**Reviewed by:** Anthony Amuzu (Deputy Government Statistician, Operations)

**Chief Editor:** Baah Wadieh (Acting Government Statistician)

## **PREFACE AND ACKNOWLEDGEMENT**

The Integrated Business Establishment Survey (IBES) is an economic census cutting across all the three major sectors of the Ghanaian economy. The IBES is structured in two phases IBES I and II. The second Phase of IBES II started in earnest after the completion of the first when the sampling frame of establishments became available. While IBES I focused on collecting and collating basic but detailed data on establishments' location, employment, and other characteristics, the second phase IBES II focused on collecting and producing statistics on the operations of the non-household businesses in the country. Compared to the previous industrial censuses conducted in 1962, 1978, 1987 and 2003 which focused only on the industry sector, IBES is the first non-household economic census covering all sectors of the economy, institutional agriculture, industry and service. In addition to producing the requisite data for rebasing the country's Gross Domestic Product, IBES II collected relevant data which are published in this summary report and other reports to inform business and other policy decisions.

This report summarizes the findings of IBES II which was conducted in 2015, with 2013 being the reference period for the data collected. The report presents findings at the sector and sub-sector levels in all the relevant subject matter areas including employment, compensation of employees, receipts and revenues of businesses in Ghana, as well as cost incurred by firms during the production of goods and services. Aside the public and private sector policy makers who will need this report for their policy decisions, researchers, students, and the international community, may use of the IBES II summary report as a reliable source of information on non-household establishments in Ghana.

The Ghana Statistical Service (GSS) expresses its appreciation to the Government of Ghana, the Dutch Government, UK-DFID and the World Bank for providing the financial assistance for IBES. We also wish to thank the Ministry of Trade and Industry for providing both technical and financial support. We appreciate the technical assistance provided by the following organizations during the execution of the project: namely, National Board for Small Scale Industries (NBSSI); United Nations Development Programme (UNDP); United Nations Industrial Development Organization (UNIDO); Ministry of Roads and Transport; Ghana Employers Association (GEA); Association of Ghana Industries (AGI); Ghana National Chamber of Commerce and Industry

(GNCCD); National Insurance Commission (NIC); Private Enterprise Federation (PEF); Minerals Commission; Ghana Tourist Board (GTB); National Communications Authority (NCA); Ministry of Employment and Labour Relations (MELR); and the Institute of Statistical, Social and Economic Research (ISSER), Legon.

We appreciate all the sampled establishments that provided the required data which has made it possible to complete IBES II. Also, the GSS acknowledges the efforts of all officers and field staff who worked tirelessly to ensure that IBES II was successful.

# EXECUTIVE SUMMARY

## Background

The Integrated Business Establishment Survey (IBES) is an economic census conducted on the full set of economic units across all sectors of the Ghanaian economy. It was conducted to provide reliable, timely and relevant economic statistics to support the formulation and implementation of policies and strategies that can stimulate the growth of all sectors of the economy. The IBES is the first economic census in Ghana which provides information on the structure and performance of all the sectors of the economy in addition to regional comparisons. The report summarizes the findings of the second phase of the IBES (IBES II) which was conducted in 2015 with 2013 as the reference period.

## Response rate

IBES II recorded a response rate of 78.2 percent. This implies that, out of the total sample of 31,152 establishments that was surveyed, as many as 24,400 agreed to be part of the survey.

## Revenue, cost of production of goods and services, and gross profit of businesses

The total amount of revenue generated by the three sectors is GH¢457 billion. Much of the revenue (GH¢318.4 billion representing 69.7 percent) was generated by the Services sector. The Industry sector generated GH¢133.1 billion which is 29.1 percent of total revenue while revenue from Institutional Agriculture is GH¢5.4 billion, representing 1.2 percent. The services sector accounts for 70 percent of the total gross profit generated by non-household businesses in the country. However, gross profit margin among the three sectors is relatively close ranging between 62 and 66.

With respect to size, 32.1 percent of the total revenue (GH¢146.6 billion) was earned by the small-sized establishments and more than one-quarter (29%) of the total revenue, amounting to GH¢132.4 billion was generated by the large-sized establishments. The least revenue (GH¢80.9 billion) was earned by the micro-sized establishments.

The total annual production cost of goods and services for all sectors amounted to GH¢167.5 billion. Out of this, 58.3 percent was for materials and supplies, 25.4 percent for other operating expenses, 8.0 percent for goods purchased for resale and 6.0 percent for fuel purchased. The remaining 2.1 percent was for electricity, water and other purchases made.

The Service sector incurred the highest costs of production, accounting for a little over three-quarters (GH¢127.1 billion) of the total cost followed by the Industry sector which incurred about one-fifth (22.6%) of the total cost.

The production cost of large-sized establishments was the highest: this accounted 27.5 percent of the total cost.

## Capital formation

The data generated from the survey suggest that the estimated stock of assets as at the end of the reference period was GH¢172.9 billion. The Industry sector's total asset is GH¢107.8 billion, which constitutes 62 percent of the total assets. In terms of regional contribution to total assets,

establishments located in the Greater Accra region held majority of the assets amounting to GH¢140.3 billion, which translates to 81.1 percent of the total assets.

There was a total of GH¢30.1 billion addition of assets to already existing assets, 99 percent of which are tangible assets, whereas a total of GH¢20.2 billion worth of assets were disposed. The Greater Accra region's additions to fixed assets was 88.7 percent of total additions as compared to the other regions. Most assets that were purchased by establishments were machinery and equipment (GH¢16.8 billion) out of the total of GH¢30.1 billion purchased assets.

### **Inventories/stocks**

Total value of inventory for all establishments is GH¢37.4 billion of which GH¢18.7 billion, representing 49.9 percent was in the Services sector. About GH¢18.6 billion, representing 49.7 percent, is found in the Industry sector and the remaining GH¢118.1 million, representing less than one percent is in the Agriculture sector (Institutional Agriculture).

The Industry sectors reported on all the types of stock while the Agriculture and the Service sectors did not keep stocks for fuel, finished goods and work in progress. The Service sector had more than half of its stocks as raw materials and supplies (GH¢12.9 billion), representing 56 percent of all the stocks while industry accounts for 44 percent.

### **Employment and compensation of employees**

A total of 3,102,917 persons were engaged by establishments of which 74.6 percent (2,314,309 persons) were engaged by the Services sector, 23.7 percent (734,341 persons) by Industry and 1.7 percent (54,267 persons) by Institutional Agriculture sector. Of the total persons engaged, 58.8 percent (1,823,070 persons) were employees.

A vast majority (94.3%) of the Institutional Agricultural workers (54,267 persons) were engaged by the Crop and animal production, hunting and related service activities sub-sector. Also, 77.7 percent (570,327 persons) of persons engaged by the Industry sector worked in the Manufacturing sub-sector. Within the Services sector, about one-third (33.6%) of persons engaged, were found in the wholesale and retail trade sub-sector.

Small-sized and micro-sized establishments together, engaged 71.4 percent of the total workforce while the large-sized establishments engaged 16.6 percent. Generally, relatively high proportions of employees worked in large-sized establishments. Of the 3,102,917 persons engaged, 1,115,768 representing 36 percent worked in establishments located in the Greater Accra region, 16.9 percent in the Ashanti region while 10.3 percent worked in establishments located in the Western region.

Total compensation paid to employees amounted to GH¢30.4 billion. Wages and salaries paid to employees was about GH¢28.7 billion, representing 94.4 percent of total compensation to employees. Overall, about GH¢1.0 billion was paid by employers to their employees as social security contributions, which formed 3.4 percent of the total compensation to employees. Other supplements to wages such as end of year bonuses, personal insurance, medical schemes, etc. amounted to about GH¢666.6 million which is 2.2 percent of the total compensation to employees.

As much as GH¢17.1 billion, representing 60.1 percent of total wages and salaries was paid to employees in the Services sector and about two-fifth (39.3%) of total wages and salaries, was paid to those who worked in the Industry sector. More than 60 percent of total wages and salaries were received by employees who worked in large-sized establishments.

As much as 45.9 percent of all wages and salaries was paid to employees in the Greater Accra region, 37.1 percent paid to employees in the Western region, while only 6.2 percent (GH¢1.8 billion) was paid to employees in the Ashanti region.

### **Comparative Analysis of a Decade of Industry Sector Performance**

Over the last decade, the total number of establishments in the sector more than quadrupled and this growth was largely driven by the manufacturing sub-sector. While the total number of persons engaged more than tripled, there was not a corresponding growth in the number of employees in the sector over the 10-year period. This brings to question the quality of growth in the number of establishments in the Industry sector that was recorded during the period. Thus, many of the new establishments in the sector may not be employing many people either because they are micro or small-sized firms.

Wages and salaries on the other hand grew by 1886 percent in dollar terms. However, total turnover grew by 838.6 percent while direct material cost of production grew by 951.7 percent. The relative increase in wages, accompanied by hikes in operational cost of production over the ten years, juxtaposed with relatively moderate growth in turnover, could explain the stagnating performance of the Industry sector over the ten-year period.

# **CHAPTER ONE**

## **BACKGROUND**

### **1.1 Introduction**

The Integrated Business Establishment Survey (IBES) is an economic census conducted on the full set of economic units across all sectors of the Ghanaian economy. It is structured into two phases. Phase I provided the framework for the implementation of the second phase which involved the collection of detailed information on the operations of business establishments.

Since 1962, a number of nationwide firm-level censuses have been conducted to provide some intuition into the performance of the industry sector in the country. These surveys, however, have not provided information on changes in the structure of the entire economy but only the industry sector over time. The IBES which is the first economic census in Ghana provides information on the structure and performance of all sectors of the economy. Such economic data and other data sources are required to monitor the achievements of Ghana's Shared Growth and Development Agenda (GSGDA), the AU Agenda 2063 and the Sustainable Development Goals (SDGs). This report summarizes the findings of IBES II which was conducted in 2015. The reference period for the survey is 2013. The report presents findings at the sector and sub-sector levels, in all the relevant subject matter areas including employment, compensation of employees, receipts and revenues of businesses in Ghana, as well as cost incurred by firms during the production of goods and services. The report also provides critical economic indicators to inform the size of the economy. The contribution of each of the regions and businesses, categorized by size, to the economy and other critical variables have also been examined to bring to the fore the role of the different actors in the determination of value addition to the economy.

### **1.2 Economic censuses and surveys in Ghana**

The first Industrial Census in Ghana was conducted in 1962 by the Central Bureau of Statistics, now the Ghana Statistical Service. The census was an enumeration of all establishments in the Mining and Quarrying, Manufacturing, Construction, Electricity and Distributive Trade sub-sectors. In 1964, annual and quarterly surveys of establishments engaging 30 or more persons were introduced.

The second Industrial Census was carried out in 1987 and was implemented in two phases: the first phase covered the period November-December 1987 and the second took place in October-December 1988, with 1987 as the reference year. The first phase of the census aimed at obtaining basic information on the establishments engaged in Mining and Quarrying, Manufacturing and the Production and Distribution of Electricity and Water, while the second phase covered all in-scope establishments engaging 10 or more persons.

The third Industrial Census, which was conducted in 2003, was also in two phases: the first phase was held from October to November, 2003 and the second covered the period November 2004-March 2005, with 2003 as the reference year. The first phase of the census collected basic information on the establishments engaged in Mining and Quarrying, Manufacturing, Construction and the Production and Distribution of Electricity, Gas and Water. The second

phase covered a certainty sample of 4,900 establishments comprising of all Manufacturing establishments engaging more than 10 persons, all establishments engaged in Mining and Quarrying, Electricity and Water and Construction, and an uncertainty sample of 1,120 establishments which was a 5 percent sample of Manufacturing establishments engaging less than 10 persons.

A total of 31,152 establishments were sampled for phase II of Integrated Business Establishment Survey (IBES), with 6,014 establishments sampled with certainty for all the sectors.

### **1.3 Objectives of the census**

The overall objective of the IBES was to provide reliable, timely and relevant economic statistics to support the formulation and implementation of policies and strategies to stimulate growth in all sectors of the economy. The specific objectives were to:

- Obtain data on production as a basis for government and business analysis and decision-making;
- Measure the contribution of each sector and region to Ghana's production;
- Provide benchmark data for rebasing, revising and updating the GDP, GSS annual surveys of Industry and other economic series; and
- Provide the critical data needed to estimate and re-base the gross value added for all sectors in the Ghanaian economy.

### **1.4 Scope and coverage**

Phase II of IBES covered a representative sample of establishments covering the different economic sectors namely Agriculture, Industry and Services at both national and regional levels. All establishments engaging 50 or more persons were included in the sample with certainty. However, for establishments engaging less than 50 persons a representative sample was drawn to be included in the sample.

The target population in this survey was all non-household establishments, irrespective of size and sector of activity. These are establishments that are engaged in economic activities across all the sectors of the economy. They were sampled from the sampling frame produced from IBES I.

### **1.5 Reference year**

The reference year was the calendar year 2013. However, reporting on a fiscal year was accepted provided the fiscal year included at least six months of the 2013 calendar year.

### **1.6 Legislation and Confidentiality**

The census was conducted under the Statistical Service Law, 1985 (PNDC Law 135), which empowers the Government Statistician to conduct the economic census and allows entry into premises of businesses to ask questions. All census information were kept confidential in accordance with the law and all census officers took an oath of secrecy prior to data collection.

## **1.7 Institutional Arrangements**

The GSS was the lead implementing institution. To ensure wider participation and collaboration of relevant stakeholders with rich and varied experiences, a number of national committees were set up to facilitate the smooth implementation of the IBES. A National Steering Committee (NSC) was formed and was chaired by the Minister of Trade and Industry. Other members were the Government Statistician and two other senior officers from Ghana Statistical Service (GSS), the Minister for Finance, Minister for Food and Agriculture, representatives of the National Board for Small Scale Industries (NBSSI), Association of Ghana Industries (AGI), Development Partners, Ministry of Finance (MoF), the Institute of Statistical, Social and Economic Research (ISSER) and the National Development Planning Commission (NDPC).

A Technical Advisory Committee (TAC), chaired by the Government Statistician was also set up with membership from the Ministry of Trade and Industry (MoTI), the Ministry of Water Resources, Works and Housing (MWRWH), Ministry of Road Transport, Ministry of Food and Agriculture, Ghana Employers Association (GEA), Ghana National Chamber of Commerce and Industry (GNCCI), Association of Ghana Industries (AGI), National Insurance Commission (NIC), Private Enterprise Federation (PEF), Minerals Commission, Ghana Tourist Board (GTB), National Communications Authority (NCA) as well as a Representative of Development Partners.

Finally, a Project Implementation Team (PIT) was set up in GSS and was responsible for the technical preparation and execution of the census, with a Project Secretariat that provided logistical support to the three national committees.

## **1.8 Funding**

IBES II was jointly funded by the Government of Ghana and the Ghana Statistics Development Project (GSDP), the funds of which were provided by the Governments of Ghana, United Kingdom and the Netherlands, and managed by the World Bank.

## **1.9 Organization of the Report**

The report is organized into five chapters. Chapter one, the introduction, provides a background to the project. In chapter two, the survey methodology is outlined including the survey design, sampling techniques and procedures. Chapter three discusses key findings of the survey and provides analysis for key economic indicators while chapters four and five provide the conclusions and recommendations, respectively.

## **CHAPTER TWO**

### **METHODOLOGY**

#### **2.1 Introduction**

This chapter discusses the major steps in conducting Phase II of the Integrated Business Establishment Survey (IBES II). It introduces the source material or list from which respondents of the target population was drawn, the number of establishments surveyed, how they were contacted, and the method of data collection for this nationally representative sample survey.

#### **2.2 Phase II methodology**

##### **2.2.1 Planning and preparation**

Since this is the first time an economic census has been conducted in Ghana, the planning and preparatory activities started with a conceptualization of the process, and undertaking of advocacy among the stakeholders to solicit ideas and build support for the project. The conceptualization of IBES started in 2011, while preparatory activities for the implementation of IBES Phase II started in 2015.

The preparatory activities started with the setting up of three major committees to oversee the implementation of the project. These committees were: the National Steering Committee, the Technical Advisory Committee and the Project Implementation Committee.

During the launch of the IBES Phase I reports in Accra in June, 2015, stakeholders and the business community were sensitized on the data collection requirements. This was necessary to enable respondents give enumerators the required cooperation during fieldwork. This cooperation is critical to the success of the IBES Phase II.

##### **2.2.2 Principal survey documents**

###### **Survey questionnaire**

IBES Phase II questionnaire design began in 2014. It was based on the structure of the 2003 Industrial Census Phase II questionnaire with some modifications to cater for establishments in agriculture and service sectors other than industry. Survey instruments were drafted and a review workshop was organized to finalize the survey instruments to pave way for the field work. The data items covered by the final questionnaire comprised:

- Name of the establishment;
- Physical location;
- Contact information (postal address, email address, website address, phone number);
- Form of organization;
- Type of legal organization;
- Type of ownership;

- Employment and Earnings;
- Wages and salaries;
- Supplements to wages and salaries;
- Stocks;
- Value of fixed assets;
- Quantity and cost of principal materials purchased;
- Fuel purchased;
- Purchases of inputs and material supplies;
- Other operating costs;
- Sales and other receipts; and
- Other income.

### ***Enumerator's manual***

A field instruction manual for field personnel was prepared alongside the questionnaires. The manual which provided instructions on the administration of the questionnaires aimed at ensuring consistent application of concepts and procedures throughout the IBES.

### ***Tabulation Plan***

Table summaries of data needs were prepared alongside the questionnaire design. Dummy tables were then generated based on the tabulation plan.

### **2.2.3 Sampling design**

The sampling frame for IBES Phase II was derived from the economic census conducted during IBES Phase I, which provided the Business Register of all non-household establishments. The Business Register database contained a total of 638,480 non-household business establishments in all economic sectors. A sample of 31,152 establishments was selected from the business register representing about five percent of the total number of business establishments. This included 6,014 establishments with 50 or more persons engaged which were selected with certainty.

One of the most important aspects of the sample design for IBES II is the stratification of the sampling frame by economic activities and size. Generally, stratification was done along the activity groups and size classification. For some establishments, the smallest size category was 1 to 4 persons engaged. However, since about one-third of the establishments had only one person engaged, and such establishments have a smaller average contribution to the total economic activities, it was decided to treat this category as a separate stratum. Activities of extraterritorial organizations and bodies were excluded since these establishments are funded by other countries and obtaining financial information was going to be difficult. One hundred and one (101) important economic activity domains were identified, which were mostly defined at the two-digit ISIC level, and in a few cases at the 3-digit ISIC level. There were only 14 establishments in the Phase I frame which had activities relating to households as employers of domestic personnel

and undifferentiated goods-producing activities of private houses. These establishments were combined with the economic activity domain “Other personal services activities”.

#### **2.2.4 Strategy for determining the sample size and allocation by stratum**

The sample size for the IBES Phase II was determined by the accuracy required for the survey estimates for each domain, as well as by resource and operational constraints. The accuracy of the survey results depends on both the sampling error, which can be measured through variance estimation, and the non-sampling error, which can only be reduced with appropriate operational and quality control procedures. By ensuring an efficient stratification and strategic allocation of the sample establishments by stratum, it was possible to obtain a sufficient level of precision by domain with less than the maximum sample size of 40,000 establishments.

The overall strategy for allocating the sample establishments by the total persons engaged (TPE) size strata across all economic activities was based on a Neyman optimum allocation. The following formula for the Neyman allocation was used for calculating the approximate number of establishments to be allocated to each TPE size stratum:

$$n_h = n \times \frac{N_h \times S_h}{\sum_h N_h \times S_h}$$

where:

$n_h$  = number of sample establishments allocated to TPE size stratum h;

$n$  = total sample size allocated to all non-certainty TPE size strata;

$N_h$  = total number of establishments in TPE size stratum h;

$S_h$  = standard deviation for number of persons engaged per establishment in TPE size stratum h.

This Neyman optimum allocation assumes similar costs per interview in each size stratum. It can be seen in this formula that the optimum sample allocation to each stratum depended on the number of establishments in the sampling frame for that stratum, as well as the standard deviation for the variable being measured in the survey. The total number of persons engaged was used for calculating the standard deviation, since most of the survey estimates are correlated with employment, and data for this variable were available in the Phase I frame. It was possible to use data on the number of TPE in each establishment from the sampling frame to calculate the actual standard deviation for each stratum. The Neyman allocation by TPE size category was studied at the national level, in order to determine the initial sampling rates for each stratum. Then these initial sampling rates were adjusted for each region, activity and TPE size stratum based on the distribution of establishments in the frame by stratum.

#### **2.2.5 Response rate**

IBES II recorded a response rate of 78.2 percent. This implies that, out of the total sample of 31,152 establishments that was surveyed, as many as 24,400 agreed to be part of the survey and provided data.

### **2.2.6 Pre-test**

The survey instruments were pre-tested in the Central and Greater Accra regions in August, 2015. Based on the results of the pre-test, corrections were made to the IBES II questionnaires. In addition, the completed questionnaires were edited, coded and sent to the data processing unit of the GSS to test the data processing procedures.

### **2.2.7 Preparation for fieldwork**

#### ***Recruitment***

Advertisements were placed in both the print and electronic media for interested applicants to apply to be recruited for the field work. An application form was also posted on the GSS website for interested applicants to download and apply. Interviews were conducted in the regions, after which about 2,000 field personnel were recruited for training for the fieldwork.

#### ***Training of Trainers***

A Training of Trainers workshop was held in Winneba in September, 2015. A group of trainers consisting of officers from the ten (10) regional offices of GSS and PIT members were trained. The Trainers were trained on the nine (9) questionnaires and also assisted with the review of the questionnaires.

#### ***Training***

The main training for field personnel started from October 17 to November 8, 2015 in all the regional capitals. Field personnel were trained on the survey instruments, the purpose and background of the IBES to aid effective data collection. These survey instruments included the nine questionnaires, interviewer's manual and training guide. Lectures were supplemented with practical sessions, demonstrations and participants' involvement in mock interviews. Trainees who passed the written exams, and who also performed satisfactorily during field practice were selected to take part in the field data collection. Training of interviewers and supervisors was carried out by the Project Implementation Team (PIT) members and other GSS staff. The PIT members were mainly economist and statisticians, with substantial experience and knowledge in survey and censuses, as well as business accounting concepts.

#### ***Publicity***

In order to inform the public and the selected establishments about the IBES Phase II, a publicity programme was drawn up. A 60-second audio clip, was produced and aired in five Ghanaian languages on radio stations. In addition to the use of radio and TV, T-shirts were provided to field personnel to serve a two-fold purpose: first, to publicise the IBES and second, to serve as a form of identification for the field staff.

### **2.2.8 Field operations**

#### ***Field data collection***

Fieldwork for the IBES Phase II started on November 11, 2015 and ended on April 28, 2016. About 1,800 field workers made up of enumerators, supervisors, zonal coordinators, regional monitors (Regional Statisticians), and other field support staff were deployed to implement the data collection from all the sampled establishments throughout the country. The work of the

enumerators was closely supervised by field supervisors and zonal coordinators. The reference period for data collection was 2013.

As part of efforts to achieve the desired objectives of the IBES Phase II and for purposes of data quality assurance, a nationwide monitoring of the data collection exercise was carried out. The Project Implementation Team (PIT) was deployed to visit field staff to find out whether they were completing the questionnaires correctly based on the training provided and to ascertain the quality of the data being collected. The field monitors also used the opportunity to interact with the field teams and the RSs to resolve any issues they had regarding the administration of any of the survey instruments. Problems that were identified in one region were addressed during the monitoring exercise where necessary, collated and passed on to the other regions for their guidance.

Additionally, a critical assignment of the monitoring team was to solve all outstanding challenges regarding respondents' refusals to participate in the survey and this facilitated smooth data collection. These, collectively, resulted in the high response rate recorded in the exercise.

### ***Field editing***

Editing is an essential feature of fieldwork. Supervisors edited the completed questionnaires, correcting any errors that were detected. Supervisors also checked the completed questionnaires for completeness, consistency as well as accuracy before they were sent to the zonal coordinators. The zonal coordinators rechecked and sent the completed questionnaires to the regional offices.

### **2.2.9 Data processing**

Data processing involved data capture, verification, editing, and coding of completed questionnaires and generation of tables.

### ***Office editing coding***

The purpose of the office editing was to check the questionnaires for completeness, accuracy, and consistency before the data were captured. Editors checked the correctness of an establishment's information and principal activity to ensure that the "***Persons Engaged***" data were accurate. They also assigned codes to products and principal activities, checked employees and wage and salaries data, output and input values, stocks and delivery cost.

Challenges were mostly associated with coding of products and materials where the items were described incorrectly, and the computation of depreciation of fixed assets and inconsistent data on stock. Other challenges included the fact that some employees had no corresponding wages and salaries or vice versa; value of inputs being greater than output value, output values too high compared to inputs and total delivered cost given without quantity and average unit prices; and no stock for some of the micro and small establishments. Respondents were contacted for clarification and the questionnaires subsequently corrected before data entry.

### ***Data capturing and verification***

Data were captured by data entry personnel in the Head office. The Census and Survey Processing System (CSPro) software version 6.2 was used to capture the data, after editing teams had checked for consistency of questionnaires. An error-checking program was run through data capturing to correct data entry errors. Establishment data was verified by double data entry, after which the files were listed for checking. Verification was done, and records with errors were amended and listed again for further checking.

### ***Data cleaning***

Cleaning of the data is important since errors can occur during data collection, data entry, or editing. For this reason, there was the need to clean the errors which were likely events. When errors were statistically identified, the cleaning team referred the questionnaires involved for verification, after which calls were made to the establishments, if necessary for clarification and if possible correction. In very rare cases, imputations were done when it became obvious that there is an error, but the two processes adduced above failed.

Cleaning of the data was done independently for each of the nine questionnaires since the instruments had different structures. However, the same principles were applied to all the instruments. Cleaning was done at both micro and macro levels, with a team from the Norwegian Statistical Office providing technical support. The micro level cleaning which involved cleaning at the establishment level preceded the macro level cleaning that involved cleaning based on consistencies in the aggregated data, which were mostly in the tables.

During the micro level cleaning statistical tools such as confidence intervals, ratios, mean, and median among others were employed to avoid bias based on judgement. This was done to ensure that the data were to a large extent consistent with statistics within the stratum in which the establishments belonged, as each establishment was stratified during the cleaning into homogenous groupings based on the size of the establishment, the region, and the activity classified by ISIC. While at the macro level cleaning, inconsistencies in the tables generated led to a re-visit of the micro data to verify the error, and possibly employ the necessary procedures as spelt out above, to correct them.

### ***Tabulation and publication***

Stata software Version 12 was used to produce the working tables for tabulation review after the data files were merged. For the review, averages of variables as well as key ratios were calculated and listed for each of the sectors and sub-sectors. Establishments with outliers were singled out for further review. The errors detected were corrected. The correction involved adjusting values of some establishments or field referrals for further investigation.

Original establishment weights were adjusted using information on the status of record for each establishment covered. The adjusted weights were appended to the establishment records and final tables prepared for report writing and publication.

The IBES establishment list output tables were reviewed to ensure that majority of the large establishments were covered. The review process took longer than planned due to late responses from some establishments. The tables were reviewed to check for coherence and consistency. After the data processing and queries as well as inconsistencies had been resolved, the data were released for analysis and publication.

## **CHAPTER THREE**

### **SURVEY RESULTS**

#### **3.1 Introduction**

The economy of Ghana, typically made up of three broad sectors namely, agriculture, industry, and services, has undergone several structural and policy changes since independence. From independence in 1957, the country experienced about two decades of political instability characterized by military coups and counter-coups, the last of which occurred in 1981. During this period, there was a general decline in the economy which was quite buoyant at the time of independence. Major exports from Ghana are gold, diamonds and other metals, cocoa and wood products, along with the export of non-traditional goods. The foreign exchange earned from the export of these primary commodities could not offset imports leading to negative trade balance for the country. However, since 2010, the country's trade balance has improved with the discovery of crude oil. The major imports, on the other hand, include transport and equipment, machinery and equipment, and electrical and electronic equipment.

Following a rebasing of the economy in 2010, the Gross Domestic Product (GDP) of Ghana in 2006 was estimated at GH¢18,705 million with a per capita GDP of GH¢855.05. In 2011, Ghana started exporting oil and the economy grew substantially, recording a high growth rate of about 15 percent. This growth was however not sustained as the growth of the economy declined to 7.3 percent in 2013. The 2013 real GDP amounted to GH¢32,332 million, which was slightly higher than the 2012 real GDP outturn of GH¢30,099 million. The Agriculture Sector grew by 3.4 percent in 2013, compared with 9.1 percent growth of the Industry Sector and 9.2 percent for the Service sector. The economy recorded an average growth rate of 9.6 percent between 2010 and 2013 (2010 GDP Bulletin, GSS).

Until 2010, Agriculture was considered the most important sector of the economy with regard to its contribution to GDP and the share of the country's labour force. Prior to the rebasing of the economy, Agriculture employed about 65 percent of the labour force and contributed 48.8 percent to the GDP. After the rebasing in 2010, the Service sector overtook the Agriculture sector regarding the contribution to GDP, but the latter still maintained the lead viz-a-viz its share of the labour force it employs.

Results from the IBES II further confirms the structural dynamics of the Ghanaian economy as the Service sector still dominates in many facets. The results as captured under the sections that follow depict an economy with a buoyant Service sector, followed by the Industry sector.

#### **3.2 Trading account of businesses**

##### **3.2.1 Introduction**

This section examines trading accounts of businesses in the country for the 2013 financial year. The accounts provide detailed information on revenue, cost of goods sold and gross profit of businesses. Revenue in this survey varies from sector to sector depending on the activity level. In large and medium-sized firms within Industry, receipts from the sale of goods purchased in same condition were not included in the revenue but for every other firm it was included. Basically,

revenue is mainly made up of receipts from the main activity and other receipts as described in Section 3.3.

Cost of goods sold in the accounts is made up of direct inputs or raw materials plus opening stocks less closing stocks (change in stocks). The cost of goods sold does not include other indirect expenses such as salaries, fuel, and electricity, among others. Thus, the total cost of operation of businesses to a large extent may be higher than this.

In the accounts, gross profit is simply revenue less the cost of goods sold. This profit is important because it reflects the core profitability of a firm before overhead costs, and illustrates the financial success of a product or service.

### 3.2.2 Trading accounts of businesses by sector

Table 3.1 reveals that nationally, the Service sector has the highest gross profit (GH¢211,492.5 million) compared to the other two sectors combined (GH¢89,435.6 million). The gross profit margin which is measured as gross profit divided by total revenue is relatively similar among the three sectors ranging from 62 percent in the Agriculture sector to 66 percent in the Service sector, with Industry recording 65 percent. Similar to the gross profit, the Service sector (GH¢106,881.1million) had the highest cost of goods sold accounting for 68.5 percent of the total cost of goods sold in the country.

**Table 3.1: Distribution of revenue, cost of goods sold and gross profit by Sector**

Sector	GH¢ million			Gross profit Margin by sector (%)
	Revenue	Cost of goods sold	Gross Profit	
All Sector	456,995.90	156,067.70	300,928.10	66
Agriculture (Institutional)	5,478.80	2,104.00	3,374.70	62
Industry	133,143.50	47,082.60	86,060.90	65
Services	318,373.60	106,881.10	211,492.50	66

### 3.2.2 Revenue from production of goods and services by Sector

Figure 3.1 shows the sectoral distribution of revenue from goods and services. The total amount of revenue generated in the 2013 financial year for businesses in the country is GH¢457 billion. A greater proportion of the revenue (GH¢318.4 billion representing 69.7 percent) was generated by businesses in the Service sector. Businesses in the Industry sector generated GH¢133.1 billion which is 29.1 percent of the total revenue while revenue generated by firms in the Institutional Agriculture sector was GH¢5.48 billion, representing 1.2 percent.

**Figure 3.1: Revenue by sector**

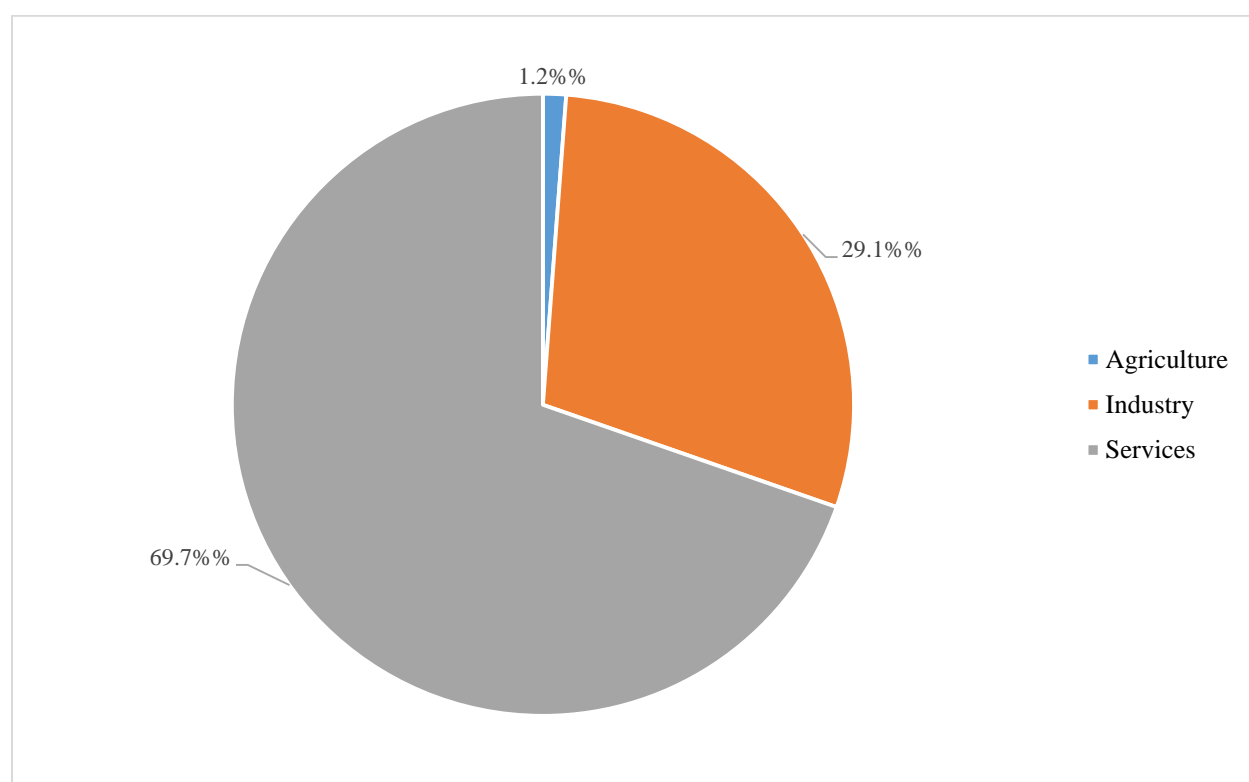

Table 3.2 shows that a significant proportion of the revenue (GH¢5.4 billion, representing 94.2 percent) generated in Institutional Agriculture was from Crop and animal production, hunting and related services activities. Out of the total revenue generated by the Industry sector, the Construction sub-sector generated GH¢53.7 billion, representing 40.4 percent. About one-third (33.8%) of Industry's revenue came from the Manufacturing sub-sector. The Wholesale and retail trade sub-sector was the major contributor to total revenue (GH¢175 billion, representing 55.0 %) for the Service sector followed by the Financial and insurance activities sub-sector (28.5%).

In terms of cost of goods sold, out of the GH¢2,104 million spent in the production of agricultural produce in the Agriculture sector, almost all (96.6%) was from Crop and animal production, hunting and related services activities subsector. In the Industry sector however, there is no dominant subsector as 54.2 percent and 35.6 percent could be attributed to construction and manufacturing sub-sectors respectively. On the hand, as much as 87.9 percent of total cost of goods sold in the Service sector was attributable to the Wholesale and retail trade and repair of motor vehicles and motorcycles.

The share of gross profit among sub-sectors in the Agriculture and Industry sectors follow similar patterns as for revenue and cost of goods sold. On the other hand, in the Service sector, the Financial and insurance activities subsector whose share of total cost of goods sold is relatively small (3.5%) compared to that of Wholesale and retail trade and repair of motor vehicles and motorcycles, had the largest share (41.2%) of the total gross profit in the sector.

**Table 3.2: Distribution of revenue, cost of goods sold and gross profit by subsector**

### 3.2.3 Regional distribution of revenue, cost of goods sold and gross profit

Table 3.3 shows the regional distribution of total revenue, cost of goods sold and gross profit. Generally, the Greater Accra Region recorded the highest value than any other region. More than two-thirds (68.3%) of the total revenue generated in all sectors was from the Greater Accra region. Ashanti region recorded GH¢51.9 billion, representing 11.4 percent share of total revenue from all sectors while Upper West region contributed the least (0.6%) to total revenue. The three northern regions put together contributed less than 4 percent of total revenue generated in the country.

**Table 3.3: Distribution of revenue, cost of goods sold and gross profit by region**

Region	Revenue		Cost of goods sold		Gross profit	
	(GH¢ million)	Percent	(GH¢ million)	Percent	(GH¢ million)	Percent
<b>All Sectors</b>	<b>456,996</b>	<b>100.0</b>	<b>156,068</b>	<b>100.0</b>	<b>300,928</b>	<b>100.0</b>

Upper West	2,527	0.6	1,165	0.7	1,362	0.5

### 3.2.4 Revenue, cost of goods sold and gross profit by size of establishment

With respect to size of establishment, 31.3 percent of the total revenue (GH¢146.5 billion) was earned by the small-sized establishments while the micro-sized establishments generated the least revenue (17.3 %).

An analysis of revenue generation within the sectors shows that the small-sized establishments within Institutional agriculture contributed more than two-fifths (45.4%) of total revenue while large-sized establishments contributed less than 10 percent. In the Industry sector, a total of GH¢57.1 billion, representing 43.5 percent of total revenue was generated by the large-sized establishments while GH¢43.6 billion, a about two-fifths (33.8%) of the revenue earned in this sector was generated by the small-sized establishments. Within the Service sector, it is observed that the micro and small-sized establishments contributed 24.2 percent and 31.1 percent respectively, while the medium and large-sized establishments each contributed about one-fifth of the sector's revenue (Table 3.4).

With respect to cost of goods sold, the medium-sized Agricultural institutions account for close to a half (49.7%) of the total in the sector. On the other hand, small sized establishments in the Industry and Service sectors accounted for 41.9 percent and 41.6 percent of the total cost respectively.

Over 60 percent of gross profit in the Agriculture sector is from small sized establishments while close to half (46.0%) of gross profit in Industry is accounted for by large sized establishments. In the Service sector, the distribution is fare across all the establishment size groups.

**Table 3.4: Distribution of revenue, cost of goods sold and gross profit by size**

### 3.3 Operating Cost of production of goods and services

#### 3.3.1 Introduction

This section reports on the costs incurred by the establishments directly involved in producing a product or delivering a service. The costs include a variety of expenses incurred on raw materials, consumable manufacturing supplies, general overhead and taxes. Estimates of the costs associated with production of goods or delivering a service are used to guide and inform operatives of new and existing agricultural, industrial and services sector activities of the potential costs associated with the three economic sectors of engagement.

#### 3.3.2 Operating Cost of production of goods and services by sector and subsector

Table 3.5 reports on the total costs of production of goods and services for all sectors by type of cost. The annual production costs of goods and services of all sectors amounted to GH¢223.6 billion. Out of the total costs, 68.8 percent was for materials and supplies, 18.9 percent for other operating expenses, 6.0 percent for goods purchased for resale and 4.6 percent for fuel purchased. The remaining 1.6 percent was spent on water and other purchases.

The Service sector incurred the highest costs of production, accounting for a little over three-quarters (GH¢160.1 billion) of the total cost while the Industry sector incurred second largest of about 61.2 billion Ghana Cedis, accounting for a little over one-fifth (27%) of the total cost of production of goods and services. Agriculture sector recorded the least (GH¢2.4 billion) or 1.1 percent of the total cost. Generally across all sectors, materials and supplies contribute significantly to the total cost of production of goods and services (Table 3.5).

**Table 3.5: Cost of production by sector and type of cost of production (million GH¢)**

Sector	Total GH¢	Material and Supplies GH¢	Goods Purchased for Resale GH¢	Fuel purchased GH¢	Electricity purchased GH¢	Water purchased GH¢	Other Purchases GH¢	Other Operating Costs GH¢
<b>ALL SECTORS - National</b>	<b>167,504</b>	<b>97,660</b>	<b>13,417</b>	<b>10,363</b>	<b>2,964</b>	<b>240</b>	<b>384</b>	<b>42,475</b>
Agriculture	2,506	2,161	62	109	7	2	2	163
Industry	37,901	23,814	2,182	4,155	867	81	207	6,595
Services	127,097	71,685	11,173	6,099	2,091	157	176	35,717

Table 3.6 presents the total cost of production of goods and services within the sub-sectors of Agriculture, Industry and Service sectors. The Crop and animal production, hunting and related service activities sub-sector incurred GH¢2.1 billion or 90.7 percent of the total cost of production in the Agriculture sector. This is followed by the Fishing and aquaculture sub-sector (GH¢227.3 million or 9.1%). The cost of materials and supplies in the Crop and animal production, hunting and related service activities sub-sector alone was 97.6 percent of the total cost of production in the Agriculture sector.

In the Industry sector, the proportion of production cost in the Manufacturing sub-sector (GH¢20 billion) was the largest, and constitutes almost half (49.4%) of the total cost in sector, while the least cost of GH¢ 311 million was incurred in the water supply, sewerage, and waste management sub-sector. The cost of materials and supplies in the Construction sub-sector was the highest (GH¢25.3 billion) followed by Manufacturing with a cost of GH¢16.5 billion).

Within the Service sector, Wholesale and retail sub-sector (GH¢109.7 billion) was the principal contributor to total cost, representing 63.9 percent of the total cost of production. The Financial and insurance activities sub-sector was the second largest (GH¢32.8 billion), accounting for about one-quarter (24.5%) of the total cost. The two sub-sectors together recorded 88.4 percent of the sector's total production cost. The cost of materials and supplies in the Wholesale and retail sub-sector (GH¢91.8 billion) and other operating expenses in the Financial and insurance activities sub-sector (GH¢27.3 billion) together contributed 71.3 percent of the total cost in the Service's sector. The Financial and insurance sub-sector's costs were mainly in the form of services provided by other IT firms and administrative support services which is captured in the survey as other operating expenses. This accounts for the huge cost recorded under "other operating expenses" (Table 3.6).

**Table 3.6: Distribution of sources of cost of production and services by sector and sub-sector (million GH¢)**

Sector	Total	Material and Supplies,	Goods Purchased for Resale	Fuel purchased	Electricity purchased	Water purchased	Other Purchases	Other Operating Costs

### 3.3.3 Operating Cost of production of goods and services by region

Table 3.7 reports on the cost of production of goods and services by region and type of production cost. The cost of production of goods and services was largest (GH¢149.1 billion) for establishments in Greater Accra region, accounting for more than two-thirds (66.7%) of the total cost, followed by establishments in Ashanti region (GH¢24.1 billion or 10.8%). The cost of production from the two regions account for more than three-quarters (77.5%) of the total production cost. Establishments in the Upper East region recorded the least cost (GH¢2.2 billion) representing less than one percent (0.9%) of the total cost. Greater Accra region recorded the largest value in all the cost components.

**Table 3.7: Cost of production of goods and services by region and type of production cost (million GH¢)**

Sector	Total	Material and Supplies	Goods Purchased for Resale	Fuel purchased	Electricity purchased	Water purchased	Other Purchases	Other operating Costs
All sectors	223,681	153,837	13,417	10,363	2,964	240	384	42,475
Western	14,286	9,963	905	679	245	12	196	2,287
Central	8,590	3,483	4,814	56	35	8	3	191

Upper West	2,312	1,135	10	13	8	2	0	1,143

### 3.3.4 Operating Cost by establishment size

In terms of establishment size, Table A1a shows that the micro and small-sized establishments contributed GH¢83.3 billion which was more than half (54.0%) of the total cost while the medium and large-sized establishments accounted for 49.4 percent (GH¢120.5 billion). Generally, the cost of materials and supplies was the highest, irrespective of establishment size. However, this type of cost is relatively higher (more than 60 percent) for the micro, small- and medium-sized establishments.

In the Institutional Agriculture sector, more than two-fifths (45.0%) of the cost of production (GH¢1.1 billion) was incurred by the medium-sized establishments, while about one-quarter (26.0%) was incurred in the micro-sized establishments. Within the Industry sector, 47 percent of the cost of production (GH¢21.7 billion) was incurred by the large-sized establishments, while about 20 percent, equivalent to GH¢7.6 billion was incurred by the medium-sized establishments. In the Service sector, an amount of GH¢73 billion was incurred by the micro and small-sized establishments combined, representing 58 percent of the total cost, while less than one-fifth (19%) or GH¢24 billion of the total cost was incurred by large-sized establishments (Table 8).

**Table 3.8: Purchases and other operating cost by sector and size**

Sector	Total GH¢	Percent
<b>Agriculture (Institutional Agriculture)</b>	<b>2,506,425,357</b>	100.0
Large-Sized Businesses	270,093,055	11.0
Medium-Sized Businesses	1,118,954,077	45.0

Medium-Sized Businesses	29,352,008,631	23.0
Small-Sized Businesses	36,967,324,226	29.0
Micro-Sized Businesses	36,717,888,337	29.0

## 3.4 Receipts of Businesses

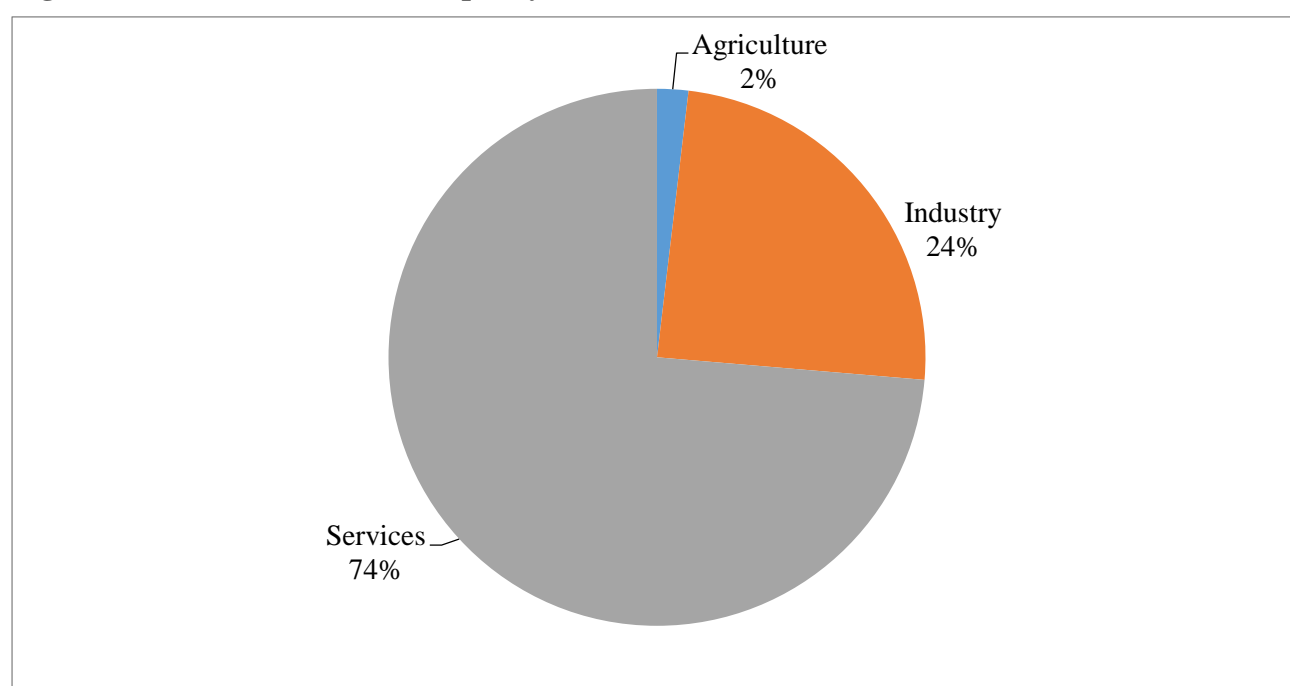

### 3.4.1 Introduction

Receipts refer to cash receipts that establishments received for undertaking their activities. It is the amount of cash that they collected during the 2013 financial period. These receipts are both cash sales, as well as money received on a customer's account. However, since businesses within sectors are expected to have some level of homogeneity in terms of their modus operandi, the structure of their receipts is deemed sector specific in the survey. Thus, the receipts are categorized for businesses by sector.

In the Institutional Agricultural sector, four different receipts are examined, and these include receipts from sale of agricultural products, non-agriculture products, goods sold in the same condition as purchased, subsidies, and other receipts. In the Industry sector, six categories are examined, and these are made up of receipts from the sale of main industrial products or activities, non-industrial activities, contract work done by industrial firms, repair and installation services, other industrial services that are not the main activity of the industrial firms, and sale of goods in the same condition as purchased. The Services sector on the other hand, has mainly three categories namely, receipts from main services of the service sector firm, sale of goods in the same condition as purchased, and other income, which includes subsidies.

The total value of receipts by all firms in the country was GH¢304.9 billion during the 2013 financial period. Out of these total receipts, the establishments in the Service sector accounted for almost three-quarters (74.0%). Firms in the Industry sector received close to one-quarter of the total receipts, while the firms in the Agriculture sector received just two percent. This is an indication of the buoyancy of business in the Service sector (Figure 3.2).

**Figure 3.2: Distribution of Receipts by Sector (%)**

### 3.4.2 Receipts in the Agriculture Sector

In the Agriculture sector, close to nine out of ten (89.2%) of all receipts by firms in the sector emanated from the sale of their main agriculture products, while a little above ten percent (10.8) of the receipts by businesses in this sector emanated from trading. This is an indication that most firms in the sector, were involved in their core business and mandates. Also, out of the total receipts of GH¢5,728.10 million in the sector, as much as GH¢4,744.80 million was contributed by firms in the Crop and animal production, hunting and related service activities (Table 9).

**Table 3.9: Distribution of sources of receipts in the Agriculture sector by subsector (GH¢ million)**

Sub-Sector	Total	Agriculture Products	Non-agriculture activities	Goods Purchased for resale	Subsidies	Other
<b>Agriculture, forestry and fishing</b>	<b>5,728.10</b>	<b>5,061.00</b>	<b>39.3</b>	<b>619.4</b>	<b>5.9</b>	<b>2.5</b>
<b>Percent</b>	<b>100</b>	<b>88.4</b>	<b>0.7</b>	<b>10.8</b>	<b>0.1</b>	<b>0.04</b>
Crop and animal production, hunting and related service activities	5,406.70	4,744.80	34.2	619.3	5.9	2.5
Forestry	10	9.3	0.7	0	0	0
Fishing and aquaculture	311.4	307	4.4	0	0	0

Regarding the sources of receipts of firms in the Agriculture sector within each region, it is observed that apart from the Western and Upper West regions, all the other regions had their main source of receipts from the sale of agriculture products. In the Western region, firms in the sector engaged in a lot of trading, as 40.4 percent of the total receipts by firms in the sector in the region is from trading while in the Upper West region about half (50.5%) of the receipts of firms in the sector are from non-agricultural activities (Table 10).

**Table 3.10: Distribution of sources of receipts in the Agriculture sector by region**

Region	Total (GH¢)	Agriculture Products (%)	Non-agriculture activities (%)	Goods Purchased for resale (%)	Other (%)	Subsidies (%)
Western	1,526,393,768	59.5	0.1	40.4	0.0	0.0

Data on the sources of receipts by size of businesses reveals that aside the micro-sized businesses in the Agriculture sector, the large, medium, and small-sized businesses had a large proportion of their receipts emanating from the sale of agriculture products. The micro-sized businesses in the Agriculture sector on the other hand, undertake trading alongside their agricultural activities as more than three-fifths (64.3%) of their receipts emanated from trading (Table 11).

**Table 3.11: Distribution of sources of receipts in the Agriculture sector by size**

Size	Total (GH¢)	Agriculture Products	Non-agriculture activities	Goods Purchased for resale	Other	Subsidies
<b>Agriculture</b>	<b>5,728,082,283</b>	<b>88.4</b>	<b>0.7</b>	<b>10.8</b>	<b>0.0</b>	<b>0.1</b>

### 3.4.3 Receipts in the Industry Sector

In the Industry sector, despite the fact that the sector has several sources of receipts, the main industrial receipts dominate the total receipts for all the sub-sectors. Indeed, for the manufacturing, electricity, gas, steam and air conditioning supply, and water supply, sewerage and waste management, less than 10 percent of the receipts are from other sources apart their main industrial activity. In the mining and quarrying and construction sub-sectors where the main industry activity did not contribute as much as the other sub-sectors, the other receipts contributed less than 20 percent to the total receipts. This is an indication that across all sub-sectors of industry, the main industrial activity is critical to the survival of the businesses (Table 12).

Across the regions, apart from Western, Upper West, and Upper East regions where singular other sources account for between 10 and 15 percent to total receipts, each of the singular sources within the other regions did not contribute much to the receipts within the region. This attribute of the businesses in the Industry sector is revealing since it exhibits confidence of the businesses in the major activities of the sector despite the numerous challenges that may have bedeviled the sector (Table 13).

Table 14 also reveals that size matters when considering the sources of receipts of businesses in the Industry sector. The data suggests that large and medium sized firms in Industry have almost all their receipts coming from their main industrial activity. Micro and small businesses in the sector, receive receipts from other sources such as from contract work done, to complement their main sources of receipts from the industrial activities.

**Table 3.12: Distribution of sources of receipts in the Industry sector by subsector**

### 3.4.4 Receipts in the Service Sector

Generally, in the Service sector, the share of receipts from the sale of goods in the same condition as purchased is relatively close to the receipts from main service compared to the other two sectors examined earlier. This is mainly due to the presence of Wholesale and retail trade; repair of motor vehicles and motorcycles subsector whose main activity is the trading of goods which are in the same condition as purchased (Figure 3.3).

**Figure 3.3: Distribution of major sources of receipts in the Service sector**

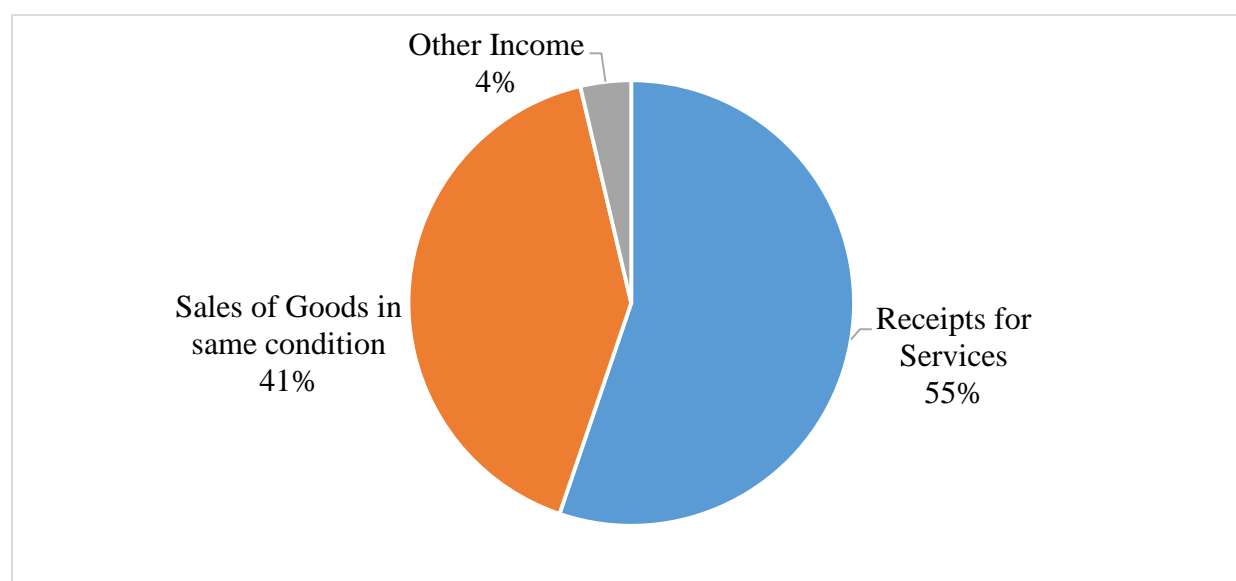

Table 15 presents the sources of receipts of firms in the service sub-sectors. It shows that with the exception of wholesale and retail trade, nearly all the receipts for all the other sub-sectors come from services. Receipts from services accounted for 55.2 percent of the Service sector receipts while that from the sale of goods in the same condition as purchased accounted for two-fifths (41.1%). All the other sub-sectors apart from wholesale and retail trade have more than 80 percent of their receipts coming from receipts for services. Sales of goods in the same condition as purchased accounts for 82 percent of the receipts for the Wholesale and retail trade sub-sector. Also, firms in the other services sub-sector undertake some trading together with the services they provide as about 14 percent of their receipts were from sales of goods sold in the same condition as purchased.

**Table 3.15: Distribution of sources of receipts in the Service sector by subsector**

Sector/Subsector	Total	Receipts for Services (%)	Sales of Goods in same condition (%)	Other Income (%)
<b>Service</b>	<b>224,640,204,738</b>	<b>55.2</b>	<b>41.1</b>	<b>3.7</b>
Wholesale and retail trade; repair of motor vehicles and motorcycles	111,678,150,308	16.2	82.0	1.9
Transportation and storage	3,575,598,025	90.7	4.4	4.9
Accommodation and food service activities	4,793,771,020	96.0	2.4	1.6
Information and communication	8,487,955,147	99.1	0.4	0.5
Financial and insurance activities	82,942,926,917	93.4	0.1	6.5
Real estate activities	782,585,058	95.8	1.7	2.5
Professional, scientific and technical activities	1,185,362,872	93.1	0.6	6.3
Administrative and support service activities	847,397,392	93.5	0.8	5.7
Education	6,185,644,507	97.4	1.0	1.6
Human health and social work activities	1,816,660,573	91.2	1.7	7.1
Arts, entertainment and recreation	225,397,989	97.3	1.5	1.2
Other service activities	2,118,754,930	80.1	13.8	6.1

Table 16 shows the sources of receipts of firms in the Service sector within each region. With the exception of Greater Accra which has about two-thirds of receipts from services (66.3%), all the other regions have sales of goods sold in the same condition as the main source of receipts. Northern, Brong Ahafo and Upper East regions have more than 80 percent of their receipts from sales of goods in the same condition as purchased.

**Table 3.16: Distribution of sources of receipts in the Service sector by region**

Region	Total (GH¢ Million)	Receipts for Services (%)	Sales of Goods in same condition (%)	Other Income (%)
Western	7,505	20.4	72.8	6.9
Central	3,648	24.0	68.0	8.0
Greater Accra	170,053	66.3	29.7	4.0
Volta	2,233	22.7	75.2	2.1
Eastern	3,574	24.3	73.6	2.1
Ashanti	22,534	22.2	77.2	0.6
Brong Ahafo	6,917	13.5	83.4	3.1
Northern	4,743	14.2	84.7	1.1
Upper East	1,761	14.0	81.9	4.0
Upper West	1,673	39.5	60.1	0.5

Table 17 indicates the distribution of sources of receipts in the Service sector by establishment size. More than four-fifths (80.1%) of receipts by large establishments and 60.7 percent of receipts by medium-sized establishment are from services provided. On the other hand, 61.8 percent of receipts by micro-sized establishments and more than half of receipts by small-sized establishment are from goods sold in the same condition as purchased.

**Table 3.17: Distribution of sources of receipts in Service sector by size**

Size	Total (GH¢ Million)	Receipts for Services (%)	Sales of Goods in same condition (%)	Other Income (%)
<b>Services</b>	<b>224,640.20</b>	<b>55.2</b>	<b>41.1</b>	<b>3.7</b>

Micro-Sized	54,973.30	33.7	61.8	4.5

## 3.5 Capital formation

### 3.5.1 Introduction

The survey collected information on the purchases of fixed assets by establishments, whether for use by the establishment or to be rented to other establishments. This section discusses the value of fixed assets owned and used by establishments, those purchased or disposed of by establishments and the value of depreciation during the use of these assets for providing goods and services during the reference period. The information on fixed assets gives an indication of the level of and additions to investments by the establishments within the period. Consideration is given to assets purchased by the establishment, value at full cost incurred (at delivered cost), plus the cost of installation, including any fees and taxes but excluding financial costs and assets.

### 3.5.2 Fixed assets and additions to fixed assets

Table 3.18 presents the total value of all fixed assets, whether tangible or intangible that was purchased by establishments within the reference period. In all, a total of GH¢32.9 billion worth of fixed assets was purchased by all establishments made up of 99 percent tangible (GH¢32.4billion) and only one percent intangible (GH¢432 million). Out of this total, majority of capital formation was within the Industry sector (GH¢26 billion), representing 79.2 percent of all assets that were purchased and for which majority (99.7%) is tangible asset. The Service sector followed with a total of GH¢6.7 billion which is 20.3 percent of total assets purchased while the Agriculture sector had the least purchases of GH¢147.6 million, which constitutes less than one percent of assets purchased by all establishments during the reference period.

**Table 3.18: Additions to fixed assets**

Sector	Intangible Assets GH¢	Tangible Assets GH¢	Total GH¢	Percent
<b>All Sectors</b>	<b>432,552,373</b>	<b>32,478,582,806</b>	<b>32,911,135,179</b>	<b>100.0</b>
Agriculture	31,727	147,605,498	147,637,225	0.4
Industry	68,245,069	26,007,347,793	26,075,592,862	79.2
Service	364,275,577	6,323,629,509	6,687,905,086	20.3

Table 3.19 shows that the additions to fixed assets in the Mining and quarrying sub-sector accounted for 65.7 percent (GH¢17.1billion) of all purchases within the Industry sector, followed by the Electricity, gas, steam and air conditioning supply sub-sector with 13 percent (GH¢3.3billion), with Water supply, sewerage, waste management having the least purchases of GH¢865,035,043.

Within the Service sector, the Financial and insurance sub-sector recorded the highest purchases of fixed assets (GH¢2.8 billion), constituting 42.3 percent of purchases in the sector. The Wholesale and retail trade sub-sector followed with a total purchase of GH¢1.9 billion representing 28.8 percent and the Information and communication sub-sector with purchases totaling GH¢538.6 million, representing 8.1 percent.

In the Agriculture sector, majority (87.8%) of additions to fixed assets was in the crops and animal production, hunting and related service activities sub-sector (GH¢129.6 million) while the fishing sub-sector contributed 10.4 percent (GH¢15.2 million).

**Table 3.19: Additions to fixed assets by sector**

### 3.5.3 Fixed assets by establishment size

Table 3.20 shows additions to fixed assets by sectors and establishment size. Nationally, medium-sized and large-sized establishments contributed 55.5 percent and 32 percent respectively, purchases of fixed assets. The Industry sector, which recorded the highest additions to fixed assets compared to the other sectors had most (65.7%) of its additions to fixed assets in medium-sized establishments (GH¢17.1 billion) and 30.9 percent (GH¢8 billion) in large-sized establishments. The Service sector, unlike the Industry sector, had significant additions to fixed assets across all the establishment size categories with 35.1 percent and 20.9 percent of addition going to large-sized and micro-sized establishments, respectively. The Agriculture sector had majority (85.9%) of its additions to fixed assets going to large-sized establishments followed by small-sized establishments with a contribution of 8.9 percent.

**Table 3.20: Additions to fixed assets by sector and establishment size**

Sector/Size	Value (GH¢)	Percent
<b>All Sectors</b>	<b>32,911,135,179</b>	<b>100.0</b>
Large-Sized	10,529,247,077	32.0
Medium-Sized	18,254,273,078	55.5
Small-Sized	2,222,808,961	6.8

Small-Sized	1,397,494,601	20.9
Micro-Sized	1,834,150,819	27.4

### 3.5.4 Fixed assets by region

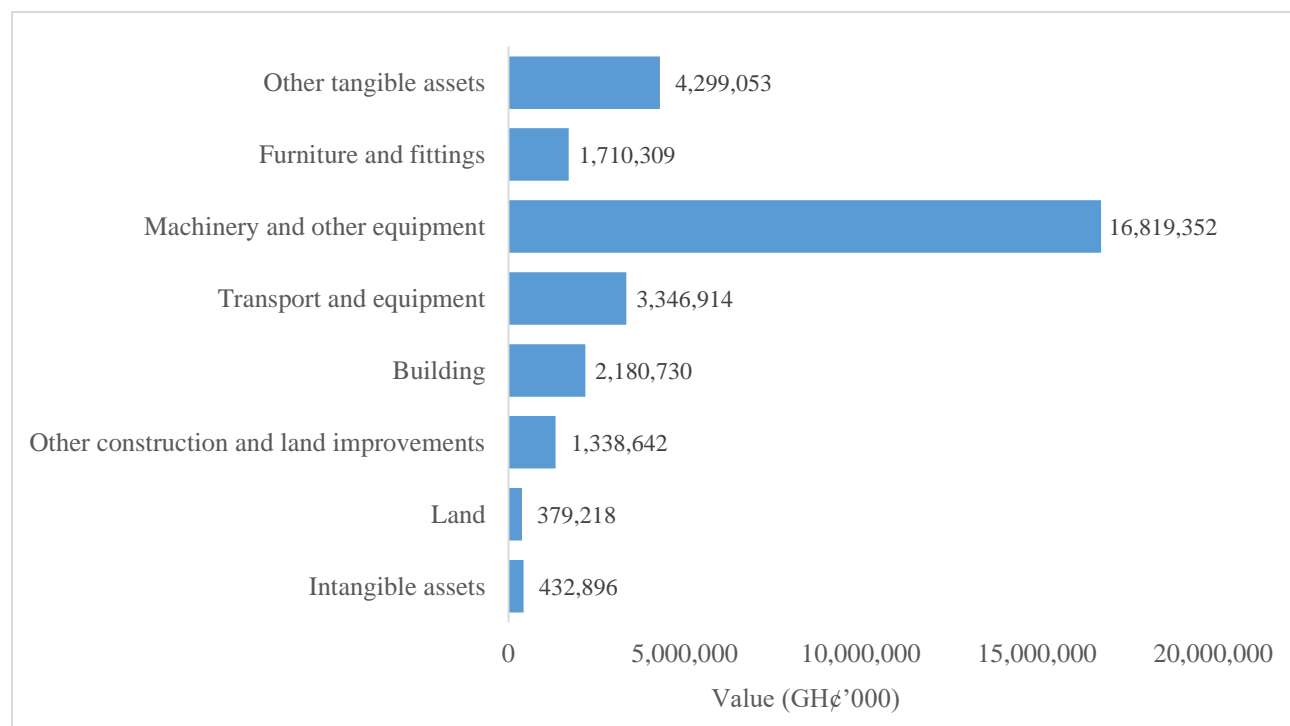

As shown in Table 3.21, Greater Accra region contributed 77.2 percent (GH¢25.4 billion) to purchases or additions to total fixed assets followed by the Western (GH¢4.7 billion) and Ashanti (GH¢1.2 billion) regions with 14.4 percent and 3.6 percent respectively. The remaining regions together contributed 4.8 percent to the total additions, each region with the exception of Brong Ahafo (1.7%) and Central (1.0%), contributing less than one percent.

**Table 3.21: Additions to fixed assets by region**

Sector	Value GH¢	Percent
<b>All Sectors</b>	<b>32,911,135,179</b>	<b>100.0</b>
Western	4,750,648,618	14.4
Central	331,671,329	1.0
Greater Accra	25,395,688,598	77.2
Volta	173,953,290	0.5
Eastern	309,225,071	0.9
Ashanti	1,182,909,264	3.6
Brong Ahafo	555,282,169	1.7
Northern	114,815,320	0.3
Upper East	46,678,460	0.1
Upper West	50,263,058	0.2

Figure 3.4 shows the type of assets purchased by establishments. Of the total assets purchased, GH¢16.8 billion, representing 55.1 percent was spent on machinery and other equipment. Other tangible assets followed, recording GH¢4.3 billion which represents 14.1 percent of total fixed assets purchased. Transport and equipment purchased was valued at GH¢3.3 billion, constituting 11.0 percent of additions to fixed assets.

**Figure 3.4: Type of asset purchased (GH¢'000)**

### 3.5.5 Total fixed assets

Total fixed assets owned by the establishments across all sectors is presented in Figure 3.5. The total value of assets in all sectors stood at GH¢180.3 billion. The Industry sector's total asset was valued at GH¢123.9 billion, representing 69 percent of the total assets. The Service sector follows with GH¢46.6 billion worth of assets (27%), and Agriculture adding GH¢9.8 billion worth of assets.

**Figure 3.5: Value of fixed assets (GH¢)**

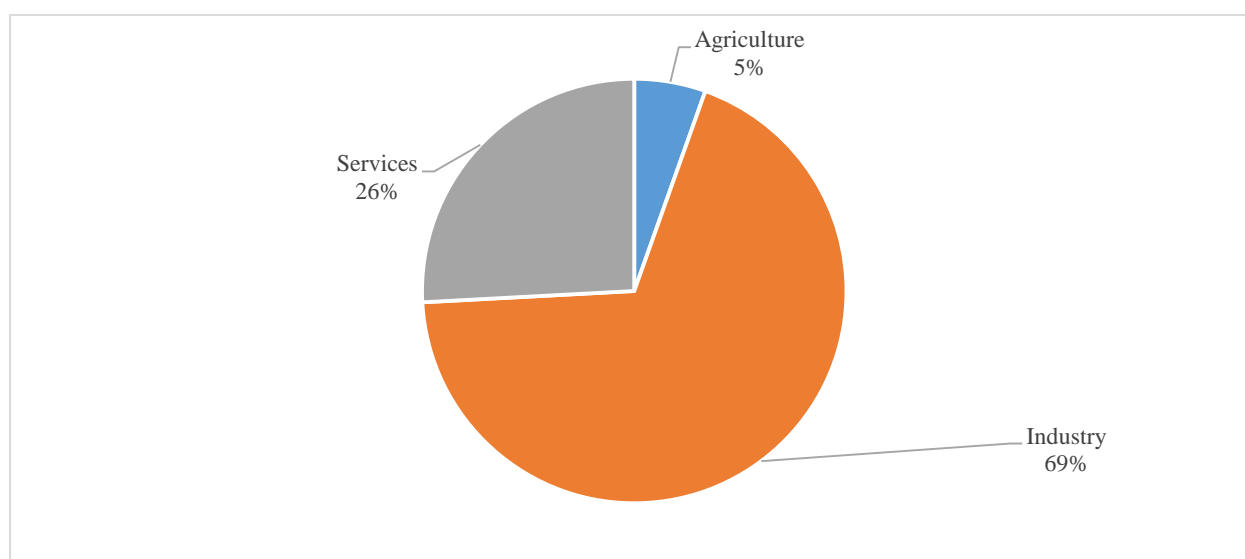

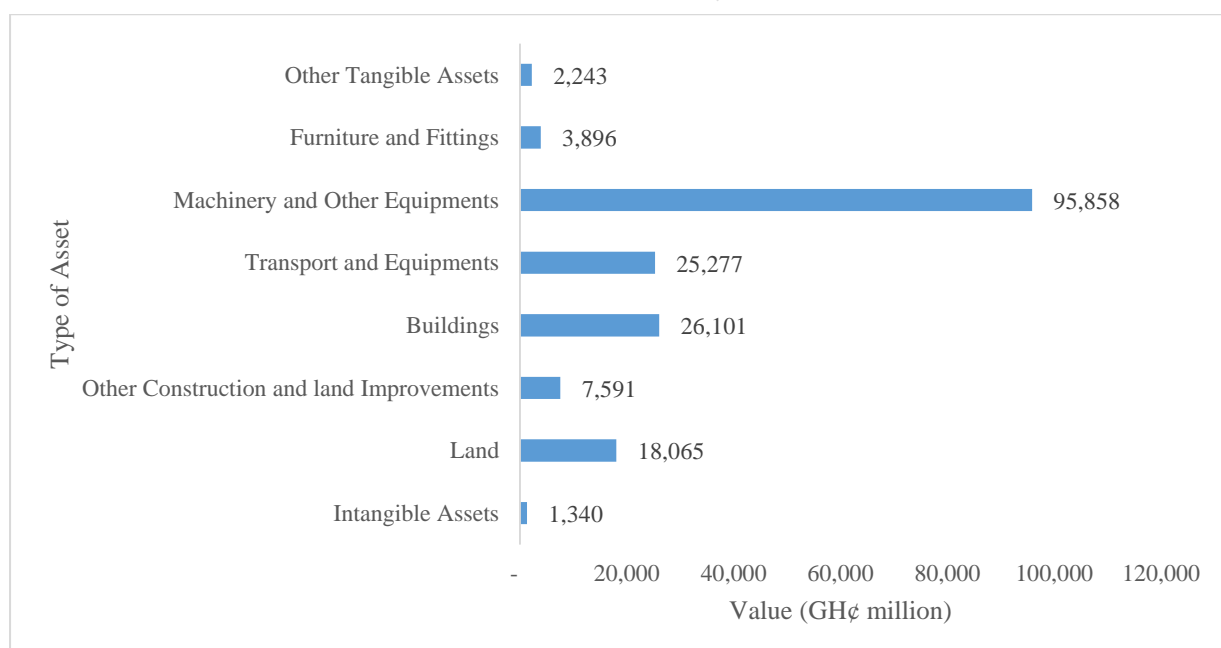

Figure 3.6 presents the type of fixed assets held by establishments. Over 50 percent of assets held is machinery and other equipment valued at GH¢95.8 billion. Buildings account for 14.5 percent (GH¢26.1 billion) while transport and equipment make up 14 percent (GH¢25.2 billion) of the total assets.

**Figure 3.6: Type of asset (GH¢'000)**

Out of the GH¢9.8 billion total assets held by the Agriculture sector, the Fishing and aquaculture sub-sector had GH¢9.3 billion, representing 95.6 percent of the total assets in the sector. The other sub-sectors within the sector contributed 4.4 percent to total assets (Table 3.18).

In the Industry sector, the Mining and quarrying sub-sector had total assets of GH¢69.8 billion which constitutes 56.3 percent of all assets held by the Industry sector. The Manufacturing subsector followed with a contribution of 29.7 percent to assets within the sector. The Service sector had a total of GH¢46.6 billion worth of assets of which the

Financial and insurance activities sub-sector's contribution is 18.1 percent (GH¢8.4 billion), followed by the Accommodation and food sub-sector (17.3%) and Wholesale and retail trade (15.3%).

**Table 3.22: Total fixed assets by sector**

Sectors/Subsector	Value (GH¢)	Percent
<b>All Sectors</b>	<b>180,371,029,617</b>	<b>100.0</b>

Education	6,695,984,397	14.4
Human health and social work activities	1,699,757,944	3.6
Sports activities and amusement and recreation activities	1,010,015,038	2.2
Other service activities	3,471,046,867	7.4

In terms of regional contribution to total assets, establishments located in the Greater Accra region held majority of the assets amounting to GH¢120.3 billion, which translates to 66.7 percent of the total assets. Establishments in the Ashanti region had about GH¢19.7 billion worth of assets representing 10.9 percent, with establishments in the three northern regions together having a share of 1.4 percent (GH¢2.4 billion) of the total assets (Table 3.19).

**Table 3.23: Total assets by region**

Region	Value (GH¢)	Percent
<b>All sectors</b>	<b>180,371,029,617</b>	<b>100.0</b>
Western	16,516,256,686	9.2
Central	7,458,546,244	4.1
Greater Accra	120,352,825,494	66.7
Volta	2,431,262,341	1.3
Eastern	9,150,046,993	5.1
Ashanti	19,701,652,541	10.9
Brong Ahafo	2,335,778,066	1.3
Northern	1,033,484,051	0.6
Upper East	271,755,448	0.2
Upper West	1,119,421,755	0.6

Table 3.20 presents the distribution of assets by sector and establishment size. Medium-sized establishments held assets worth GH¢93.3 billion representing 51.8 percent of the stock of assets followed by the large-sized establishments with GH¢41.4 billion, which constitutes 23 percent. In the Agriculture sector, a significant proportion of 97.5 percent of the assets is held by the large-sized establishments with small-sized establishments contributing 1.3 percent to the value of assets. Of the total assets held by the Industry sector (GH¢80.2 billion), 64.7 percent was owned by medium-sized establishments while the large-sized establishments had 16.4 percent (GH¢20.3 billion). Unlike the Agriculture and Industry sectors, all the size categories within the Service sector contributed substantially to the assets. Almost 32 percent of assets in the sector is held by small-sized establishments while medium-sized and large-sized establishments have 28.1 percent and 24.9 percent respectively (Table 3.20).

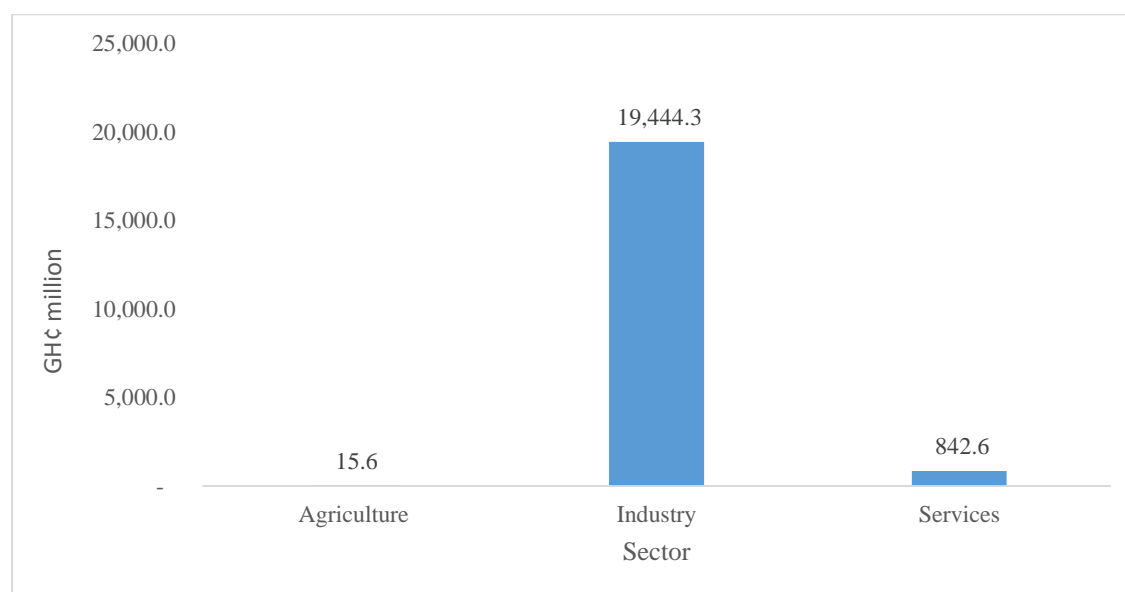

**Table 3.24: Fixed assets by sector and establishment size**

Size	Value (GH¢)	Percent
<b>All Sectors</b>	<b>180,371,029,617</b>	<b>100.0</b>

### 3.5.6 Assets disposal

Figure 3.7 illustrates information on the disposal of assets by establishments. A total of GH¢20,302,508,034 worth of assets were disposed off during the reference period. The Figure shows that a very high percentage (95.8%) of the value of assets in the Industry sector, equivalent to GH¢19.4 billion was disposed off. The service sector disposed of GH¢842.6 million (4.2%) worth of assets while the Agriculture sector disposed of assets worth GH¢15.6 million.

**Figure 3.7: Disposal of assets**

Out of the total disposed assets, 90.9 percent (GH¢18.4 billion) were machinery and other equipment. Transport and equipment disposed off amounted to GH¢683 million, representing 3.3 percent. Other construction and land improvements recorded the least disposals with a value of GH¢81 million which constitutes only 0.3 percent (Figure 3.8).

**Figure 3.8: Type of assets disposed**

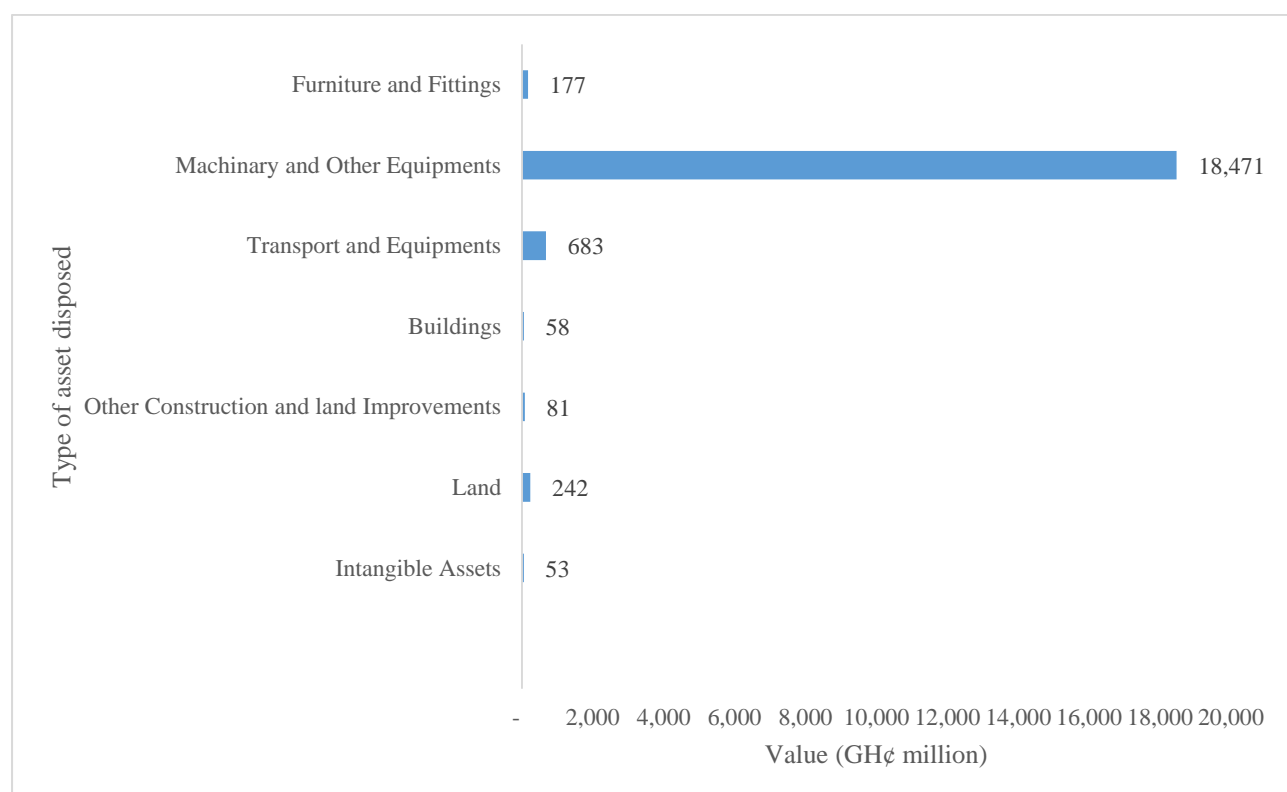

Table 3.21 indicates the share of regions in the disposal of fixed assets by establishments. As high as 95.9 percent of the value of assets (GH¢19.5 billion) disposed off was by establishments located in the Greater Accra region. All the other regions together contributed three percent (4.11%) to the total value of assets disposed.

**Table 3.25: Disposal of fixed assets by region**

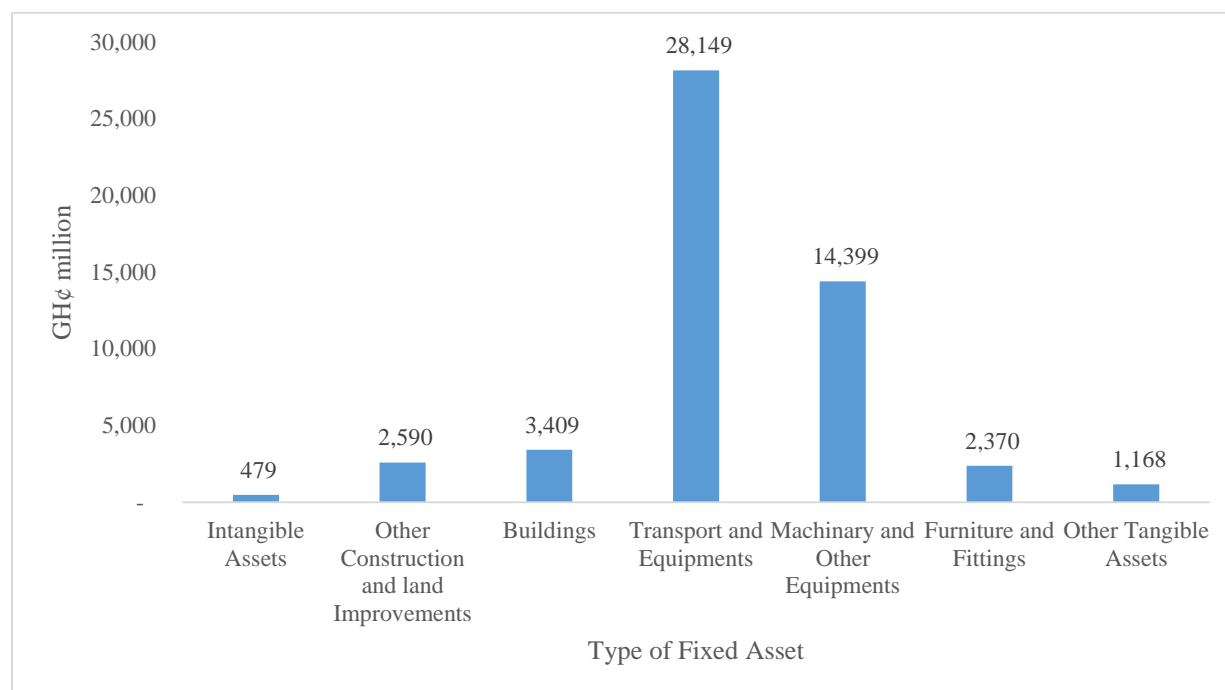

Region	Value	Percent
<b>National</b>	<b>20,302,371,509</b>	<b>100.0</b>
Western	589,900,760	2.9
Central	5,856,073	0.0
Greater Accra	19,467,223,130	95.9
Volta	5,485,451	0.0
Eastern	9,425,254	0.0
Ashanti	214,559,532	1.1
Brong Ahafo	2,399,715	0.0
Northern	5,917,799	0.0
Upper East	296,820	0.0
Upper West	1,306,975	0.0

### 3.5.7 Depreciation of fixed assets

Depreciation is the value of wear and tear of fixed assets in the course of the financial year. It is the value allowed at current replacement cost of assets used up during the year through normal wear and tear, foreseen obsolescence and the normal rate of accidental damage.

Figure 3.9 presents the different categories of fixed assets and their depreciation during the reference period. The category of asset with the highest depreciation was transport and equipment (GH¢28.1 billion billion), representing 53.4 percent the total depreciation of GH¢52.6 billion. Machinery and other equipment followed with a depreciation value of GH¢14.3 billion, with intangible fixed assets having the least depreciation of GH¢479 million.

**Figure 3.9: Distribution of depreciation by type of fixed asset**

Within the Agriculture sector, machinery and equipment was utilized more than any other fixed asset with a depreciation value of GH¢512 million followed by transport and equipment (GH¢103 million). The least utilized fixed asset in the Agriculture sector was intangible assets with a depreciation of GH¢1 million (Figure 3.10)

**Figure 3.10: Distribution of depreciation by type of fixed asset in the Agriculture sector**

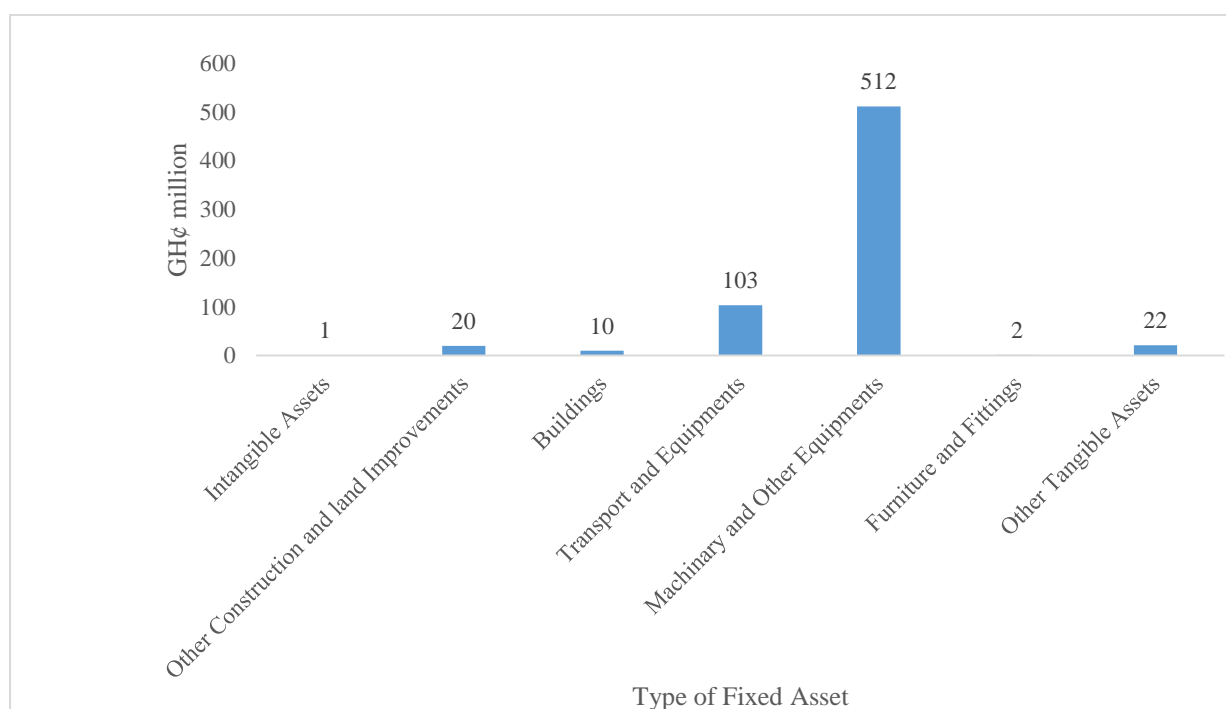

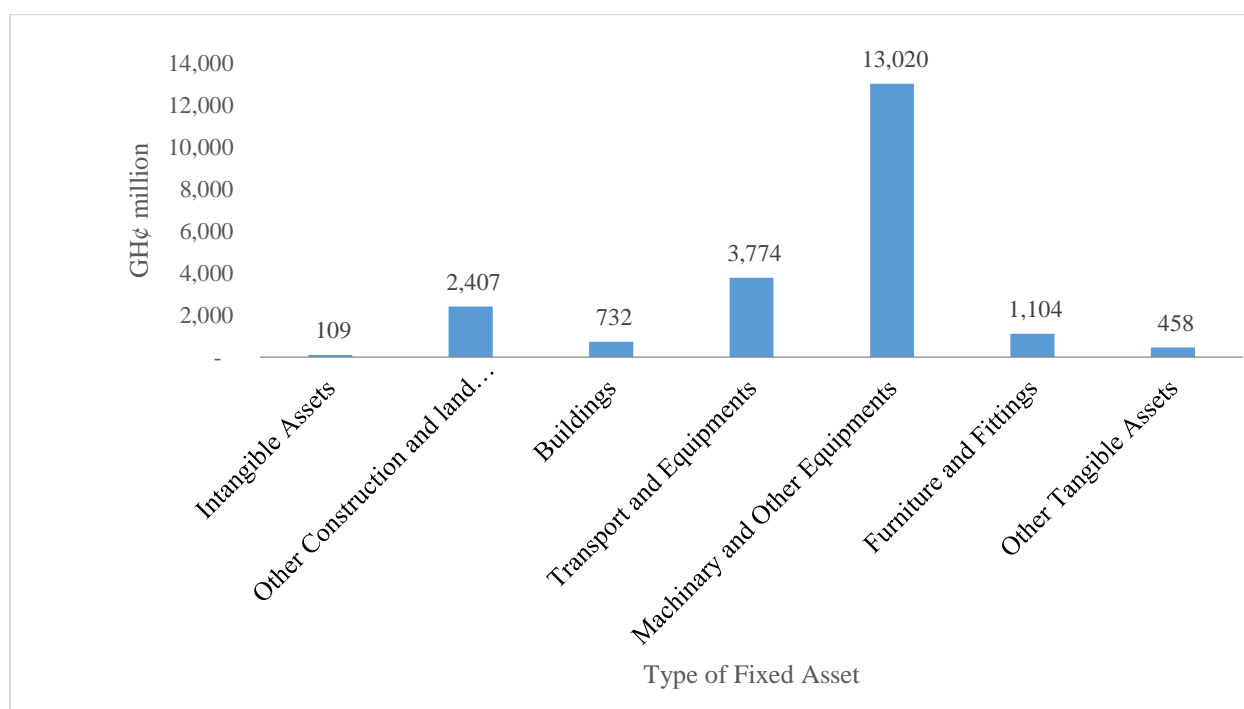

Figure 3.11 indicates that in the Industry sector, machinery and other transport equipment recorded a depreciation of GH¢13.0 billion, and transport and equipment, GH¢3.7 billion depreciation. The depreciation for other construction and land improvement for the sector was GH¢2.4 billion.

**Figure 3.11: Distribution of depreciation by type of fixed asset in the Industry sector**

Unlike the Agriculture and Industry sectors, the Service sector had the highest depreciation for transport and equipment (GH¢24.2 billion) followed by buildings (GH¢2.6 billion). There was a higher value of depreciation of intangible assets (GH¢368 million) in the Service sector compared to the Agriculture (GH¢1 million) and Industry (GH¢109 million) sectors.

**Figure 3.12: Distribution of depreciation by type of fixed asset in the Service sector**

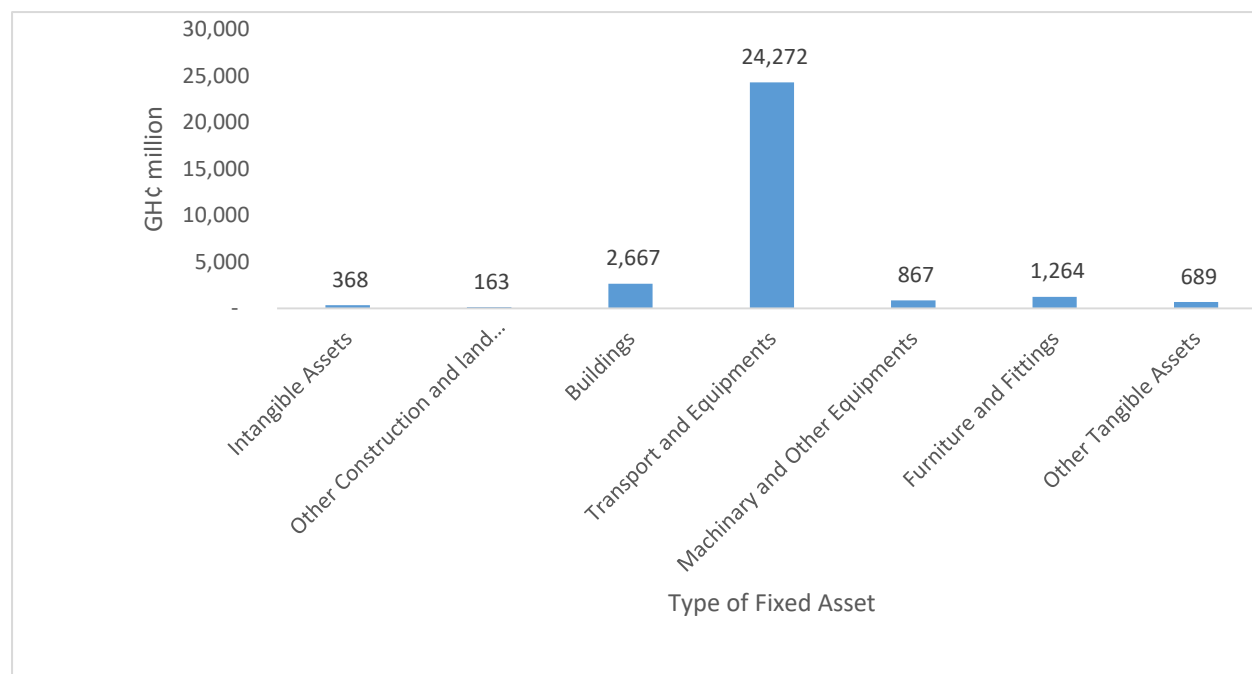

Table 3.22 shows the depreciation of fixed assets by the size of establishment across all the three sectors. Almost all depreciation in the Agriculture sector was in the large sized establishments, GH¢6.2 billion representing 94 percent of all assets. The value of depreciation of assets in small sized Agriculture businesses was GH¢24.4 million, representing 3.6 percent of total depreciation within the sector.

More than half (54.6%) of total depreciation in the Industry sector was among the medium-sized establishments (GH¢11.7 billion) while micro-sized businesses recorded the least depreciation of GH¢39 million, equivalent to 0.2 percent.

About 70 percent of depreciation of fixed assets in the Service sector was among small-sized businesses. Large-sized businesses in the sector had a total depreciation of GH¢3.4 billion with medium and micro-sized establishments together having a depreciation of about GH¢3.4 billion

**Table 3.26: Depreciation of fixed assets by size**

Sector/Size	Value of Depreciation (GH¢ Million)	Percent
<b>All Sectors</b>	<b>52,564.3</b>	<b>100.0</b>

## 3.6 Inventories/stocks

### 3.6.1 Introduction

This section discusses the distribution of stocks and shows comparisons of the stocks among the three sectors as well as sub-sectors, to explain the general behavior of stock management in the country.

### 3.6.2 Stocks

Table 3.27 shows that the total value of stocks for all establishments is GH¢35.9 billion. Out of this figure, about GH¢18.4 billion, representing 51.3 percent of the total value, was among establishments in the Service sector. About GH¢17.3 billion, representing 48.2 percent was in the Industry sector while the remaining GH¢144.1 million, representing less than one percent was in the Agriculture sector.

The Industry and Service sectors had values for all the categories of stocks as indicated in Table 3.27 while the Agriculture sector did not have any stocks for fuel and finished goods. The Industry sector had most of the stocks as raw materials and supplies (GH¢10.1 billion) representing 58.4 percent of all the stocks kept within the sector while the Services sector had more than half (58.2%) of its stocks as goods purchased for resale.

**Table 3.27: Value of stocks in Ghana Cedis at end of year by sector**

Sector	Total	Raw materials and supplies	Work in progress	Fuel	Finished goods	Goods for resale	Others stocks
<b>All Sectors</b>	<b>37,384,449,157</b>	<b>23,062,125,731</b>	<b>4,279,176,676</b>	<b>149,088,562</b>	<b>1,107,440,818</b>	<b>3,828,347,429</b>	<b>4,958,269,941</b>
Agriculture	118,166,909	58,800,203		-	-	35,324,802	24,041,904
Industry	18,593,750,595	10,096,074,473	4,279,176,676	149,088,562	1,107,440,818	774,293,713	2,187,676,353
Service	18,672,531,653	12,907,251,055				3,018,728,914	2,746,551,684

Table 3.28 presents the stocks in the various sub-sectors under the Agriculture sector. Crop and animal production and hunting had the highest share of inventory (GH¢118 million) in the Agriculture sector, representing about 81.9 percent of the total stocks in the sector. Inventory in the Fishing and aquaculture sub-sector was valued at GH¢23.9 million (16.6%) while Forestry and logging had GH¢1.2 million, representing less than one percent. Stocks in the Crop and animal production and hunting was mostly in the form of goods for resale. In the Fishing and aquaculture sub-sector, most of the stocks was in the form of raw materials and supplies.

**Table 3.28: Value of stocks in the Agriculture sector by sub-sector and type of stock**

Sub-sector	Total	Raw materials and supplies	Work in progress	Goods for resale	Other stocks
<b>Agriculture</b>	<b>144,075,186</b>	<b>58,893,260</b>	<b>22,692,103</b>	<b>38,447,919</b>	<b>24,041,904</b>
Agriculture, forestry and fishing	144,075,186	58,893,260	22,692,103	38,447,919	24,041,904
Crop and animal production, hunting	118,827,529	34,762,028	21,655,509	38,389,708	24,020,284
Forestry and logging	1,279,912	1,196,341	62,371	500	20,700
Fishing and aquaculture	23,967,745	22,934,891	974,223	57,711	920

Table 3.29 shows that the total stock in the Industry sector was GH¢17.3 billion. Of this, the Construction sub-sector accounted for 64.4 percent of the total stocks for the sector. Stocks in Manufacturing constituted 19.7 percent, with the other sub-sectors each having less than 10 percent share. It is observed that with the exception of the Electricity, gas, steam and air conditioning sub-sector which kept the highest stock as work in progress (GH¢658.1million), all the other sub-sectors kept the highest levels of their stocks as raw materials and supplies.

**Table 3.29: Value of stocks in the Industry sector by sub-sector and type of stock**

Sub-sector	Total	Raw materials and supplies	Work in progress	Fuel	Finished goods	Goods for resale	Other stocks
<b>Industry</b>	<b>17,325,590,053</b>	<b>10,124,614,457</b>	<b>3,637,900,603</b>	<b>148,875,949</b>	<b>1,136,336,420</b>	<b>769,303,852</b>	<b>1,508,558,772</b>
Mining and quarrying	1,005,081,528	482,668,206	125,067,273	58,778,263	138,574,397	48,917,823	151,075,566
Manufacturing	3,424,304,455	1,744,274,059	597,301,997	43,587,362	733,869,890	159,206,646	146,064,501
Electricity, gas, steam and air conditioning	1,702,963,129	14,642,476	658,072,722	104,916	162,251	403,740	1,029,577,024
Water supply; sewerage, waste management	34,530,433	14,776,854	480,923	142,074	290,319	1,652,463	17,187,800
Construction	11,158,710,508	7,868,252,862	2,256,977,688	46,263,334	263,439,563	559,123,180	164,653,881

In the Service sector, the wholesale and retail trade sub-sector had about 79.5 percent (GH¢14.5 billion) of the total value of stocks (Table 3.30). This is followed by the Financial and insurance sub-sector with about 11.0 percent (GH¢2.1 billion). All the other sub-sectors within the Service sector contributed less than 2 percent to the total stock in the sector.

**Table 3.30: Value of stocks in the Service sector by sub-sector and type of stock**

Establishments	Total GH¢	Raw Materials and Supplies GH¢	Work In Progress GH¢	Fuel GH¢	Finished Goods GH¢	Goods for Resale GH¢	Other Stocks GH¢

Table 3.31 presents the regional distribution of stocks by sector. The Greater Accra region recorded the highest share of stocks valued at GH¢26.9 billion (70.9%) in all the three sectors, out of the national stockpile of GH¢38.0 billion. Ashanti region followed with GH¢6.5 billion (17.0%) while the Eastern region had a total value of GH¢1.1 billion (2.8%). The Upper West region recorded the least value of stocks, GH¢108.1 million (0.3%). It is observed that establishments located in the Greater Accra region and engaged in industrial (GH¢12.3 billion) and Service (GH¢14.6 billion) activities together accounted for 70.7 percent of the total stocks in the country.

**Table 3.31: Value of stocks by region and by sector**

## 3.7 Employment and compensation of employees

### 3.7.1 Introduction

This section presents information on key labour market indicators notably, the employed population engaged by non-household establishments and compensation to labour. To a large extent, this will help to identify sectors with the potential for employment opportunities within the economy and also help policy makers to identify appropriate policies and actions for fostering job growth.

### 3.7.2 Employment

The survey collected detailed information on persons engaged by the establishments. This includes working owners, persons who were on the payroll of the establishments, unpaid family members who help in the entrepreneurial activities and apprentices. However, all National Service Personnel engaged by the establishments are excluded. Figure 3.13 shows that 3,102,917 persons were engaged by establishments of which 74.6 percent (2,314,309 persons) were engaged by the Service sector, 23.7 percent (734,341 persons) by Industry while 1.7 percent (54,267 persons) were engaged by the Agriculture sector. Of the total persons engaged, 58.8 percent (1,823,070 persons) were employees. The Agriculture sector recorded the highest proportion (81.7%) of employees while the Industry sector had the least proportion (56.9%) of employees.

**Figure 3.13: Persons engaged in establishments by sector**

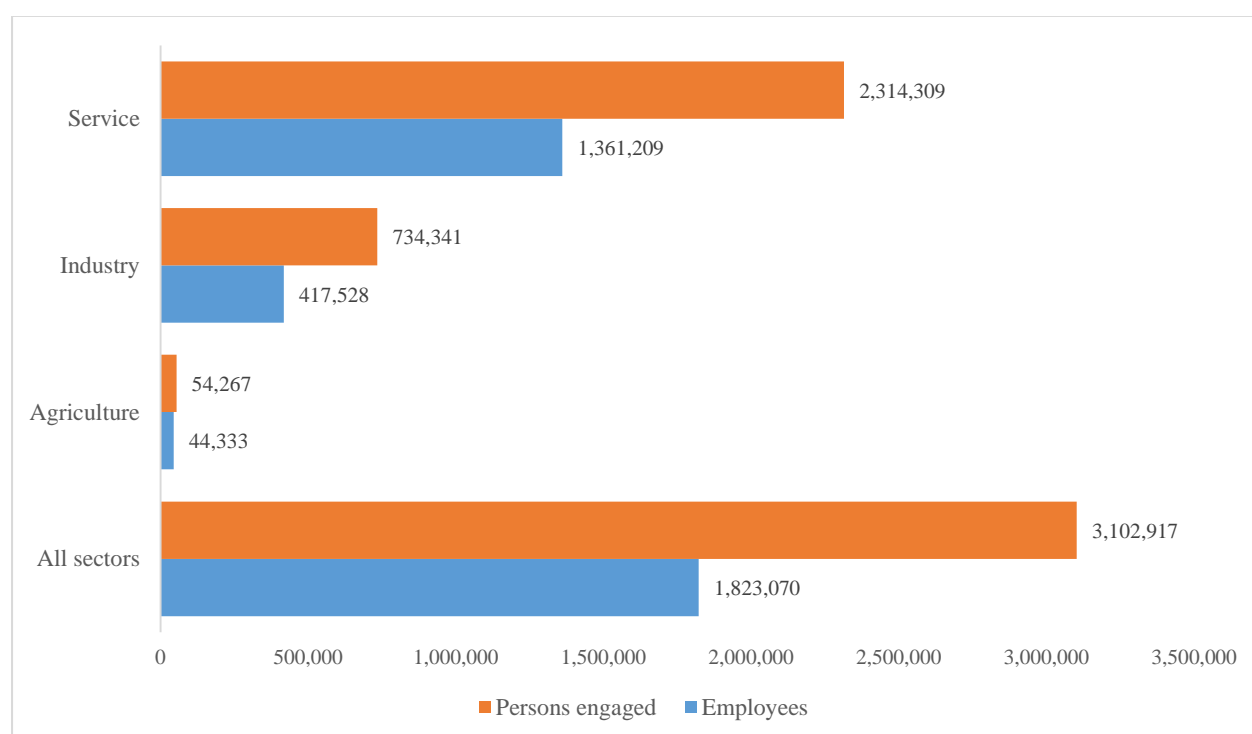

Table 3.32 shows that majority (94.3%) of the agricultural workers (54,267 persons) were engaged by the Crop and animal production, hunting and related service activities sub-sector. It is also observed that 570,327 (77.7%) of the persons engaged by the Industry sector worked in the Manufacturing sub-sector while 71,567 persons (9.7%) were engaged by the Construction sub-sector. Within the Service sector, about one-third (33.6%), representing 778,587 persons, were engaged by the Wholesale and retail trade sub-sector while 13.3

percent (308,944 persons) were engaged by the Education sub-sector. Altogether, the Wholesale and retail trade, Manufacturing and Education sub-sectors engaged 53.4 percent of the total persons engaged. Table 3.28 further shows that 60.6 percent of persons engaged by four sub-sectors: Wholesale and retail trade; repair of motor vehicles and motorcycles; Education; Manufacturing and Financial and insurance activities are employees.

**Table 3.32: Persons engaged and employees by sector**

Sectors/ Sub-sectors	Persons Engaged		Employees	
	Number	Percent	Number	Percent
<b>All sectors</b>	<b>3,102,917</b>	<b>100.0</b>	<b>1,823,070</b>	<b>58.8</b>

Real estate activities	7,408	0.3	6,908	93.3
Professional, scientific and technical activities	39,921	1.7	28,935	72.5
Administrative and support service activities	88,022	3.8	76,112	86.5
Education	308,944	13.3	286,011	92.6
Human health and social work activities	75,171	3.2	65,014	86.5
Arts, entertainment and recreation	16,385	0.7	11,697	71.4
Other service activities	477,868	20.6	127,153	26.6

It is further observed that about three-quarters (76.7%) of persons engaged by the Agriculture sector (41,635 persons) were employees working in the Crop and animal production, hunting and related service activities sub-sector. A little more than half (51.2%) of persons engaged by the Industry sector are employees (376,006 persons) working in Manufacturing, Construction and Mining and Quarrying sub-sectors. In the Service sector, 42.6 percent of all persons engaged are employees working in the Wholesale and retail trade, Education, Financial and insurance activities and Accommodation and food service activities sub-sectors (Table 3.33).

In terms of size, the small-sized and micro-sized establishments together, engaged 71.4 percent of the total workforce while the large-sized establishments engaged 16.6 percent. However, the proportions of employees in the small-sized (57.8%) and micro-sized (33.4%) establishments are low. More than half (51.9%) of persons engaged by the Agriculture sector worked in large-sized establishments and 26.9 percent worked in small-sized establishments. With respect to workers in the Industry sector, less than one-quarter (24.3%) were engaged by the large-sized establishments and about two-fifths (39.3%) worked in small-sized establishments. Within the Service sector, 73.7 percent of the workforce were engaged by small-sized and micro-sized establishments while 13.3 percent were engaged by the large-sized establishments (Table 3.29).

**Table 3.33: Persons engaged and employees by establishment size and sector**

Generally, relatively higher proportions of employees worked in large-sized establishments. Irrespective of the sector of employment, the proportion of employees increases with the size of establishment. Whereas the micro-sized establishments recorded about one-third (33.4%) of employees, large-sized establishments recorded 90.8 percent of employees. Similar trends are seen in the various sectors with the Agriculture sector engaging the highest proportion (95.1%) of employees in the large-sized establishments with the Industry sector engaging the least proportion (30.7%) of employees in the micro-sized establishments (Table 3.29).

Table 3.34 shows the regional distribution of persons engaged and employees. Out of the 3,102,917 persons engaged by all establishments, 1,115,768 persons, representing 36 percent worked in establishments located in the Greater Accra region, 16.9 percent worked in establishments located in the Ashanti Region while 10.3 percent worked in establishments located in the Western Region. The proportion of employees was highest in the Greater Accra region (77.7%) and lowest in Upper West region (29.7%).

**Table 3.34: Persons engaged and employees by region**

Region	Persons engaged		Employees	
	Number	Percent	Number	Percent

### 3.7.3 Compensation of employees

Compensation of employees is the total remuneration, in cash or in kind, payable by an establishment to an employee in return for work done by the employee during the accounting period. Compensation of employees has three main components:

- i) Wages and salaries payable in cash or in kind;
- ii) Value of social security contributions payable by the employer; and
- iii) Other supplement to wages and salaries.

Figure 3.14 shows that total compensation paid to the 1,823,070 employees amounted to GH¢30.4 billion. Wages and salaries paid to employees was about GH¢28.7 billion which represents 94.4 percent of total compensation to employees. In total, about GH¢1.0 billion was paid by employers on behalf of their employees as social security contributions, which formed 3.4 percent of the total compensation to employees. Other supplement to wages such as end of year bonuses, personal insurance, medical schemes, etc. was about GH¢666.6 million, representing 2.2 percent of the total compensation to employees.

**Figure 3.14: Compensation (GH¢'000) of employees by type of compensation**

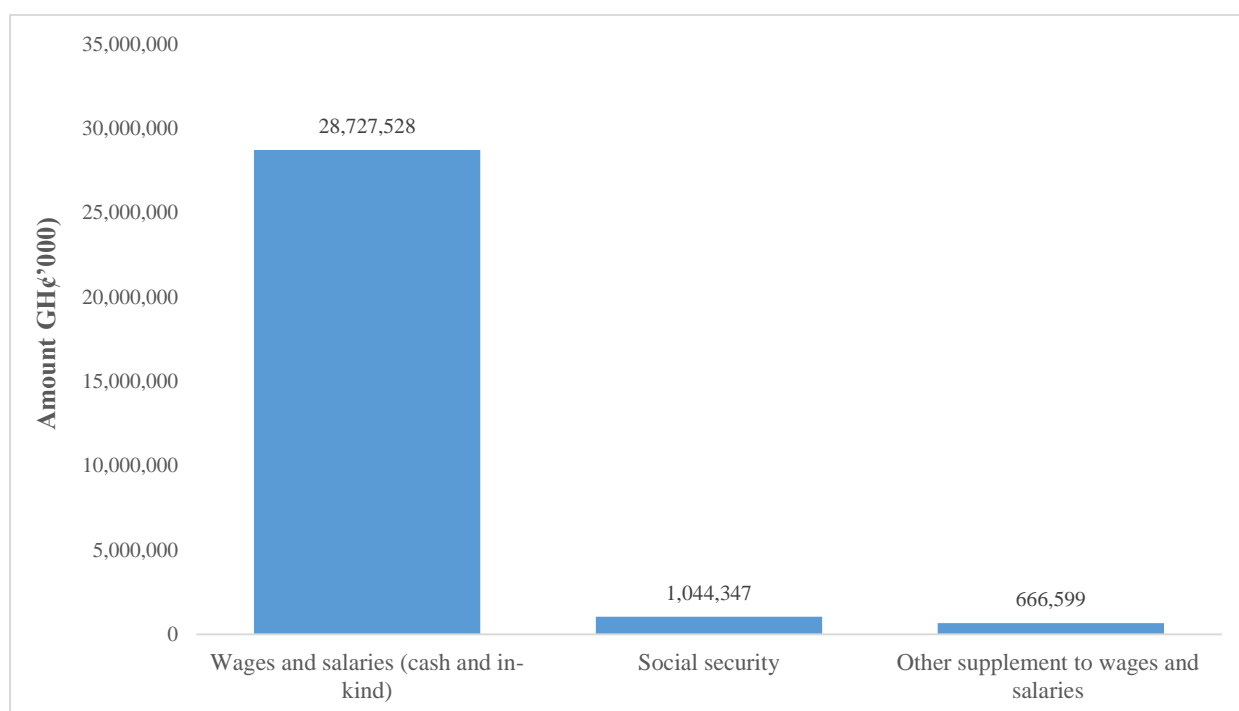

Figure 3.15 indicates that as much as GH¢17.1 billion was paid as wages and salaries to those who worked in the Service sector. This amount constitutes 60.1 percent of total wages and salaries paid to employees. Within the Service sector however, the amount forms 76.6 percent of total wages and salaries paid to employees who worked in the sector. About two-fifths (39.3%) of total wages and salaries amounting to about GH¢11.5 billion was paid to those who worked in the Industry sector. Employees who worked in the Agriculture sector received less than one percent of total wages and salaries.

Social security and other supplement to wages and salaries paid to employees follow a similar trend. About 64.8 percent of the total social security payments by employers and 60.1 percent of total payments as other supplement to wages and salaries went to employees in the Service sector. Employees who worked in the Industry sector received 34.6 percent of the total social security payments and 39.3 percent of the total payments as other supplement to wages and salaries. Employees in the Agriculture sector received less than one percent of total social security payments and other supplement to wages and salaries (Figure 3.12).

**Figure 3.15: Compensation (GH¢'000) of employees by sector and type of compensation**

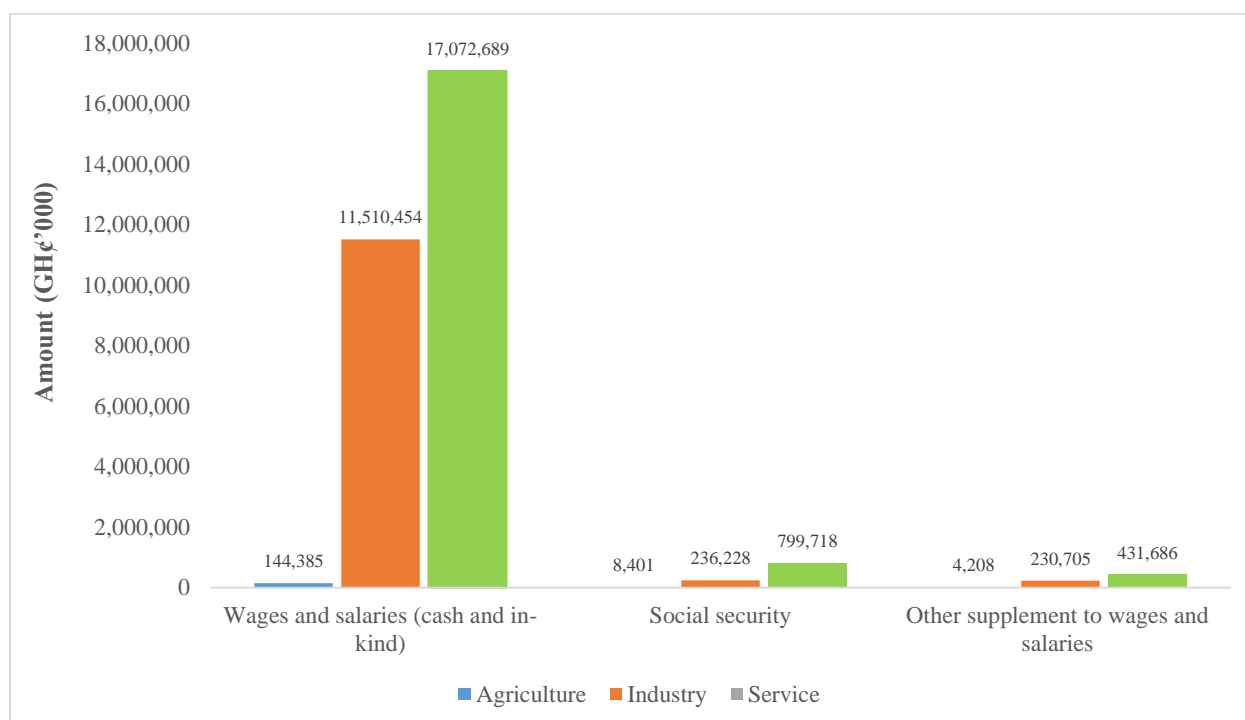

Table 3.35 shows that employees in the Mining and quarrying and Financial and insurance activities sub-sectors together received about GH¢17.1 billion (59.4%) of the total wages and salaries paid to employees. Employees who worked in the Financial and insurance activities sub-sector received 47.4 percent of the social security payments (GH¢494,828,685) and 38.4 percent of other supplement to wages and salaries (GH¢256,106,359).

Out of the total wages and salaries paid to employees within the Agriculture sector, 67.2 percent (GH¢97.1 million) was received by those in the Crop and animal production, hunting and related service activities sub-sector; while 31.3 percent of the amount (GH¢45.2 million) was received by those who worked in the Fishing and aquaculture sub-sector. More than three-quarters (76.9%) of the total wages and salaries paid to employees within the Industry sector, was received by those who worked in the Mining and Quarrying sub-sector. Employees in the Financial and insurance activities and Education sub-sectors received 65.3 percent of the total wages and salaries paid to employees within the Service sector (Table 3.35).

About two-thirds (66.0%) of the total supplement to wages and salaries paid to employees within the Industry sector were received by those who worked in the Electricity and Gas supply and Mining and Quarrying sub-sectors. In the Service sector, 59.3 percent of the total supplement to wages and salaries was paid to employees in the Financial and insurance activities sub-sector. For those who worked in the Agriculture sector, 61.1 percent of the amount was paid as supplement to wages to those who worked in the Crop and animal production, hunting and related service activities sub-sector.

In the case of payments for social security, those who worked in the Mining and Quarrying and Electricity and Gas supply sub-sectors received 60.4 percent of the payment to the Industry sector while 61.9 percent of social security payments in the Service sector was received by those who worked in the Financial and insurance activities sub-sector (Table 3.35).

**Table 3.35: Compensation of employees by sector and type of compensation**

Sectors/Sub-sectors	Wages and salaries (Cash and in-kind) GH¢	Social security GH¢	Other supplement to wages and salaries GH¢
<b>All sectors</b>	<b>28,727,528,284</b>	<b>1,044,346,659</b>	<b>666,599,065</b>

Arts, entertainment and recreation	39,454,311	1,975,664	2,387,237
Other service activities	541,454,203	14,726,498	5,985,315

Table 3.36 shows that 63.6 percent of the total wages and salaries (GH¢18.3 billion) were received by employees who worked in large-sized establishments. In the Industry sector, 89.1 percent of total wages and salaries (GH¢10.3 billion) was received by employees in large-sized establishments. The proportions of total wages and salaries received by employees in large-sized establishments within the Service (46.6%) and Agriculture (40.3%) sectors were relatively smaller.

Table 3.36 shows the annual average compensations to employees. On average, GH¢15,758 was paid to each employee per annum as a wage. The average wage paid to employees in the Industry sector (GH¢27,568) was higher than the average payments in the other sectors and also higher than the national average. The average wage paid to employees in the Agriculture sector (GH¢3,257) was the least. Large-sized establishments paid GH¢39,063 on average per annum to their employees. Whereas large-sized establishments in Industry paid GH¢62,666 averagely per annum to their employees, those who worked in large-sized establishments in the Agriculture sector received GH¢2,175 per annum on average.

**Table 3.36: Compensation of employees by sector, establishment size and type of compensation**

## **CHAPTER FOUR**

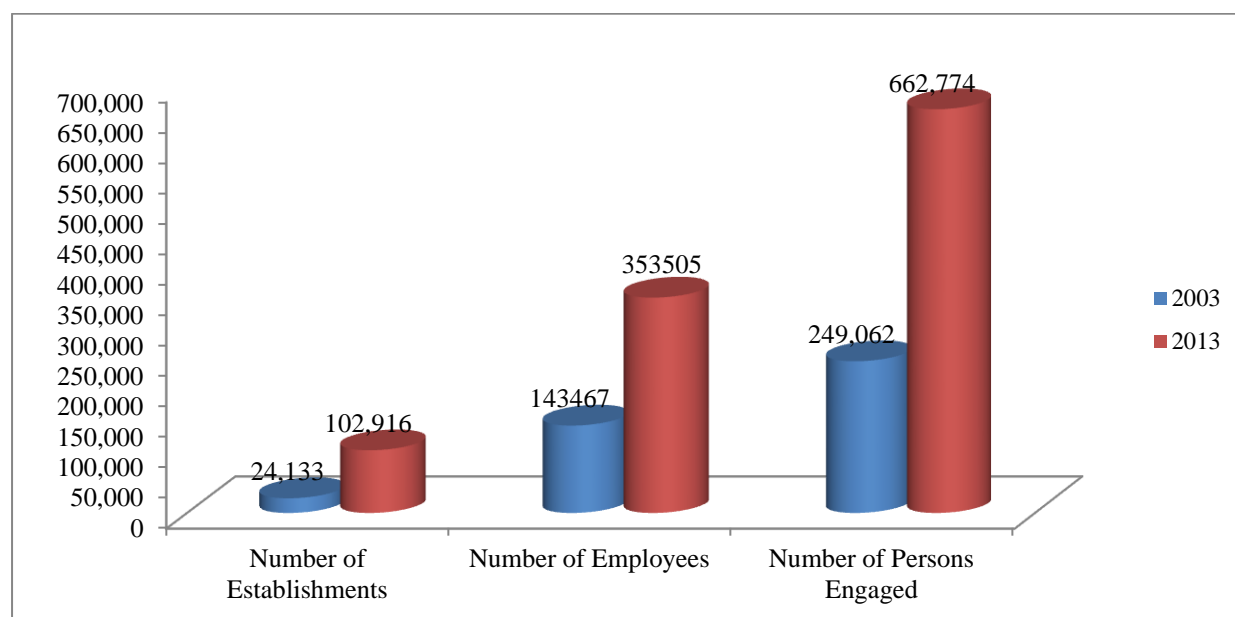

### **COMPARATIVE ANALYSIS OF A DECADE (2003 - 2013) OF INDUSTRY SECTOR PERFORMANCE**

In 2005, the 2003 National Industrial Census was conducted, and this was done in two phases. The first phase, conducted in October 2003, listed and collected location and organizational data on establishments engaged primarily in mining and quarrying, manufacturing, construction and the production and distribution of electricity and water. The second phase collected detailed information on industry from November 2004 to February 2005 with 2003 as the reference period.

Unlike the previous industrial censuses which focused only on the Industry sector, the 2013 economic census covered not only Industry but also, the Service and Agriculture sectors. In both the 2003 and 2013 surveys, data collection was undertaken in two phases, with the first phase providing the sampling frame, while the second phase collected detailed operational data on the activities of the businesses. To a large extent, both surveys are similar except for the scope, as they seek, among others, to provide the needed critical data for re-basing the country's GDP. In view of the similarity that exists between the two surveys, it is permissible to compare the performance of the Industrial sector in 2003 to that in 2013. This chapter, therefore, seeks to provide insight into possible changes in the Industry sector over the period 2003 to 2013. This would be done for indicators such as gross output, gross value added, compensation of employees, material cost for production, and the workforce used in industry.

Figure 4.1 shows the number of establishments, number of employees and number of persons engaged in the Industry sector in 2003 and 2013. The number of establishments in the sector increased from 24,133 in 2003 to 102,916 in 2013 representing a growth of 326.5 percent. The number of employees grew by 146.4 percent in 2013, an indication that, the number of employees have over the decade increased from 143,467 in 2003 to 353,505 employees in 2013. Similarly, the number of persons engaged increased from 249,062 in 2003 to 662,774 in 2013, representing a growth in persons engaged over the decade in industry sector to be 166.1 percent.

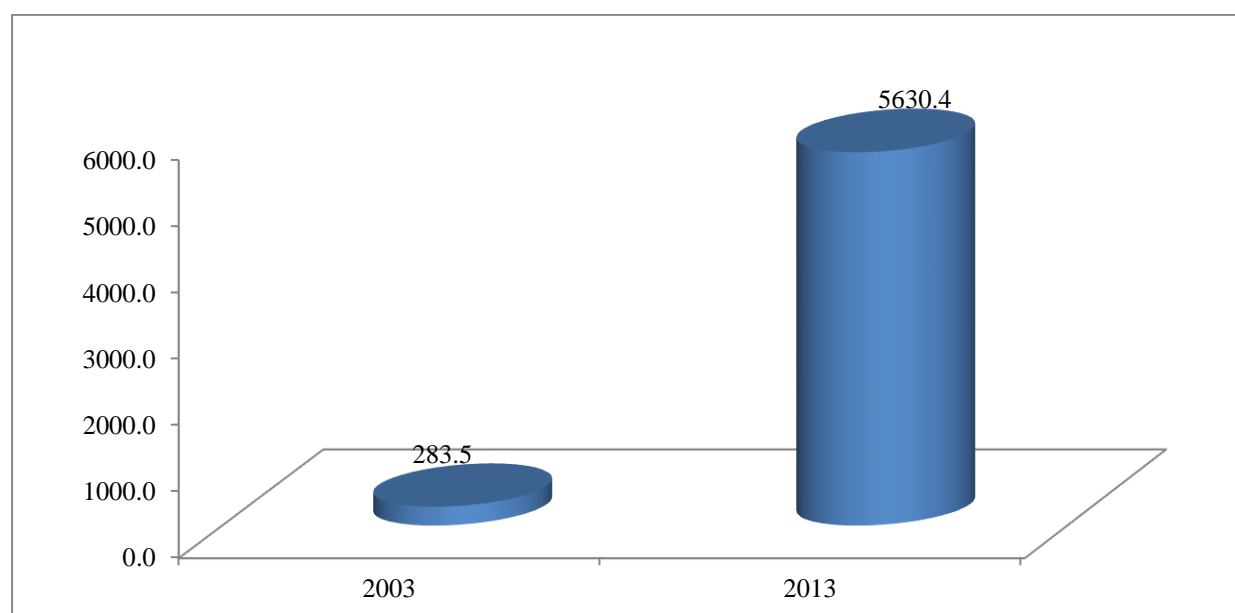

**Figure 4.1: Establishments, employees and persons engaged by all industry for 2003 and 2013**

Source: Phase II of 2003 Industrial Census and 2013 Economic Census

Real wages measured in United States Dollars is examined for the industry sector in Figure 4.2. The results indicate that over the decade, wages and salaries paid to labour in the sector have significantly increased. The total wages and salaries paid to labour increased from US\$284 million in 2003 to US\$5,630.4 million in 2013, indicating a growth of 1,886 percent. This increase far exceeds the growth in number of the employees in the sector over the same period.

**Figure 4.2: Wages and salaries for all industry in 2003 and 2013**

Source: Phase II of 2003 Industrial Census and 2013 Economic Census

Table 4.1 indicates the number of establishments and persons engaged, that operated in the three sub-sectors of Industry irrespective of size. The total number of establishments increased from 24,133 in 2003 to 102,916 in 2013 representing a growth of 326.5 percent. Manufacturing establishments grew by 327.7 percent, increasing from 23,797 in 2003 to

101,789 in 2013 while Electricity and Water grew by 295.3 percent , also increasing from 211 in 2003 to 834 in 2013. The number of establishment in the Mining and Quarrying sub-sector double in 2013 representing a growth of 134.4 percent.

The Electricity and water sub-sector recorded the highest growth of 266.6 percent in number of persons engaged, increasing from 11,856 in 2003 to 43,470 in 2013 followed by the mining and quarrying sub-sector with a growth rate of 221.1 percent, increasing from 221,952 in 2003 to 570,327 in 2013. The manufacturing sub-sector recorded a growth of 157 percent.

**Table 4.1: Number of establishments and persons engaged by industry sub-sectors in 2003 and 2013**

Major Industry Group	Number of Establishments			Number of Persons Engaged		
	2003	2013	Percent	2003	2013	Percent
<b>Total</b>	24,133	102,916	326.5	249,062	662,774	166.1
Mining and Quarrying	125	293	134.4	15,254	48,977	221.1
Manufacturing	23,797	101,789	327.7	221,952	570,327	157.0
Electricity and Water	211	834	295.3	11,856	43,470	266.6

Source: Phase II of 2003 Industrial Census and 2013 Economic Census

Table 4.2 shows Wages and Salaries and Number of Employees in the three sub-sectors of Industry in 2003 and 2013. Wages and salaries paid to labour in the three sub-sectors grew by 1,886 percent, increasing from US\$284 million in 2003 to US\$5,630 million in 2013. Although the mining and quarrying sub-sector recorded a higher growth rate (7,909.1%) in wages and salaries which could be attributed to the extraction of oil in Ghana, the number of employees grew by 169.8 percent, while wages and salaries paid to labour in the electricity and water sub-sector grew 1,220.9 percent,, with the number of employees recording a growth of 251.1 percent. The manufacturing sub-sector recorded the lowest growth of 220 percent over the decade in wages and salaries and also 251.1 growth in the number of employees over the same period.

**Table 4.2: Wages and salaries and number of employees by industry in 2003 and 2013**

Major Industry Group	Total Wages and Salaries US\$ Mil			Number of Employees		
	2003	2013	Percent	2003	2013	Percent

Source: Phase II of 2003 Industrial Census and 2013 Economic Census

Note: The annual average exchange rate per US dollar was ₵8,677.81 in 2003 and GH¢1.95 in 2013

Table 4.3 indicates purchases by the three sub-sectors of industry. The value of materials and supplies purchased grew by 951.7 percent, increasing from US\$1,900.2 million in 2003 to US\$19,983.3 million in 2013. The Electricity and Water sub-sector recorded the highest growth of 9,296.2 percent followed by the Mining and Quarrying sub-sector which recorded a growth of 1,412.2 percent. The Manufacturing sub-sector recorded the lowest growth of 400.7 percent. The total value of goods purchased for resale increased from US\$73.4 million

in 2003 to US\$1,078.1 million in 2013 indicating a growth of 1,360.5 percent. In terms of changes in the sub-sectors, the Mining and quarrying sub-sector recorded the highest growth of 9,754.7 percent followed by the Manufacturing sub-sector with 591.5. There was no growth recorded in the Electricity and Water sub-sector.

The value of purchased fuel grew by 4,372.8 percent, increasing from US\$72 million in 2003 to US\$3,221.9 million in 2013. The Electricity and Water sub-sector grew by 69,939.1 percent followed by the Mining and Quarrying sub-sector with 7,163.0 percent. The Manufacturing sub-sector recorded the lowest growth of 309.3 percent. Electricity purchased increased from US\$446.1 million in 2003 to US\$775 million in 2013. The Mining and quarrying sub-sector recorded the highest growth of 567.3 percent which was more than three times that of the Manufacturing sub-sector (178.6%).

A decade examination of Total Receipts, shows that in 2013 total receipts for industry was \$39,957.5million, and this was more than nine times that of 2003 (\$4,257.0 million). Examining this within the sub-sectors, the Mining and Quarrying sub-sector recorded the highest growth (1,367.5%) in total receipts, increasing from US\$608.5 million in 2003 to US\$8,930.3 million in 2013. The Manufacturing and Electricity and Water sub-sectors recorded growths of 610.9 percent and 532.5 percent respectively (Table 4.4). Receipts from sales from main industrial activity grew by 836.9 percent, increasing from US\$4,083.6 million in 2003 to US\$3,8257.6 million in 2013. The Mining and Quarrying sub-sector grew by 1,292 percent followed by the Manufacturing sub-sector with 636.1 percent The Electricity and Water sub-sector recorded the lowest growth of 498.4 percent.

Receipts from other industrial services grew by 1,505 percent with the Mining and Quarrying sub-sector recording a significant growth of 67,919.8 percent followed by electricity and water sub-sector with 7,806.6 percent . The Manufacturing sub-sector recorded the lowest growth of 310.9 percent. Receipts from sales of goods sold in the same condition grew by 146.3 percent, increasing from US\$79.8 million in 2003 to US\$196 million in 2013. The Mining and Quarrying and Manufacturing sub-sectors recorded growths of 8621.2 percent and 52.1 percent respectively.

Source: Phase II of 2003 Industrial Census and 2013 Economic Census

The annual average exchange rate per US dollar was ₺8,677.81 in 2003 and GH₵1.95 in 2013

Over the decade, the total depreciation of fixed assets in Industry grew by 1,554.2 percent with the Mining and Quarrying sub-sector recording the highest growth of 5,591.7 percent. The Manufacturing and Electricity and Water sub-sector grew by 712.7 percent and 835.7 percent respectively. Depreciation in Buildings, other construction and land improvement in the Industry sector recorded a growth of 5,466.1 percent, increasing from US\$28 million in 2003 to US\$1,595 million in 2013. The Electricity and Water sub-sector recorded the highest growth of 9,316.7 percent followed by the Mining and Quarrying sub-sector with 2,748.1 percent. The Manufacturing sub-sector recorded the lowest growth of 2,483.7 percent (Table 4.5).

The depreciation in Machinery and other equipment increased from US\$516.4 million in 2003 to US\$6,408.4 million in 2013 representing a growth of 1,141 percent over the ten-year period. The Mining and Quarrying and Manufacturing sub-sectors grew by 4,985.1 percent and 773.9 percent respectively. The Electricity and Water sub-sector recorded a growth of 421.1 percent.

The depreciation in Transport and Equipment grew by 3516.5 percent, increasing from US\$51.6 million in 2003 to US\$1,866.3 million in 2013. The Mining and Quarrying sub-sector recorded the highest growth of 11,609.1 percent followed by the Electricity and Water sub-sector with 9,276.4 percent. The Manufacturing sub-sector again recorded the lowest growth of 112.8 percent.

Table 4.6 indicates the value of gross additions to fixed assets in Industry in 2003 and 2013 over the period, 2003 to 2013. The total gross additions to fixed assets in Industry increased from US\$307.8 million in 2003 to US\$12,106.6 million in 2013, indicating a growth of 3,833.3 percent. The total gross assets in the Mining and Quarrying sub-sector (US\$8,494.4million) is about six times that of the Manufacturing sub-sector (US\$1,526.2 million) and four times that of the Electricity and Water sub-sector (US\$2,086 million).

Gross additions to land grew by 1,250 percent, increasing from US\$6.5 million in 2003 to US\$87.8 million in 2013. The value of assets in the Mining and Quarrying sub-sector shrank by 65.8 percent while that of the Manufacturing sub-sector grew by 4,625.percent. Gross additions to Buildings, Other construction and land improvement in industry recorded a growth of 2649.1 percent with Manufacturing sub-sector recorded the highest growth of 4,529.8 percent followed by Electricity and Water sub-sector with 3,510.1 percent. Mining and quarrying sub-sector recorded the lowest growth of 273 percent.

The gross additions to Machinery and other equipment increased from US\$204.6 million in 2003 to US\$9,132.1 million in 2013 over the ten-year period, representing a growth of 4363.4 percent. The Mining and Quarrying sub-sector accounts for 80 percent of the total value of Machinery and other equipment in industry sector.

The gross additions to Transport and Equipment grew by 3229 percent, increasing from US\$38.9 million in 2003 to US\$1,295 million in 2013. The Mining and Quarrying sub-sector recorded the highest growth in the value of additions Transport and Equipment, recording 6,480.7 percent followed by the Electricity and Water sub-sector with 2,184.6 percent. The Manufacturing sub-sector recorded the lowest growth of 392.9 percent (Table 4.6).

## **CHAPTER FIVE**

### **CONCLUSIONS AND RECOMMENDATION**

#### **4.1 Introduction**

Chapter four presents the conclusions and recommendation based on the data and analysis so done in this report. The recommendations are formulated bearing in mind business development, improved economic growth and job creation.

#### **4.2 Conclusions**

Phase II of the Integrated Business Establishment Survey (IBES II) involved the collection of detailed information on the operations of non-household establishments covering all the sectors of the Ghanaian economy namely, Agriculture, Industry and Services. IBES II covered only agricultural activities managed by establishments or institutions.

The aim of IBES II was to provide information on the structure and performance of all sectors of the economy in addition to regional comparisons. Such economic data and other data sources are required to monitor the achievements of the Ghana's Shared Growth and Development Agenda, the AU Agenda 2063 and the Sustainable Development Goals (SDGs).

With regard to employment, a total of 3,061,521 persons were engaged by establishments of which 75.1 percent were engaged by the Service sector, 23.1 percent by Industry while 1.8 percent were engaged in the Agriculture sector. Out of the total persons engaged, 1,778,940, representing 58.1 percent were employees. The proportion of employees was highest in the Greater Accra region (77.7%) and lowest in the Upper West region (29.7%)

In relation to revenue, the total amount of revenue generated by the three sectors was GH¢451.6 billion. A greater proportion of the revenue (GH¢317.7 billion, representing 70.4 percent) was generated by the Service sector. The Industry sector generated GH¢128.4 billion which is 28.4 percent of the total revenue while revenue from Institutional Agriculture was GH¢5.4 billion, representing 1.2 percent.

Over 70 percent of all revenues generated was from the Greater Accra region which does not align well with the objective of decentralization. Considering the fact that a large proportion of revenues were from the Greater Accra region, policies should target the setting up of businesses across all regions to increase access to basic goods and services outside of the Greater Accra region while creating employment in all regions to reduce migration to the capital city.

Most of the assets owned, purchased and disposed of as at the end of the reference period was by establishments in the Industry sector. This emphasizes the fact that the Industry sector is more capital intensive compared to the other sectors of the economy. There is therefore, the need for the formulation of policies policy that can lead to businesses building fixed capital to be able to produce at full capacity using modern and efficient methods to foster economic growth in the country.

With respect to size, 30.5 percent of the total revenue (GH¢144.5 billion) was earned by the small-sized establishments and more than one-quarter (27.2%), amounting to GH¢128.9 billion was generated by the large-sized establishments. Among the different sizes, the least revenue (GH¢97.8 billion) was earned by the medium-sized establishments.

The Service sector had a total revenue of GH¢45.9 billion of which the Financial and insurance activities sub-sector's contribution was 18.4 percent (GH¢8.6 billion), followed by the Accommodation and food sub-sector (17.6%) and the Education sub-sector (14.6%). The Health and Education sub-sector accounted for 3.7 percent and 14.6 percent respectively of the total assets of the Service sector.

The value of fuels purchased grew by 43.7 percent, increasing from US\$72 million in 2003 to US\$3,221.9 million in 2013 with the Electricity and Water sub-sector recording a growth of 693.1 followed by the Mining and Quarrying sub-sector with a 71.6 percent growth.

Total receipts in 2013 were more than nine times that of 2003 with the Manufacturing sub-sector contributing about 54 percent. Majority (95%) of receipts were from sale of items from main industry activity. The total gross additions to the fixed assets in Industry increased from US\$307.8 million in 2003 to US\$12,106.6 in 2013 indicating a growth of 38.3 percent. The total value of gross asset in the Mining and quarrying sub-sector (US\$8494.4million) was about six times that of the Manufacturing sub-sector (US\$1,526.2 million) and four times that of Electricity and Water sub-sector (US\$2,086 million).

As the country thrives to move from subsistence agriculture to a more mechanized agriculture, it is expected that the Agriculture sector would have substantial amount of fixed assets in the form of agricultural machinery and equipment. Policy decisions should focus on areas that will facilitate the mechanization of agriculture through the building of fixed capital in the form of agricultural machinery and implements.

Good educational and health infrastructure is key to quality delivery of these services. The stock of fixed assets and additions to fixed assets in these sectors is key to the provision of quality education and health to the citizenry. As reflected in the results, capital formation in these sectors needs to be improved. It is therefore, important that efforts are made through policy interventions to improve upon capital formation in these sub-sectors which will translate into the provision of quality education and improved healthcare delivery.

A high proportion of the persons were engaged by the Service sector, particularly the Wholesale and retail trade sub-sector. This shows the extent and indication of the pervasiveness of domestic trading activities, and low manufacturing base of the economy. Every effort to promote manufacturing activities in the country should be embraced.

The concentration of persons engaged by non-household establishments in Greater Accra, Ashanti and Western regions should be a concern. Expanding the creation of factories and establishments/enterprises in the various parts of the country will be a useful venture.

Total payments by employers to their employees as social security contributions is far below expectation. Even though the micro, small and medium-sized establishments engaged more persons, those who worked in these establishments received lower remuneration. Employers should be encouraged to pay social security contributions for their employees to improve on their welfare during retirement.

With regard to the comparative analysis of industry performance between 2003 and 2013, the Manufacturing sub-sector contributed about 86 percent of the number of establishments in the three sub-sectors of Industry. Wages and salaries increased from US\$284 million in 2003 to US\$5,630.4 million to 2013 indicating a growth of 1886 percent with the Mining and quarrying sub-sector contributing about 80.7 percent to the total wages and salaries.

### 4.3 Recommendation

The Service sector accounts for slightly over 70 percent of total revenue while the productive sectors of the economy (Industry and Agriculture sectors), contribute less than 30 percent to output. This gives an indication that the economy is driven by the Service sector. There is therefore, the need for a concerted effort to support the productive sectors of the economy through policy interventions in order to increase production and exports.

As the country thrives to move from subsistence agriculture to a more mechanized agriculture, it is expected that the Agriculture sector would have substantial amount of fixed assets in the form of agricultural machinery and equipment. Policy decisions should focus on areas that will facilitate the mechanization of agriculture through the building of fixed capital in the form of agricultural machinery and implements.

Good education and healthy infrastructure is key to quality delivery of these services. Stock of fixed assets and additions to fixed assets in these sectors is key to the provision of quality education and health to the citizenry. As reflected in the results, capital formation in these sectors needs to be improved. It is therefore, important that efforts are made through policy interventions to improve upon capital formation in these sub-sectors which will translate into the provision of quality education and improved healthcare delivery.

The concentration of persons engaged by non-household establishments in Greater Accra, Ashanti and Western regions should be a concern. Also, over 70 percent of all revenues generated is from the Greater Accra region which does not align well with the objective of decentralization. Expanding the creation of factories and establishments/enterprises in the various parts of the country will be a useful venture. Thus, policy should target the setting up of businesses across all regions to increase access to basic goods and services outside of the Greater Accra region while creating employment in all regions to reduce migration to the capital city.

A concerted effort should be made at creating free zone enclaves in all regions in the short to medium term and in the districts in the long-term is worth considering to ensure the development of an industry sector that would not only be concentrated in the three large cities but spread throughout the country. This will bring about development to the benefit of all the citizenry. The current one-district one-factory program of government is laudable and all efforts should be made to make it successful and sustainable in the long-term.

## **CHAPTER SIX**

### **GLOSSARY**

#### ***The statistical unit***

An establishment is the statistical unit recommended by the United Nations Statistical Office for economic enquiries. This is defined as a unit of production engaged in a single kind of activity under a single ownership at a single location. In practice, it was difficult to apply this definition to some enterprises hence the concept of reporting unit was adopted. The reporting unit was the smallest unit that could provide the information required by the census. With the exception of the cases below, the reporting unit was the same for all establishments:

1. A unit, though under single ownership carrying out a single activity, may operate at different locations but keep consolidated accounts, which does not readily yield data on separate locations. This occurs in some larger establishments.
2. A number of establishments are engaged in two or more economic activities. Where possible, a completed questionnaire was obtained in respect of each activity otherwise a combined return for all activities was accepted.

#### ***Classification of industry***

The International Standard Industrial Classification for all Economic Activities (ISIC) Rev.4 was adopted for classifying economic activities. The industry group (four-digit) level was found to be sufficiently detailed for Ghana's needs.

#### ***Classification of products and materials***

The Central Product Code (CPC) Rev. 2 was adopted for classifying products. Classification for products was done at the five-digit level. In some cases where the product could not be easily classified based on the international codes, localize codes were created as extension to take care of products only known in the Ghanaian industry.

#### ***Institutional agriculture***

Institutional agriculture in IBES II covers all agricultural establishments owned by the private and public-private partnership other than household agriculture. Non-household agriculture includes all institutions (housed in a structure) engaged in agriculture-related activities, usually called institutional agriculture. This report examines only on institutional agriculture.

#### ***LMSM establishments***

LMSM is an abbreviation for large, medium, small micro establishments. Large-sized establishments are those with more than 100 persons engaged in total. Medium-sized establishments are those with 31-100 employees, while small-sized establishments have 6-30 persons engaged. Micro-sized establishments are those with a total of 1-5 persons engaged.

#### ***Privately owned establishments***

A privately owned enterprise refers to a commercial enterprise that is owned by private investors, shareholders or owners (usually collectively, but they can be owned by a single individual), is in contrast to state institutions. Private enterprises make up the private sector of the economy.

### ***Public-private partnership establishments***

A public-private partnership (PPP) is a government service or private business venture, which is funded and operated through a partnership of government or one or more private sector companies. In 2004, the government of Ghana published PPP policy guidelines, which attempted to officially integrate the two sectors in the development process. The private sector was described as Ghana's "engine of growth" indicating its importance. The PPP law gives government the legal backing to join with private firms to carry out projects in the country.

### ***Purchasers' Prices***

The delivered cost at the establishment including the purchase prices, charges for transport, the cost of insurance, value of packaging materials charged for and all taxes and duties on the goods less discounts and rebates allowed to the purchaser and the value of packaging materials returned to the supplier.

### ***Ex-factory price***

The price establishment charged to the consumer including duties and taxes which fall on the products when they leave the establishment excluding all subsidies.

### ***Value of Stocks***

The value of stocks of goods intended for sale and of materials, fuels and supplies for use by the units should be that at the beginning and end of the enquiry period for goods intended for sale, irrespective of where held, and of materials for use by the unit, that are owned by the establishment if it is part of a single-unit enterprise or that are controlled by the establishment and owned by its parent enterprise if it is part of a multi-unit enterprise. These are goods for which the establishment has transferred the effective right to use to others with a view to ultimate purchase by them is excluded.

### ***Stocks of finished goods***

Stocks of finished goods produced by the unit (industry) include all goods made by the establishment that are ready for sale at the reference date. Finished goods held by another establishment that were processed by that establishment from raw materials controlled by the respondent establishment is included. Finished goods held elsewhere - at ancillary units, in bonded or public warehouses, on consignment, in transit, and so on, is also be included. Finished goods held by the respondent establishment that were made from materials owned by others is not excluded.

### ***Stocks of finished goods purchased for resale***

Stocks of finished goods to be sold in the same condition as received covers the value of any stocks of goods that the establishment has bought with the intention of reselling in the same form, that is, without further processing.

### ***Stocks of materials, fuels and supplies***

Stocks of materials, fuels and supplies comprises all materials, components and the like that enter into the product, fuels, and repair, maintenance, office and other consumable supplies.

### ***Stocks of work in progress***

Stocks of work in progress refers to the value of all materials that have been partially processed by the establishment but that are not usually sold or turned over to other establishments without further processing.

### ***Work-in-progress***

These are materials which have been partially processed by the establishment but which are not usually sold without further processing.

### **Average Number of Persons Engaged**

This refers to total number of persons who work in or for the establishment; the average number of operatives plus the average number of other employees plus working proprietors and active business partners plus learners (including unpaid apprentices) plus unpaid family workers.

### **Employees**

This refers to all persons working for and paid by the establishment. They include persons working full-time or part-time and employees on sick leave, paid vacations and holidays.

### ***Wages and Salaries***

All payments, whether in cash or in kind, made by the employer during the year to employees, including wages and salaries, other cash payments, bonuses, cost of living allowances, wages paid during vacation and sick leave, contributions payable by employees and deducted by the employer such as Social Security and National Insurance Trust contributions, taxes etc.

### ***Supplements to wages and Salaries***

It is the employer's contribution on behalf of employees to the Social Security and National Insurance Trust, private pension plan, provident fund and workmen's accident compensations plan, insurance premiums on hospital and medical plans, premium on accident and sickness Insurance and life insurance premiums. It also includes all such schemes whether legally acquired, initiated by the employer or established as a result of labour management bargaining contract.

### ***Receipts for non- Industrial Services***

This includes receipts from rents, commission receipts, revenue from the operation of employee facilities, receipts for transport and warehousing services rendered to others other than delivery of own products.

### ***Receipt for Industrial Services***

This includes receipts for contract and commission work done on other establishments' materials like processing, transforming and assembly of materials supplied by the units which order the work, receipts for repair and installation work done for others and value of fixed assets produced for own account.

### ***Cost of industrial Services***

This includes payments made to others for contract work done by others on the establishment's materials.

### ***Cost of non- Industrial Services***

This includes communications costs (telex, telephone, internet, postage costs, etc.), plus rental payments for building and machinery plus advertising cost plus bank charges plus other such costs.

### ***Receipts in Industry Sector***

This equals total sales of goods plus receipts for contract and commission work done for others plus receipts for repair and installation work for others plus other receipt for industrial services plus sales of goods bought and resold in same condition as purchased.

### ***Receipts in Agriculture Sector***

This equals total sales of agriculture products plus receipts from non-agriculture activities plus sales of goods bought and resold in same condition as purchased plus own consumption.

### ***Receipts in Service Sector***

This equal to total receipts for services provided plus sales of goods resold in same condition as purchased plus any other income.

### ***Intermediate input/consumption:***

This is a measure of the goods and services used up in a period in the production process. It is estimated as expenditure on purchases of materials and supplies, and services used as inputs less change in inventories of materials and supplies (inventories include work-in-progress).

That is, cost of materials and supplies (both domestic and imported) plus fuels purchased plus electricity and water purchased plus both cost of industrial and non-industrial plus cost of goods expressly bought to be sold in the same condition as purchased plus stock of materials, supplies, and fuel at the beginning of the year less stock of materials, supplies and fuel at the end of the year.

### ***Value Added***

The value of outcome when factors of production interact to avail goods and services. It is intended to measure the value created by the process of production.

### ***Gross Value Added***

Gross value added is the value of receipts less the value of intermediate consumption; it is a measure of the contribution to GDP made by an individual producer, industry or sector.

### ***Gross Domestic Product***

Gross Domestic Product (GDP) is an aggregate measure of production. It is the sum of the gross value added of all resident establishments, plus any taxes, less subsidies, on products (if not included in the value of their outputs).

### ***Depreciation of Fixed Assets***

Is the value of wear and tear of fixed assets in the course of the financial year? It is value allowed at current replacement cost of assets used up during the year through normal wear and tear, foreseen obsolescence and the normal rate of accidental damage.

The survey collected data on the book value of establishments' fixed assets and depreciation. Most of the large establishments had no difficulty in giving information on depreciation of their fixed assets. A number of the small establishments, could not give any information on depreciation, but provided the value of the assets at the time of purchase, and the year of the purchase. This enabled estimation of depreciation using the straight line method.

### **Gross addition to fixed assets**

This equals capital expenditure on new, secondhand, improvements and work done on own account of fixed asset (Tangible and Intangible) for the year.

### **Tangible fixed assets include:**

- Land
- Buildings
- Other Construction and land improvement
- Machinery and other equipment
- Transport and Equipment
- Furniture and fixtures
- Other tangible assets

### **Intangible fixed assets include:**

- Computer software and databases;
- Research and developments;
- Entertainment, Literacy, and Artistic originals.
- Other Intellectual Property

### ***Sales or disposal of fixed asset***

This is the act of selling an asset that has been depreciated over its useful life. The value of sale of the fixed assets during the year.

## APPENDICES

**Table A.1: Purchases and other operating cost by sectors**

Sector	No. of Establishments	Total GH¢	Material and Supplies, GH¢	Goods Purchased for Resale GH¢	Fuel purchased GH¢	Electricity purchased GH¢	Water purchased GH¢	Other Purchases GH¢	Other Operating Costs GH¢
