production, transmission and distribution of electricity; collection, purification and distribution of water), recorded inflation rate of 71.81 percent.

Trends

Inflation rate for January 2011 was lower than the rate recorded in the same period in 2010 (26.34%). The all industry year-on-year average inflation for 2010 was 18.76 percent, a rate lower than the rate for the month of January 2011 by 4.38 percentage points.

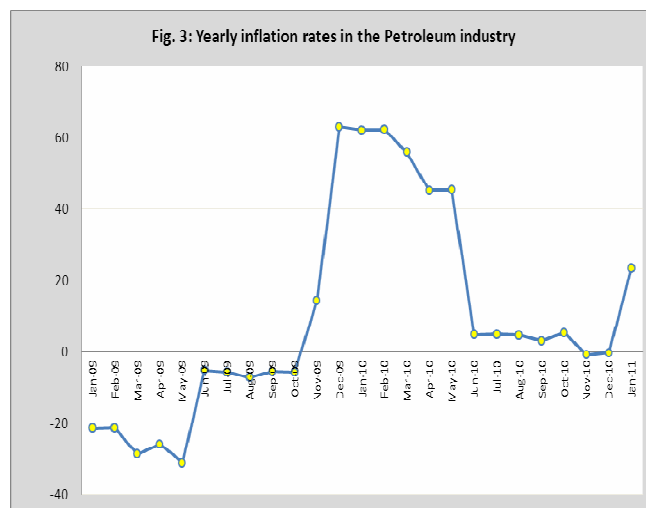

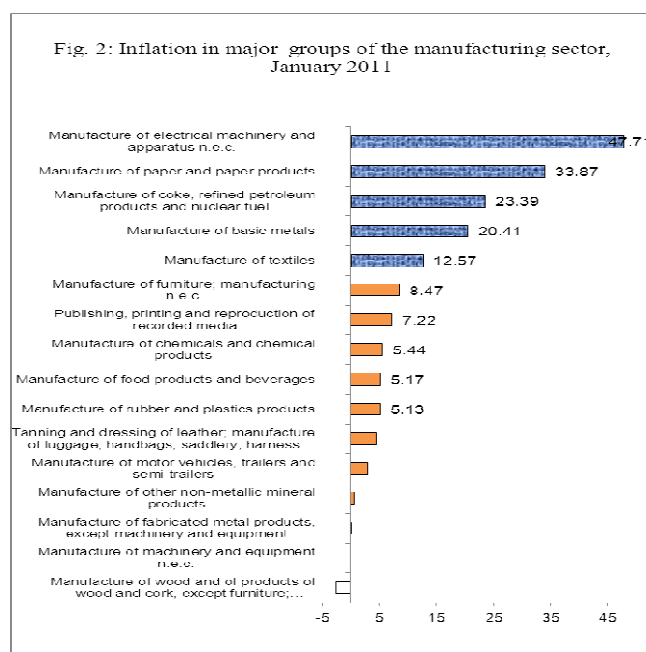

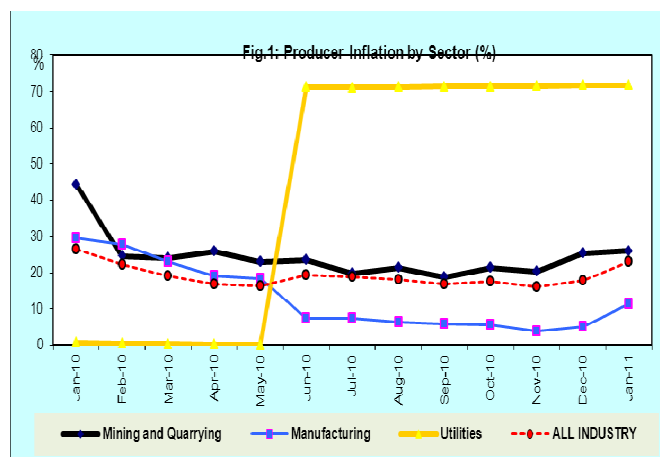

During the 12-month period (January 2010 to January 2011), the all industry recorded the highest inflation rate in January 2010 (26.34 %). Between January 2010 and May 2010, the rates declined, but increased in June 2010. Thereafter, the rates were quite stable until November 2010. In January 2011 the rate rose to 23.14 (Fig. 1).

Manufacturing Sector

Five out of the sixteen major groups in the manufacturing sector recorded inflation rates higher than the manufacturing sector average of 11.41 percent. Manufacture of electrical machinery and apparatus recorded the highest inflation rate (47.71%), while manufacture of wood and of wood products and cork recorded negative inflation rate of 2.64 percent respectively (Fig. 2).

Petroleum Price Index

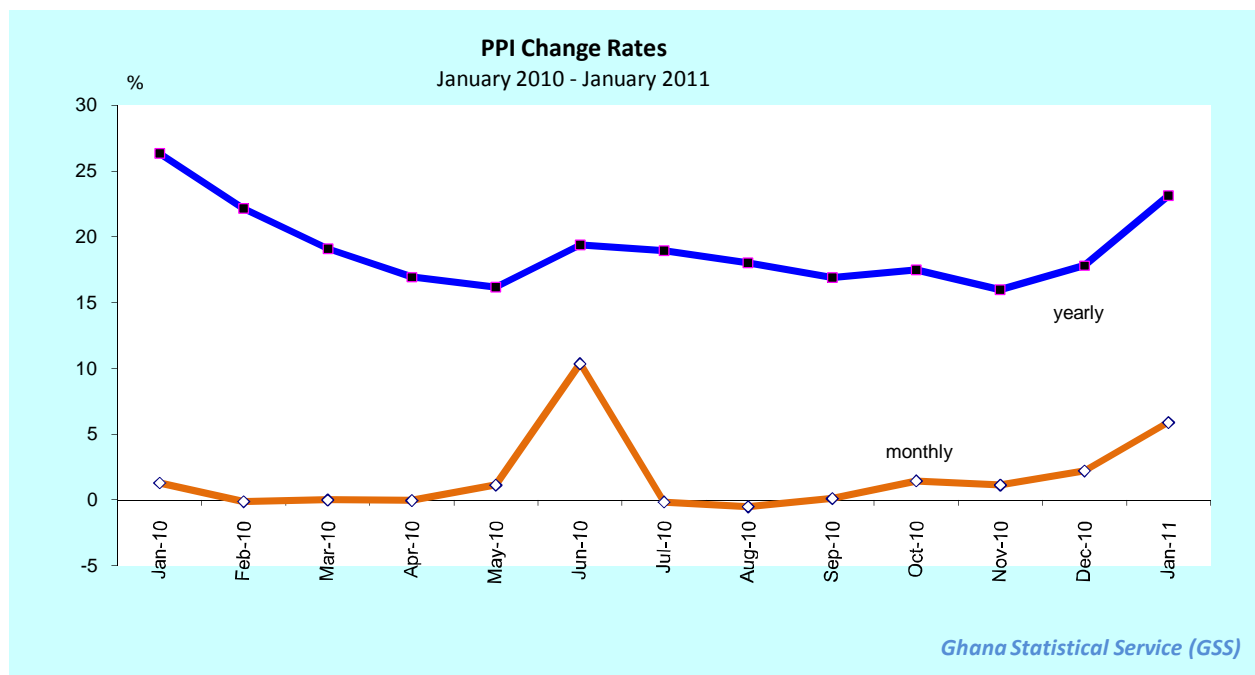

Between October 2009 and December 2009, producer inflation in the manufacture of petroleum products group recorded a sharp increase. Inflation in this sector stabilized for the first two months of 2010, but dropped between March and June 2010. The rate declined in November 2010 after increasing slightly in October 2010. In January 2011 inflation in the petroleum industry jumped to 23.39 (Fig 3).
