## **HIGHLIGHTS FOR APRIL 2014**

### **Producer Price Inflation Rate Increased to 31.5% in April 2014**

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers for the production of their goods and services. The PPI for Ghana reports the producer price indices with reference to September 2006, the base period.

This release shows the producer price changes since September 2006, as well as the annual (year-on-year) and monthly inflation rates, for all industry and three major sub-sectors of industry (Mining and Quarrying, Manufacturing, and Utilities) for the last twelve months. The figures for the month of April 2014 are provisional, and are subject to revision when additional data become available. All other indicators are final.

The Producer Price Inflation rate for April 2014 was 31.5 percent. This rate indicates that, between April 2013 and April 2014 (year-on-year), the PPI changed by 31.5 percent, representing an increase of 3.7 percentage points in producer inflation relative to the rate recorded in March 2014 (27.8%). The month-on-month change in producer prices between March 2014 and April 2014 was 2.7 percent.

In April 2014, the producer price inflation in the Mining and Quarrying subsector increased by 10.7 percentage points over the March 2014 rate of 14.5 percent, to record 25.2 percent in April 2014. Manufacturing, which constitutes more than two-thirds of total industry, increased by 2.7 percentage points to record 27.7 percent. The rate for the Utilities sub-sectors increased marginally to record 56.5 percent in April 2014.

During the 12-month period (April 2013 to April 2014), the highest year-on-year inflation rate of 31.5 percent for all industry was recorded in April 2014. Between April and August 2013, the rate declined continuously to record the lowest rate of 4.7 percent in August 2013. In September 2013, however, the rate inched up to record 5.8 percent. Subsequently, the producer price inflation rate has increased consistently over the last seven months to record 31.5 percent in April 2014; this rate is the highest since January 2010.

During the month of April 2014, five out of the sixteen major groups in the manufacturing sub-sector recorded inflation rates higher than the sector average of 27.7 percent (Fig. 2). Manufacture of machinery and equipment n.e.c. recorded the highest inflation rate of 76.0 percent whilst producer prices in the manufacture of electrical machinery and apparatus n.e.c. recorded the lowest inflation rate of -0.7 percent over the one year period.
