HIGHLIGHTS FOR JANUARY 2013

Producer Price Inflation increase to 11.5% in January 2013

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the price indices with reference to September 2006, the base period.

This release shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of January 2013 are provisional, and are subject to revision when additional data are available. All other indicators are final.

The Producer Price Index increased by 11.5 percent between January 2012 and January 2013 (year-on-year), representing a decreased in producer inflation by 5.6 percentage points relative to the rate recorded in December 2012 (17.1%). The month-on-month change in producer prices between December 2012 and January 2013 was 0.2 percent.

In January 2013, the producer price inflation in the Mining and Quarrying subsector decreased by 8.4 percentage points over the December 2012 rate of 26.8 percent, to record 18.4 percent. Manufacturing, which constitutes more than two-thirds of total industry, declined to 12.8 percent, from a rate of 19.3 percent in December 2012. The rate for the Utilities sub-sector was 0.2 percentage point lower than that of December 2012.

During the 12-month period (January 2012 to January 2013), all industry recorded the highest year-on-year inflation in June and October 2012 (19.1%) and the lowest in January 2013 (11.5%). From January to May 2012, the producer inflation fluctuated between 15.0 percent and 16.6 percent, and thereafter increased significantly in July 2012 to 19.0 percent, but dropped to 17.8 percent in August. It declined further in September 2012 but increased to 19.1 percent in October 2012 and dropped subsequently in November 2012 to 15.8 percent. In December 2012, it increased to 17.1 percent but declined to 11.5 in January 2013.

During the month of January 2013, nine out of the sixteen major groups in the manufacturing subsector recorded inflation rates higher than the sector average of 12.8 percent (Fig. 2). Manufacture of textiles recorded the highest inflation rate (34.3%) whilst Manufacture of coke, refined petroleum products recorded a negative inflation rate (-1.3%).

PPI by Sectors; January 2012 to January 2013

Selected records:

All items PPI: Annual rate was 11.5 percent; as compared to 17.1 percent last month.

Petroleum Price Index: Annual rate -1.3 percent; as compared to 16.4 percent last month.

Manufacture of food products and beverages: Annual rate was 17.3 percent for January 2013, as compared to 19.4 percent in December 2012.

Manufacture of textiles: Annual rate 34.3 percent; as compared to 40.1 percent last month.

Electricity and Water Supply: Annual rate is 1.3 percent; as compared to 1.5 percent in December 2012.

The bulletin on the January 2013 PPI and more detailed data in time series format have been posted on the website www.statsghana.gov.gh.

The next release date is 27th March 2013.
