Definitions and Measurements

Consumer Price Index (CPI) measures changes in the price of a fixed basket of goods and services purchased by households.

Consumer price inflation is the rate at which the prices of goods and services bought by households rise or fall. It is measured as the percentage change in the CPI between two periods.

Inflation is measured monthly using data on prices of **307** items in the CPI basket purchased by households from **57** markets with **8,337** outlets. The items are ordered into **13** Divisions, **44** Groups, **98** classes, and **156** sub-classes.

The **weight reference** period is 2017 but the **price reference** period has been updated to 2021 ($2021=100$) to incorporate the 6 new regions.

Inflation is reported as end-of-period or average:

End-of Period (eop) inflation could be year-on-year (YoY), quarter-on-quarter (QoQ) or month-on-month (MoM); and
Average inflation is usually reported as annual average.

Recent Innovations to CPI/Inflation Release

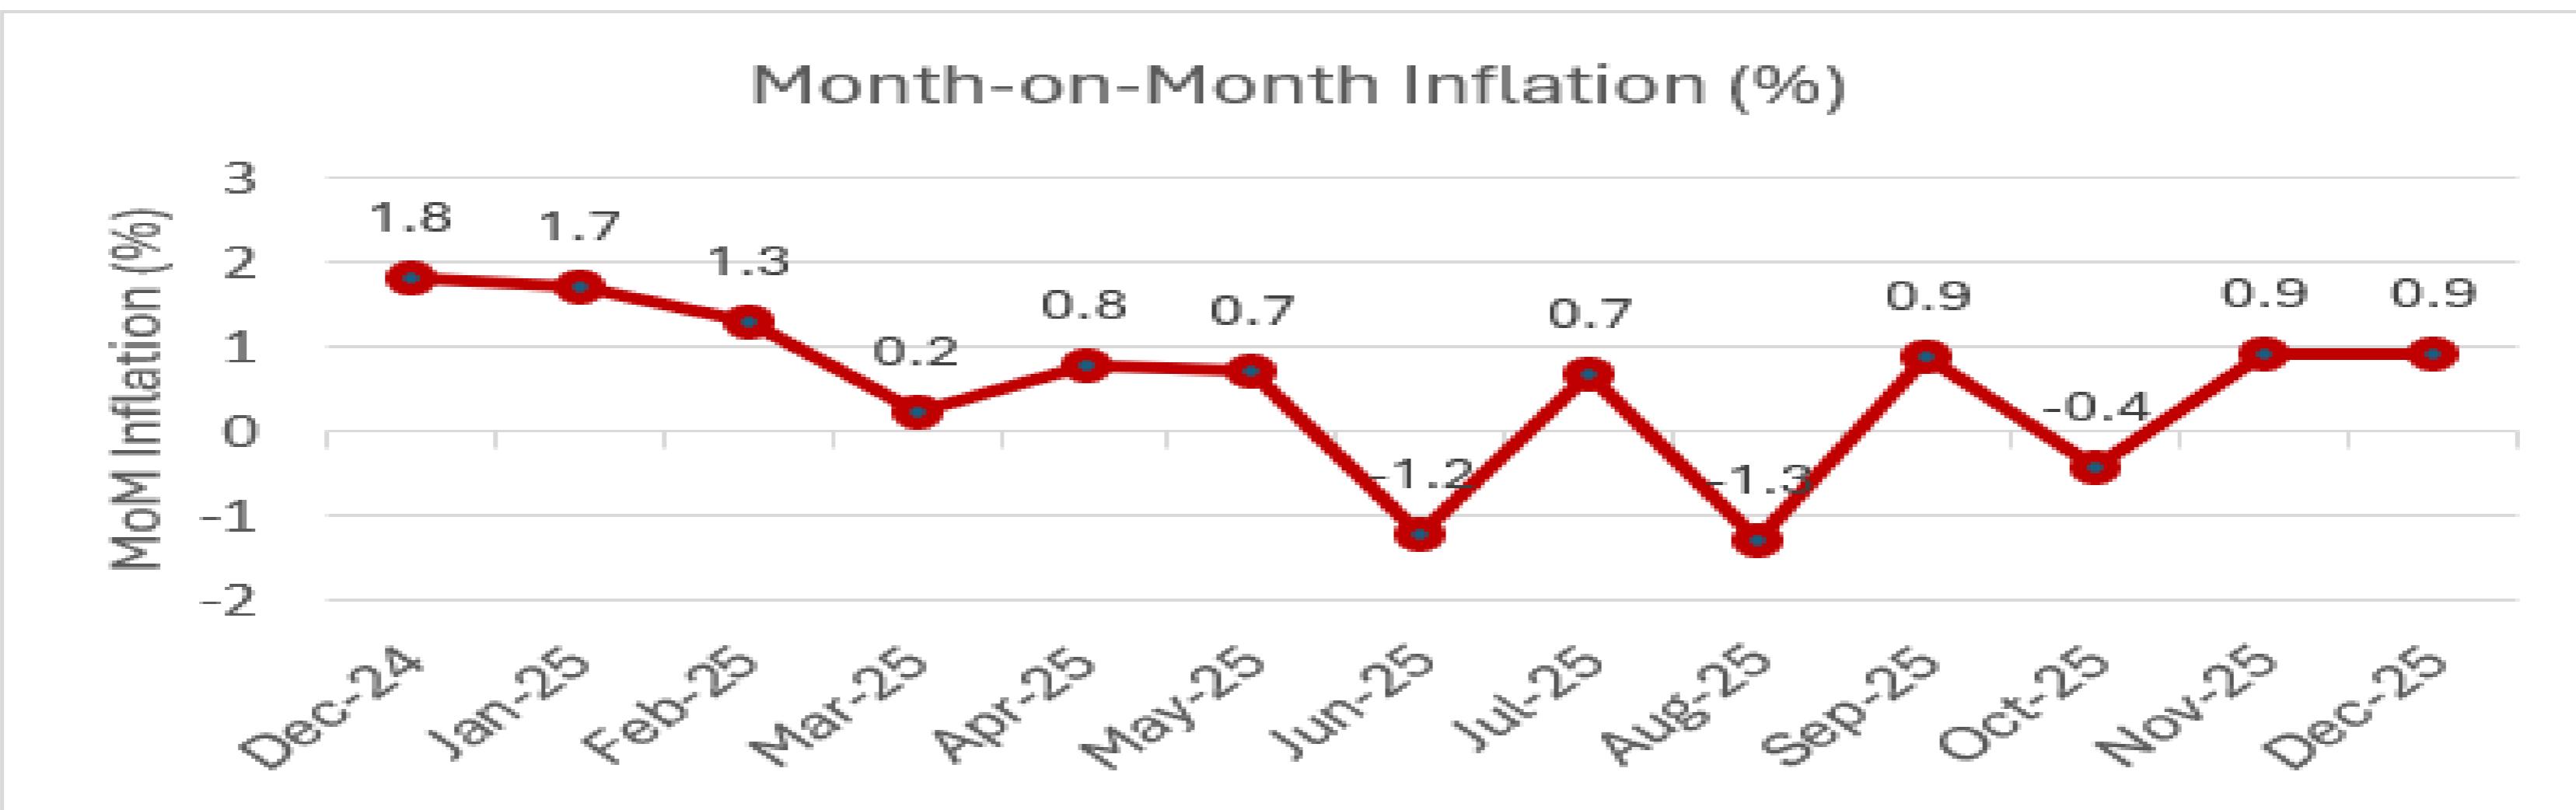

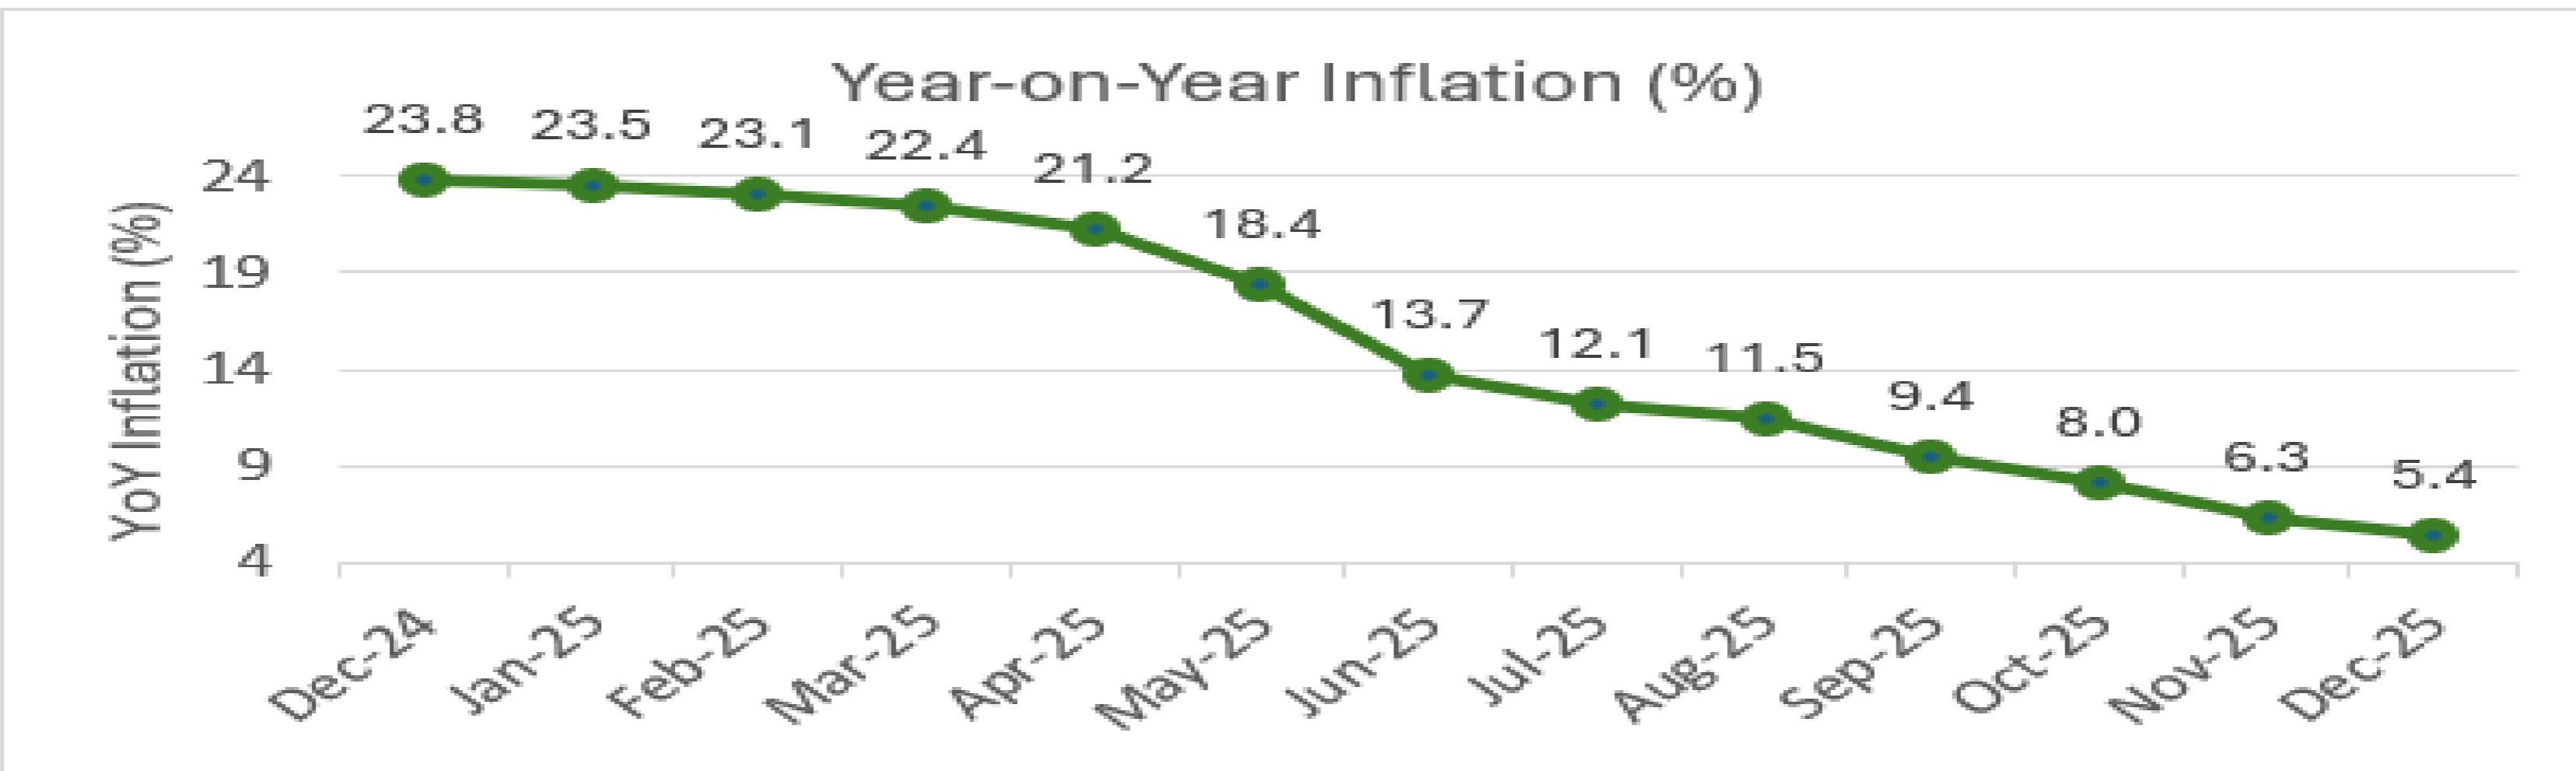

1. Reports on decomposition of Inflation into **Goods** and **Services** to provide targeted insights into the structure and drivers of inflation.
2. Reports on ***Annual Average Inflation*** Data to complement End-of-Period Inflation data.
3. Reports on ***Contributions to inflation*** to assess the drivers of inflation.
4. Provides **Infographics** on CPI/Inflation to turn the release into clear, visual insights that make price trends easy for everyone to grasp.
5. Includes a section on ***Recommendations*** to help translate the data into practical actions for policymakers, businesses, and households.

Highlights of December 2025 CPI and Inflation (1)

1. The CPI for Dec 2025 was **261.7** up from 248.3 in Dec 2024 translating into a Year-on-Year (YoY) inflation of **5.4%** for Dec 2025.
2. This means that on the average, the price of goods and services increased by **5.4%** between Dec 2024 and Dec 2025.
3. The Month-on-Month (MoM) inflation rate for Dec 2025 was **0.9%**, meaning that the general price level increased by **0.9%** between Nov and Dec 2025.
4. The Dec 2025 YoY Inflation is:
 - i. the **12th** consecutive drop in inflation;
 - ii. the **lowest** inflation since price rebasing in 2021;
 - iii. **0.9 ppts drop** from the Nov 2025 inflation of **6.3%**; and
 - iv. **18.4 ppts drop** from the Dec 2024 inflation of **23.8%**.
5. The steady drop in inflation from **23.8%** in Dec 2024 to **5.4%** in Dec 2025 shows a sustained shift in prices that signals Ghana is firmly on the path to macroeconomic stability.

Key Takeaways

1. Ghana's ***inflation dropped to 5.4%*** in Dec 2025, down from **6.3%** in Nov 2025 and below the **23.8%** recorded in Dec 2024 by **18.4 ppts**. This is the **lowest rate** since rebasing in 2021 and the 12th straight month of decline.
2. ***Overall prices increased by 0.9%*** between Nov and Dec 2025.
3. ***Food inflation fell to 4.9%*** in Dec 2025, down from **6.6%** in Nov 2025. Food prices increased by **1.1%** between Nov and Dec.
4. ***Non-food inflation eased to 5.8% in Dec 2025 from 6.1% in Nov 2025.*** Non-food prices, however, rose **0.6%** month-to-month.
5. ***Inflation for goods slowed to 5.8% in Dec 2025 from 7.3% in Nov. However,*** goods prices increase by **0.8%** month-to-month. Since goods account for nearly ¾ of the CPI basket, the slowdown in goods inflation is a relief for consumers where it matters most.
6. ***Services inflation rose to 4.5% in Dec 2025 from 3.8% in Nov 2025.*** Month-on-month services increased by **0.9%** between Nov and Dec 2025.
7. ***Inflation for locally produced items fell from 6.8% in Nov 2025 to 5.9% in Dec 2025,*** while the prices for ***imported items*** decreased from **5.0% to 4.3%**.
8. Sharp regional differences persist as Inflation is uneven across the country. ***Eastern Region recorded the highest rate at 11.2%, while Savannah had the lowest at -1.2%.*** Local supply, transport costs, and market access could be driving these gaps.

Recommendations

BUSINESSES

With inflation easing, businesses now have room to:

- invest in efficiency;
- strengthen local supply chains;
- reduce inefficiencies and unnecessary costs; and
- translate savings into more stable prices for consumers.

HOUSEHOLDS

- With inflation easing, families can plan their budgets with greater confidence.
- This is the time to track spending on food, rent, and school fees, avoid non-essential expenses, and set aside small savings whenever possible to strengthen household finances

GOVERNMENT

- Stay the course on fiscal discipline;
- sustain efforts to stabilize food prices; and
- target investments in storage, irrigation, transport, and market access to reduce regional disparities.
