HIGHLIGHTS FOR MAY 2013

Producer Price Inflation decreased to 8.6% in May 2013

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the price indices with reference to September 2006, the base period.

This release shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of May 2013 are provisional, and are subject to revision when additional data are available. All other indicators are final.

The Producer Price Index increased by 8.6 percent between May 2012 and May 2013 (year-on-year), representing a decrease in producer inflation by 1.6 percentage points relative to the rate recorded in April 2013 (10.2%). The month-on-month change in producer prices between April 2013 and May 2013 was -0.5 percent.

In May 2013, the producer price inflation in the Mining and Quarrying subsector decreased by 4.3 percentage points over the April 2013 rate of 2.4 percent, to record -1.9 percent. Manufacturing, which constitutes more than two-thirds of total industry, decreased to 13.2 percent, from a rate of 14.4 percent in April 2013. The rate for the Utilities sub-sector remained virtually unchanged

During the 12-month period (May 2012 to May 2013), the highest year-on-year inflation of 19.1 percent for all industry was recorded in June and October 2012 and the lowest in May 2013 (8.6%). Between May and July 2012, the producer price inflation rose steadily. Thereafter, the rate fluctuated until December 2012. However, from December 2012 to February 2013, the rate declined to 9.1 percent but increased steadily to record 10.6 percent in March 2013, and subsequently declined continuously to 8.6 percent in May 2013

During the month of May 2013, six out of the sixteen major groups in the manufacturing subsector recorded inflation rates higher than the sector average of 13.2 percent (Fig. 2). Manufacture of furniture; manufacturing n.e.c. recorded the highest inflation rate (34.8%) whilst producer prices in the manufacture of machinery and equipment n.e.c. recorded no change over the one year period.

PPI by Sectors; May 2012 to May 2013

Selected records:

All items PPI: Annual rate was 8.6 percent; as compared to 10.2 percent last month.

Petroleum Price Index: Annual rate 12.5 percent; as compared to 15.3 percent last month.

Manufacture of food products and beverages: Annual rate was 15.2 percent for May 2013, as compared to 16.6 percent in March 2013.

Manufacture of textiles: Annual rate 24.0 percent; as compared to 31.1 percent last month.

Electricity and Water Supply: Annual rate is 0.9 percent; which is almost the same as last month.

A copy of this bulletin which provides May 2013 PPI and detailed time series data is posted on the GSS website [www.statsghana.gov.gh].

The next release date is 24th July, 2013.
