

Ghana's Readiness to Report on SDGs

GHANA'S DATA FOR SUSTAINABLE DEVELOPMENT ROADMAP FORUM

APRIL 5TH, 2017

Data Requirement

- **Global Agendas:** Sustainable Development Goals, COP21
- **Regional Agendas:** AU Agenda 2063
- **National Agendas:** Medium Term Development Framework;
Long-term National Development Plan

- **Efforts to align are ongoing**

Linking all the Data Needs

Addressing Data Gaps

SDG Indicator Tier Classification

Based on their level of methodological development and overall data availability, the indicators contained in the set of 230 global indicators are classified as:

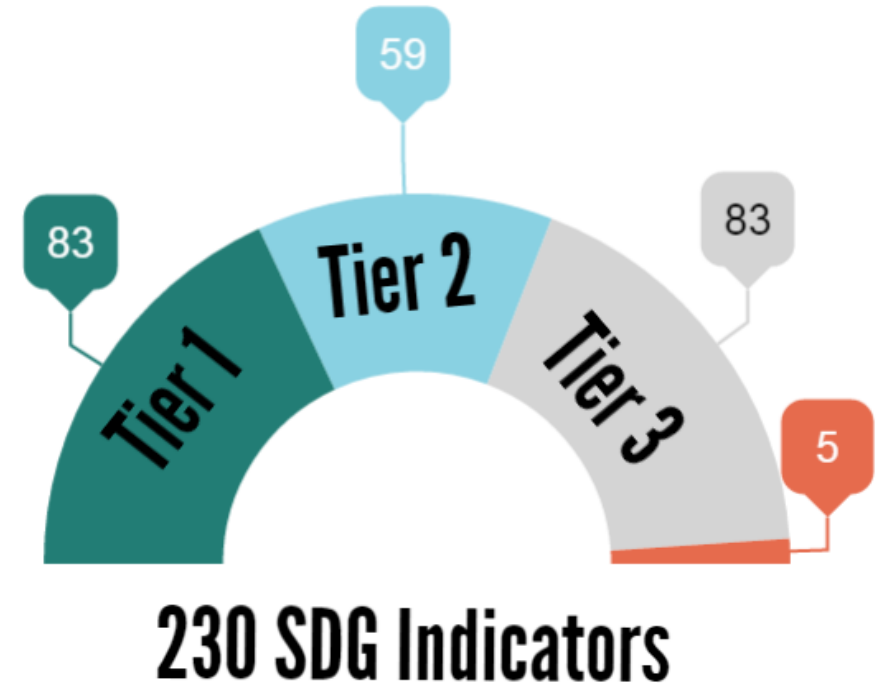

- (a) Tier I: Indicator conceptually clear, established methodology and standards available, data regularly produced by countries
- (b) Tier II: Indicator conceptually clear, established methodology and standards available, but data not regularly produced by countries
- (c) Tier III: Indicator for which an internationally agreed methodology has not yet been developed

Work plan for development of Tier III indicators Discussed during 5th IAEG-SDG

Current global indicator regime

- The updated global tier classification (December 2017)
 - 83 Tier 1 indicators
 - 59 Tier 2 indicators
 - 83 Tier 3 indicators
 - 5 indicators that have multiple tiers (*different of the indicator are classified into different tiers*)

Total Number = 230

Data Determination Process in Ghana

Assessment of the current situation for data production for monitoring the SDGs in Ghana including:

Draft report now available on GSS website for comments

Current Data Situation in Ghana: Tier 1, 2

■ Indicator Produced (40%) ■ Data Available (40.65%)
■ No Data Available (19.35%)

Current Data Situation in Ghana: Tier 1, 2

Of those indicators that are produced/
data is available for, the data is from:

Key challenges to *Leave No One Behind*

- Data Disaggregation

- Gender
- Location
- Socio-economic grouping
- Disability status
- Etc.

- Timeliness of Data

- Data on new thematic areas

- Multi-stakeholder data production

- Improving use of data for decision-making

Opportunities and approaches to filling data gaps

Strengthening Censuses and Surveys

Building effective administrative data system

Exploring new sources and types of data

Encouraging Data Use

Opportunities to make data easier to use

Make data Open for reuse

Better communication and visibility of data

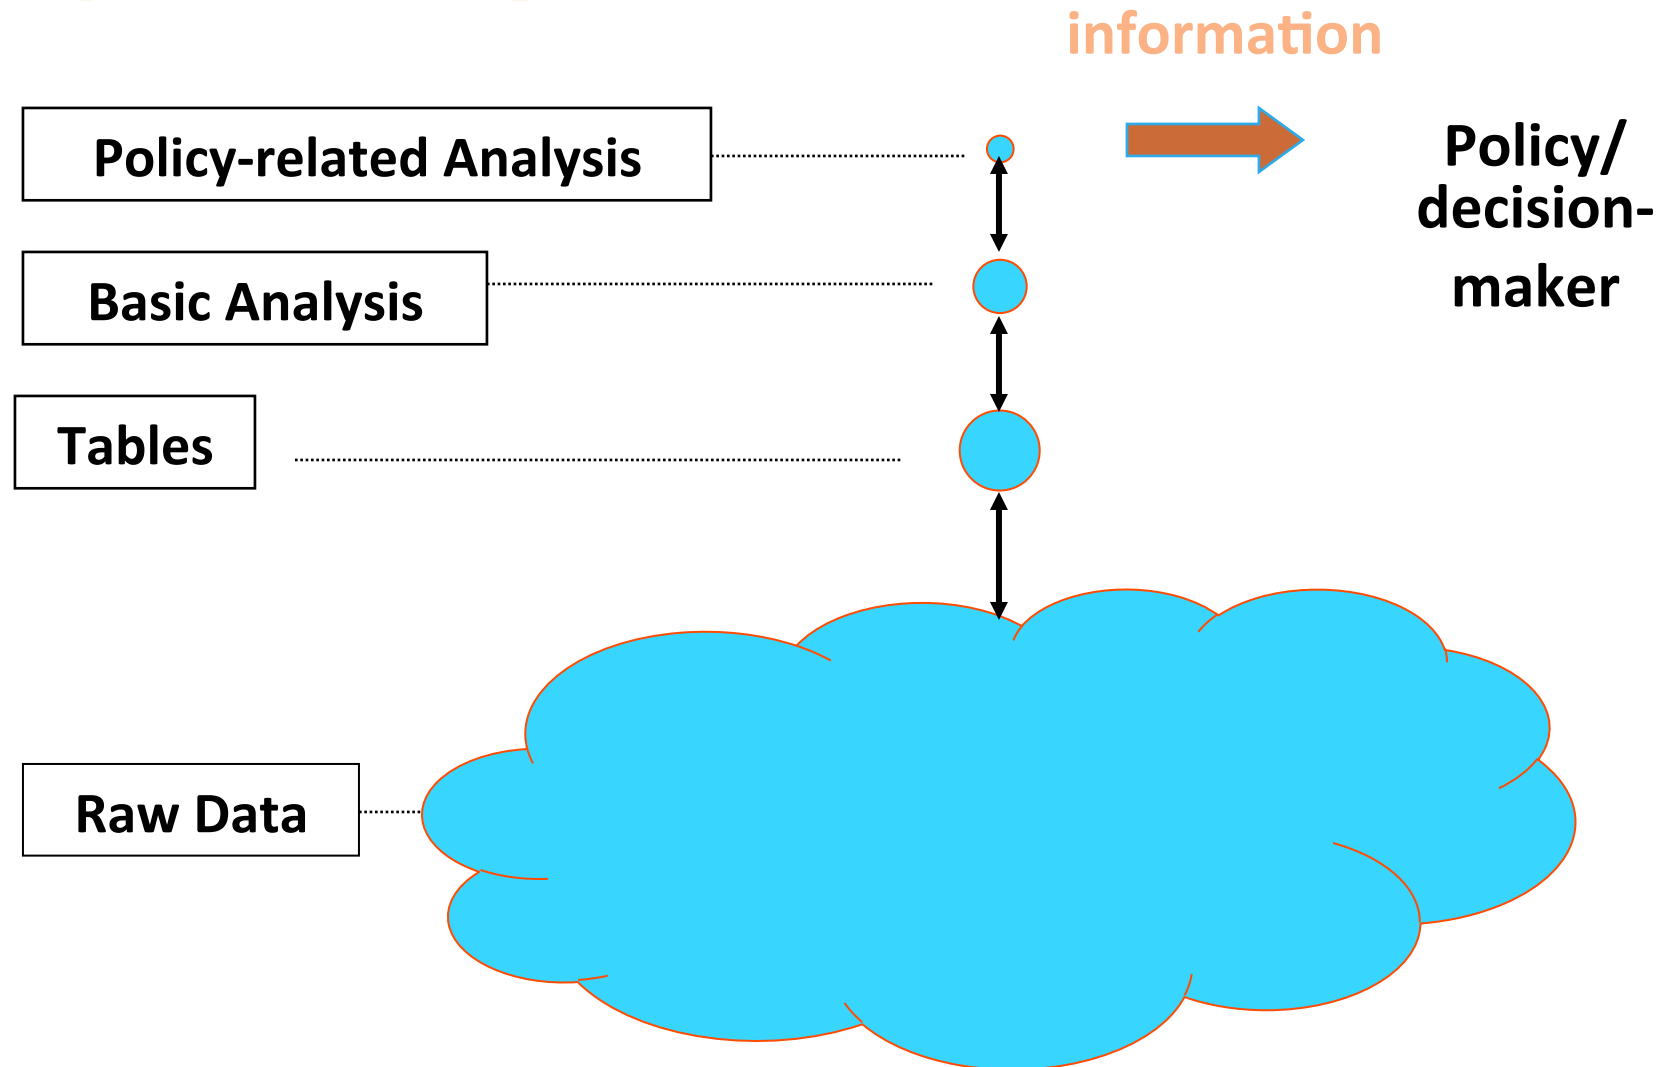

Ensure that data connects to decision-making and meets user needs

Ensure that data is interoperable and harmonized

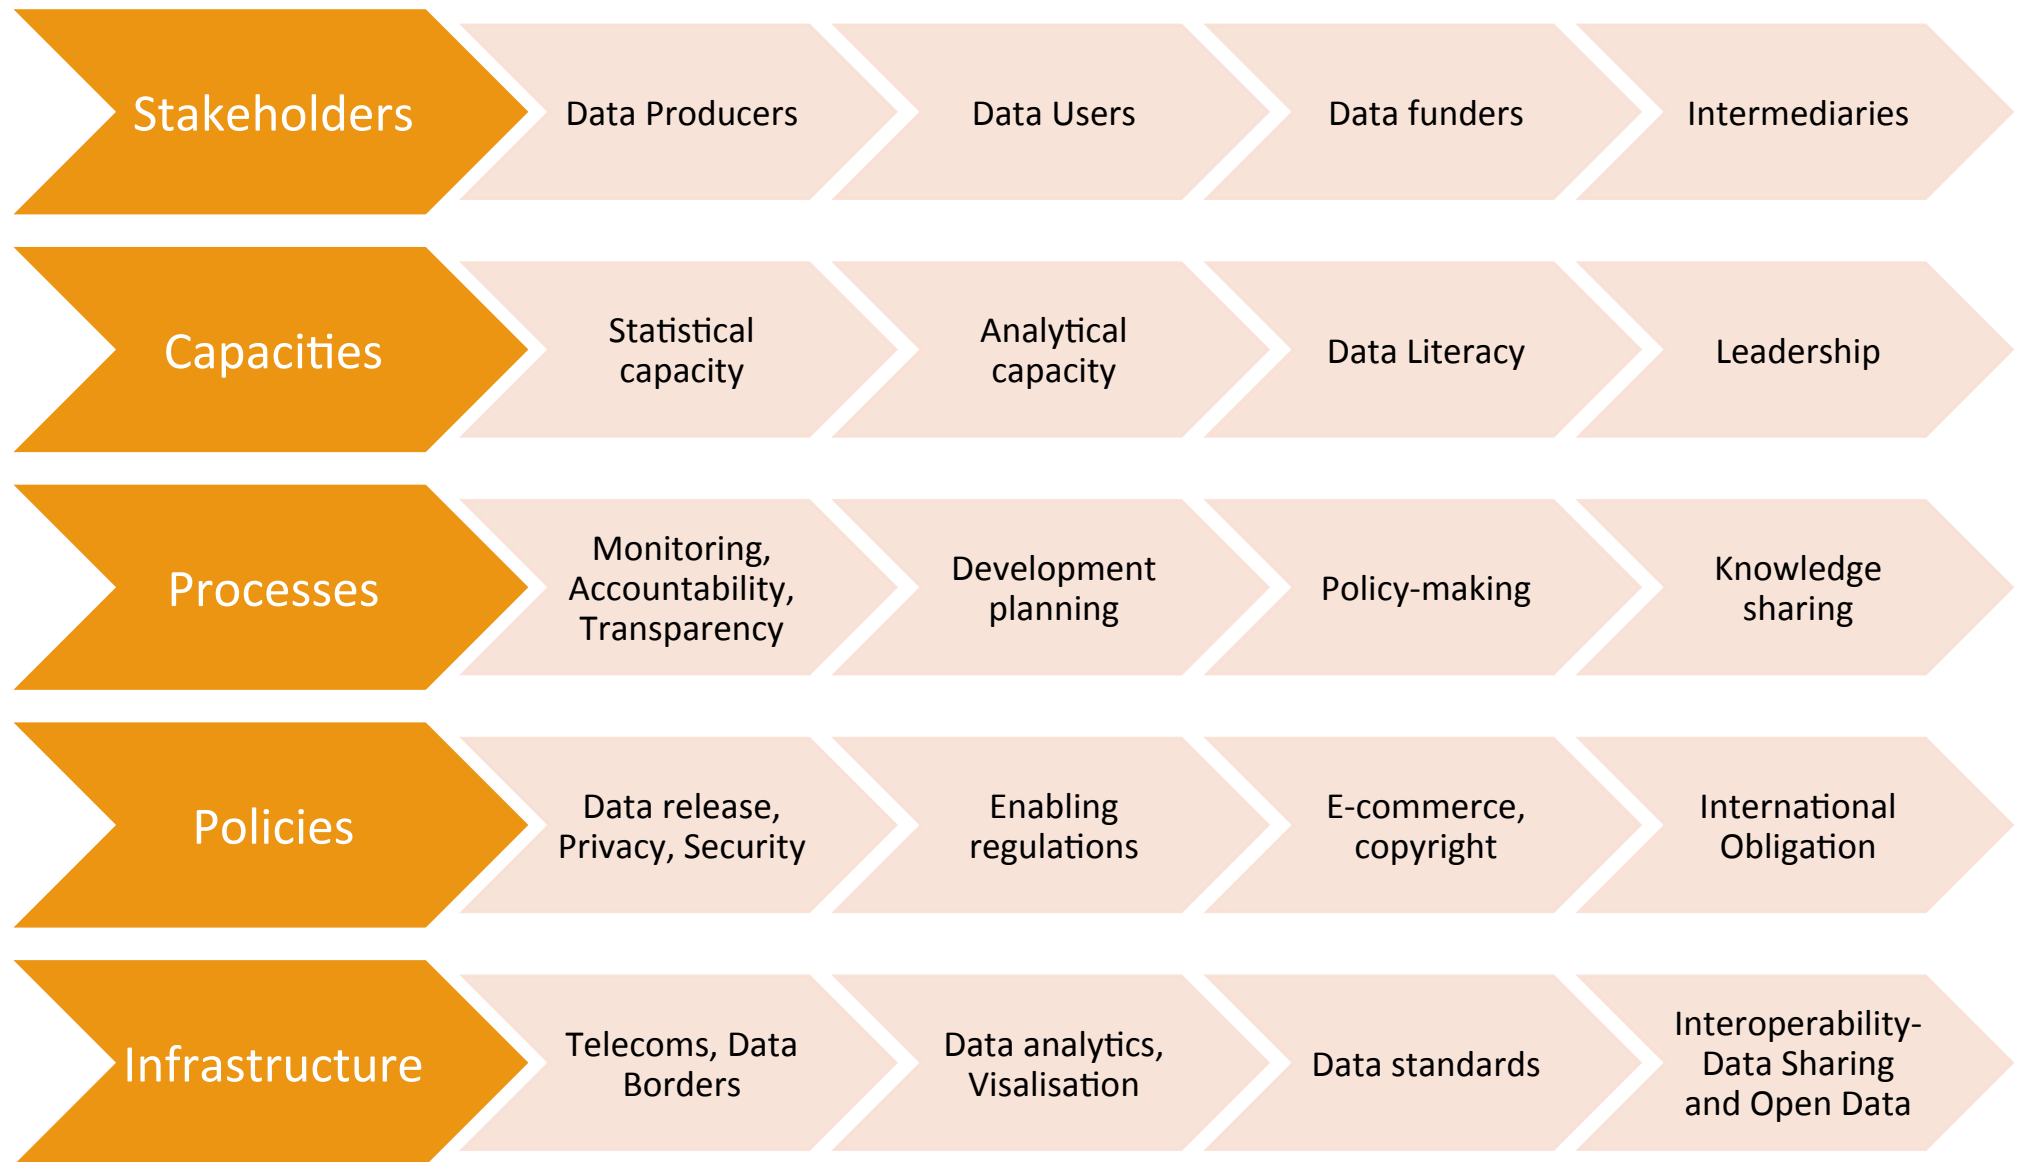

Increased Production of Policy-Related Information

Sub-optimal use of existing data

Strengthening the Data Ecosystem

Over the coming years, we will need to...

- Map, understand and interact with the actors in the data ecosystem and have clear roles and responsibilities
- Enhance existing capacity and build new ones
- Devise processes that reach across government agencies and beyond
- Evolve the policy and enabling environment
- Take advantage of existing infrastructure and build new ones where required
- Establishing data quality assurance framework

Summary

Thank You
