Producer Price Inflation Rate Increased to 27.8% in March 2014

The Producer Price Index

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the producer price indices with reference to September 2006, the base period. This release shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of March 2014 are provisional, and are subject to revision when additional data become available. All other indicators are final.

March 2014 Producer Inflation

The Producer Price Inflation rate for March 2014 was 27.8 percent. This rate indicates that, between March 2013 and March 2014 (year-on-year), the PPI changed by 27.8 percent, representing an increase of 0.7 percentage points in producer inflation relative to the rate recorded in February 2014 (27.1%). The month-on-month change in producer prices between February 2014 and March 2014 was 3.1 percent (Table 1).
