## Main points

- Ghana provisional real Gross Domestic Product (GDP) in volume terms was estimated to have increased by 3.2% in quarter two (April to June) of 2023 compared to the same period in 2022.
- When seasonally adjusted, Ghana real GDP increased by 0.7 % in quarter two (April to June) of 2023; a 0.1 percentage point lower than what was recorded in quarter one (January to March) of 2022.
- Information & Communication, Mining and Quarrying, Fishing, Health, Livestock, Crops, Public Administration, Defense & Social Security, Transport

and Storage were the main drivers of GDP growth for the second quarter of 2023.

- Main sub-sectors with more than 10 percentage expansion in quarter two of 2023 are:
  1. Information & Communication (26.4%)
  2. Fishing (12.2%)
  3. Health & Social Work (11.0%)
  
- Six sub-sectors contracted in quarter two of 2023. These are:
  1. Construction (-11.7%)
  2. Wholesale and retail trade; repair of motor vehicles and motorcycles (-5.3%)
  3. Electricity (-5.1%)
  4. Forestry (-4.2%)
  5. Water Supply, Sewerage, Waste Management & Remediation Activities (-3.3%)
  6. Manufacturing (-0.5%)

### **Things you need to note about this release.**

Gross Domestic Product (GDP) growth is the main indicator of economic performance. There are three approaches used to measure GDP: the output approach, the expenditure approach, and the income approach.

This Statistical Release contains independently compiled quarterly estimates of the Gross Domestic Product (GDP) for the 2<sup>nd</sup> quarter of 2023 using the production approach. The estimates are based on the 2008 System of National Accounts (SNA), the International Standard Industrial Classification (Rev.4) published by the United Nations, and the Quarterly National Accounts Manual: Concepts, Data Sources and Compilation prepared by the International Monetary Fund (IMF). This means that the methodology, concepts, and classifications are in accordance with the guidelines and recommendations of an internationally agreed system of national accounts. The estimates of real GDP are expressed in terms of the base year, 2013. The Annual GDP estimates are derived independent of the quarterly estimates. Short-term indicators are used to estimate the quarterly GDP (see IMF's Quarterly National Accounts Manual: Concepts, Data Sources and Compilation) and benchmarked to the annual GDP.

**Current or Nominal GDP** is the value of final goods and services evaluated at current quarter prices.

**Constant or Real GDP** is the value of final goods and services evaluated at base year prices. In Ghana, the base year is 2013. By using the prices from the base-year

(or holding prices constant over time), we eliminate the impact of rising prices on GDP to get a measure of “Real” economic activity.

### **Seasonal Adjustment**

The quarterly value added, and GDP estimates have been seasonally adjusted. Seasonal adjustment is the process of estimating and removing seasonal effects from time series to reveal non-seasonal features. This process is to provide a clearer view of short-term movements and trends and to allow early identification of turning points.

### **Revision Policy**

While most revisions are made to the four most recent quarters of the series, there is no restriction on when an estimate of the quarterly series for a given period can be revised. The main causes of revisions are as follows:

- a) Incorporation of additional and improved data: Most revisions reflect the incorporation of a wider range of data. Some data that was not available at the release date are incorporated through revisions into subsequent releases.
- b) Reconciliation of quarterly and annual measures: The process of reconciling the quarterly measures with the annual measures can lead to further revisions. The quarterly measures of these series are based on a smaller range of data than the annual measures.
- c) The rebased provisional quarterly GDP estimates may be revised further and finalized based on the availability of additional data. The next revision of the quarterly and annual GDP estimates will be done in September 2023.
